Executive Summary

**Smartphones have become an indispensable part of our daily lives.** Smartphone penetration has risen to 57% of the population and these smartphone owners are becoming increasingly reliant on their devices. 67% access the Internet every day on their smartphone and most never leave home without it. **Implication:** Businesses that make mobile a central part of their strategy will benefit from the opportunity to engage the new constantly connected consumer.

**Smartphones have transformed consumer behaviour.** Mobile search, video, app usage and social networking are prolific. Smartphone users are multi-tasking their media with 87% using their phone while doing other things such as watching TV (56%). **Implication:** Extending advertising strategies to include mobile and developing integrated cross-media campaigns can reach today’s consumers more effectively.

**Smartphones help users navigate the world.** Appearing on smartphones is critical for local businesses. 91% of smartphone users look for local information on their phone and 89% take action as a result, such as making a purchase or contacting the business. **Implication:** Ensuring that clickable phone numbers appear in local results and leveraging location based services on mobile make it easy for consumers to connect directly with businesses.

**Smartphones have changed the way that consumers shop.** Smartphones are critical shopping tools with 83% of users having researched a product or service on their device. Smartphone research influences buyer decisions and purchases across channels. 44% of smartphone users have made a purchase on their phone. **Implication:** Having a mobile-optimised site is critical and a cross-channel strategy is needed to engage consumers across the multiple paths to purchase.

**Smartphones help advertisers connect with consumers.** Mobile ads are noticed by 90% of smartphone users. Smartphones are also a critical component of traditional advertising as 66% have performed a search on their smartphone after seeing an offline ad. **Implication:** Making mobile ads a part of an integrated marketing strategy can drive greater consumer engagement.
Understanding the Mobile Consumer

This survey is designed to gain insights into how consumers use the Internet on their smartphones.

In detail:

• Facts and figures about smartphone adoption and usage
• Internet usage in general, search, video, social networking, mobile advertising and m-commerce behaviour via smartphones
• This country report is part of a global smartphone study conducted in multiple countries. Visit thinkwithgoogle.com/mobileplanet for access to additional tools and data

How are smartphones used in daily life?

How do consumers multi-task with their smartphones?

What activities are consumers conducting on their smartphones?

What role do smartphones play in the shopping process?

How do consumers respond to ads, offline and on mobile?
Agenda

1 Smartphones are Indispensable to Daily Life

Background
Research Methodology

• In partnership with Ipsos MediaCT, we interviewed a total of 900 Irish online adults (18-64 years of age) who identified themselves as using a smartphone to access the Internet

• The distribution is according to a national representative study and the data is weighted on age, gender, region, brand of smartphone, mobile internet usage frequency and tablet usage

• A smartphone is defined as "a mobile phone offering advanced capabilities, often with PC-like functionality or ability to download apps"

• Respondents were asked a variety of questions around device usage, mobile search, video, social, web and commerce behaviour and mobile advertising

• Interviews were conducted in Q1 2013
