

Assignments

Simplify how you distribute, analyze, and grade student work.

Assignments is an application that brings the collaborative power of G Suite into your learning management system (LMS).

INTEGRATE

Bring your favorite tools together.

- Simplify assignment management and enhance workflows with G Suite productivity tools
- Make Google Docs, Google Slides, and Google Drive compatible with your LMS
- Limit your student submissions to school-issued Google Accounts

DISTRIBUTE AND GRADE

Save time distributing and grading classwork.

- Automatically create and share personalized G Suite templates and worksheets
- Use rubrics integrated with student work for more transparency and consistency
- Give rich feedback on student work with a customizable comment bank

ANALYZE

Analyze student work to ensure authenticity.

- Compare work against hundreds of billions of web pages and over 40 million books with one search
- Help students support their own ideas by scanning work for recommended citations
- Build a private repository of past submissions to make student-to-student comparisons when you upgrade to G Suite Enterprise for Education

Enhance your LMS with G Suite and productivity tools

Assignments seamlessly integrates G Suite directly with your LMS and **automatically creates and distributes personalized copies** of the schoolwork into each students' respective Drive folder. Because it's an application built to LTI 1.3 standards, Assignments is compatible with any LMS that **supports LTI 1.1 or higher**. Admins can quickly turn Assignments on, and educators can start saving time.

Support critical thinking.

Originality reports bring the power of Google Search to classwork and grading, quickly identifying passages that may need a citation.

Features include:

- Easy report saving, downloading, and printing
- More file-scanning options
- Supported in multiple languages, such as Spanish, French, and Portuguese

Upgrade to G Suite Enterprise for Education.

Enterprise licenses offer more ways to support students and teachers, including:

- Access to unlimited originality reports
- Student-to-student content matches within a school-owned repository of past submissions

Protect student and educator privacy.

Assignments meets rigorous security and compliance standards, including:

- Family Educational Rights and Privacy Act (FERPA)
- Children's Online Privacy Protection Act (COPPA)
- Student Privacy Pledge

For more details, visit the Privacy & Security Center at edu.google.com/privacy

Assignments enables [our] faculty to save time on the mundane parts of grading and feedback ... [and] it does this all while keeping student and faculty data secure and private.
