Google for Education

Enabling Distance Learning using Google Meet

As illness and other factors prevent students from attending school in-person, how might educators leverage powerful tools to extend learning to home environments? Using Google Meet, school and district leaders can enable premium features and educators can use Google Meet for virtual learning.

Challenge	Strategies
Setting up and ending a class meeting	You may choose to <u>start a video meeting</u> in a variety of ways, such as straight from Classroom, Google Meet, Gmail or from a Calendar event. Decide how you want to <u>control access to</u> <u>the call</u> . Consider posting a link to upcoming Google Meet sessions in an <u>announcement</u> in Google Classroom for students. During class you'll be able to <u>mute all participants</u> to reduce distractions and when finished, <u>end meeting for all</u> , preventing students from staying on the call after class.
Facilitating instruction virtually	<u>Share your screen</u> to present <u>Slides</u> or display other resources you wish to share. Chunk your material and pause regularly to check in with participants during the session. Encourage participants to use the <u>chat feature</u> or turn on their microphones in order to actively participate.
Assessing your students remotely	Use the <u>Ask a Question</u> feature in Classroom to capture a snapshot of student knowledge before (or after) a Google Meet session. Check for comprehension during a Google Meet session by utilizing the <u>chat feature</u> , <u>Q&A</u> , <u>polls</u> , or integrating a <u>Slides Q & A</u> . Share a link to a <u>Google Form</u> in the chat box or attach a <u>Forms quiz</u> to an <u>assignment in Google Classroom</u> to assess student learning during or after a Google Meet session.
Engaging your students in the lesson	Use the <u>chat feature</u> and allow students to contribute verbally during the session. Consider using the <u>Slides Q & A</u> feature, or <u>share a link</u> to interactive Docs, Slides, or websites to facilitate hands-on activities during the session. Promote student partner/group collaboration by teaching students how to <u>create a Google Meet session</u> work with each other virtually, if appropriate. If using the Teaching and Learning Upgrade or Google Workspace for Education Plus, use <u>breakout rooms</u> , <u>Q&A</u> , and <u>polls</u> to engage students even more.

Challenge	Strategies
Classroom management	Source <u>high-quality YouTube learning content</u> and create personalized learning playlists for students to explore while at home.
Meeting the needs of all learners	Have students enable live <u>captions</u> during a video meeting to display the text of the conversation and use the <u>chat feature</u> in Google Meet to give students the opportunity to ask questions. Check out Google's <u>Accessibility page</u> , this <u>Accessibility guide</u> , and this <u>diverse learning module</u> to ensure you are meeting the needs of all students.
How to record a Google Meet	<u>Record your Google Meet session</u> for students who are unable to attend - or who may benefit from rewatching the session for review. Your recording will be saved in your Google Drive account, and you can <u>share the link</u> to your recording via Classroom, email, or class website.
Preparing your students for remote learning	Prepare students to use Google Meet by <u>checking the</u> <u>hardware/software</u> on devices. Model how to join a session, and share <u>Google Meet</u> resources with students. Determine and share <u>how you will communicate with students and</u> <u>parents remotely</u> so you can share this information as soon as possible. Consider incorporating Google's <u>digital citizenship</u> and <u>digital skills</u> resources into your remote instruction to ensure students are prepared for digital learning.
Overcoming lack of Internet access	Reaching students without internet access is vital in order for all students to have equal access to learning. With the ability to <u>record Google Meet sessions</u> sessions, you can pre-record sessions or share recorded sessions after the video call so students are able to watch at a later time. If possible, make sure students have enabled <u>offline mode</u> before they leave school with the device so they can access Docs, Sheets, and Slides without internet.
