

Choose your license

Compare full-domain and partial-domain license offerings.

Unsure whether to purchase G Suite Enterprise for Education for all of the users in your domain or for just some of your users? Use this chart to determine which option is best for you.

Feature	Full-domain license: feature definition and functionality	Partial-domain license: feature definition and functionality
Security center	Detect threats as soon as they emerge – with visibility into your domain’s data exposure and analytics – through the security dashboard.	Full functionality
Security investigation tool	Remediate attacks – such as malware, phishing, or spamming of the school-wide alias – and quickly investigate, triage, and take action to mitigate the impact of an incident.	Full functionality
G Suite Migrate (beta)	Assess and plan migration projects and confidently migrate large amounts of valuable content into G Suite. Sign up here for beta.	Limited functionality: Institutions need to have at least 15% of their faculty and staff on the G Suite Enterprise for Education SKU to qualify for G Suite Migrate (beta). All users in the domain can be migrated once this requirement is met.
Gmail logs in BigQuery	Export all of your institution’s Gmail logs and usage data to BigQuery – with the freedom to use your own tools for further analysis.	Limited functionality: Only the data of licensed users will be surfaced in Gmail logs and usage data exported to BigQuery.
Reporting in BigQuery	Move G Suite reporting and audit data from the G Suite admin console to BigQuery. Create highly customizable, comprehensive, and scalable reports to audit and analyze G Suite usage and adoption.	Full functionality

Feature	Full-domain license: feature definition and functionality	Partial-domain license: feature definition and functionality
Data regions	Institutions with data-control requirements can choose where a copy of primary data for select G Suite apps should be stored at rest: globally distributed, in the US, or in Europe.	Limited functionality: Only data for licensed users can be contained in a data region.
Mobile-device management	Enable proactive management of user-owned mobile devices by setting device rules . You can also review audits and reports of activities, and securely manage work apps on a user's device while leaving personal apps under their control.	Limited functionality: G Suite Enterprise for Education mobile-device management (MDM) features are available only to licensed users, and MDM rules apply only to them.
Third-party archiving solution	Admins can set up a third-party archiving solution to archive Gmail journal messages. This solution can help admins comply with email requirements, such as SEC Rule 17a-4, and allows users access to archives.	Limited functionality: Gmail data is available for third-party archiving for users with assigned G Suite Enterprise for Education licenses only.
Originality reports	Focus on helping students learn how to properly incorporate and cite outside ideas, while providing instructors with a quick way to verify academic integrity. Only licensed faculty have the ability to generate unlimited originality reports. During the beta, all faculty – whether licensed or unlicensed – will have the ability to generate an unlimited number of originality reports.	Limited functionality: Unlicensed faculty have the ability to generate up to three originality reports per course.
Meet recordings	Record meetings – like staff, school board, and professional-development gatherings – and automatically save the recordings to Drive. The recordings can then be shared afterward with your community. Meet recordings can be initiated only by faculty users.	Full functionality
Meet livestream	Broadcast live school activities – such as presentations, athletic activities, announcements, and lectures – to up to 100,000 out-of-domain participants. Meet livestream can be initiated only by faculty users.	Full functionality
Larger meetings	Host live video meetings and district-wide training with up to 250 participants who can chat, comment, share screens, and collaborate in real time.	Full functionality
Cloud Search	This feature brings the best of Search and artificial intelligence to G Suite. Find content fast, anywhere on your school's domain, with Cloud Search.	Limited functionality: Access to Cloud Search is available only for licensed users, and only indexed documents from licensed users, will surface in results.
