

Dear families,

We want to share with you the technology we'll be using in the classroom this year, and why we chose it. This year, we have chosen to use *[fill in the blank]* in the classroom. These set of tools and resources will offer personalized learning experiences, open doors for our students, and prepare them to be positive digital citizens for the digital future.

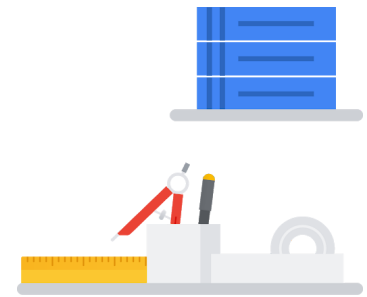

We've chosen *[fill in the blank - apps, tools, devices]* because... *[Add justification]*

With this resource, we will be able to... *[Add use cases + benefits]*

These collective tools will help to engage students in new and innovative ways, improve learning outcomes, and help us do what we love - teach. *[Add line about how else they will be used in the classroom]*

It's important to continue the tech conversation at home by talking with your children regularly about tech usage, digital safety, and well-being, so see the resources and links below for more information!

We want to make sure that families can also take part in the learning and conversations held in the classroom. Here are some additional resources that we recommend.
