

Assignments

Simplify how you create, analyze, and grade coursework.

Assignments helps you save time grading – while still providing feedback that counts.

+ CREATE

Generate new coursework using Docs and Drive.

- Share coursework right from your learning management system (LMS)
- Give each student a unique copy
- Organize work by class, date, and student

🔍 ANALYZE

Assess originality using the power of Search.

- Cross-reference the web in one search
- Run reports within your grading interface
- Let students scan their work before submitting

✅ GRADE

Save time with tools built for education.

- Prevent student access during grading
- Save frequent feedback to your comment bank
- Apply rubrics alongside student work

EMPOWER

Help students learn proactively and work more efficiently. The spellcheck and grammar suggestions features in Docs can help improve writing skills, while two-way dialogue enhances the exploration of ideas. Autosave and a visible character count make it easier to stay focused and meet project requirements.

Get started on your own.

Assignments is now part of G Suite for Education. Sign up for the beta to get started – no setup is required.

Request access within your LMS.

Assignments is built to Learning Tools Interoperability standards, so it's compatible with any LMS. Talk to your LMS admin about turning it on.

Protect student and teacher privacy.

Assignments meets rigorous security and compliance standards, including:

- Family Educational Rights and Privacy Act (FERPA)
- Children's Online Privacy Protection Act (COPPA)
- Student Privacy Pledge
- ISO/IEC 27018:2014
