

Unleash the power of hybrid cloud with Google Cloud's Anthos and HPE

Simplify IT and make modernization easy – on-premises or in the cloud – with hybrid cloud solutions seamlessly built on Google Cloud's Anthos with HPE's proven technology and services.

Deliver agility across all clouds with the least amount of risk and disruption. Deploy true hybrid cloud solutions that support both stateless and stateful applications. Gain the freedom to innovate with rapid deployments, improved productivity, and faster cycle times for key hybrid cloud use cases.

Modernize apps in place

Modernize your applications in place with an optimized Kubernetes container stack on-premises or in the cloud.

Hybrid CI/CD

Empower developers to develop in the cloud and deploy production applications on premises, or vice versa.

Hybrid disaster recovery

Run production on premises, protect applications across on-premises and cloud, and recover in the cloud.

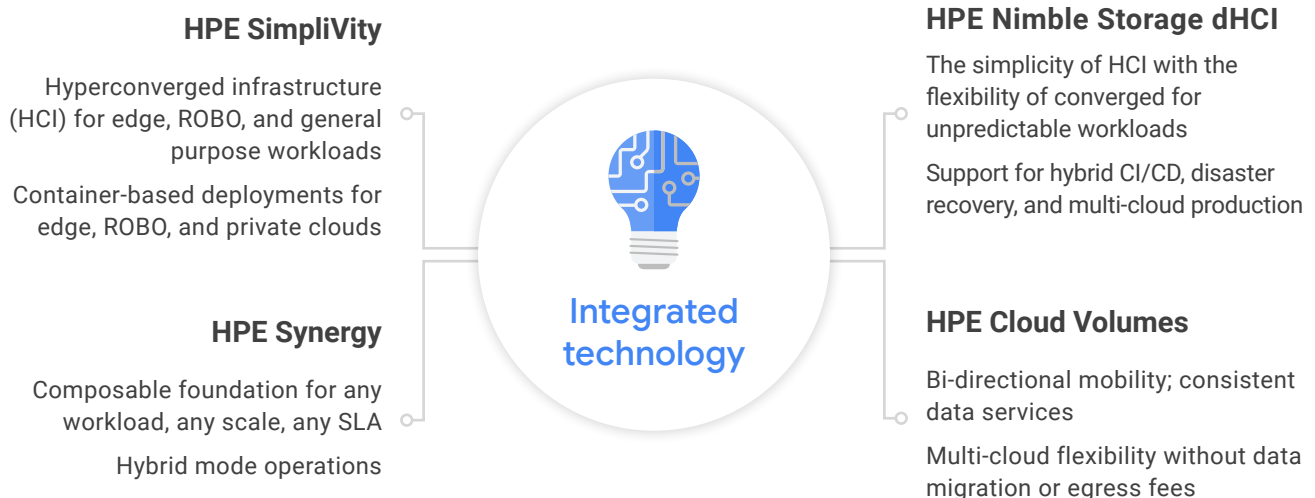

Multi-cloud production

Support for VMs and container-based applications spanning edge and core clouds with the flexibility to run applications in multiple clouds.

Hybrid cloud done right

Choose how you want to consume your IT infrastructure, from on-premises to everything as-a-service. Deliver data to CI/CD pipelines anywhere, integrate with modern tools and principles, and count on effortless data management for your mission-critical enterprise workloads on an open cloud.

Deploy containers on your terms with HPE Validated Designs and Cloud Volumes support for Anthos, Google Cloud's platform for application modernization.

Empowered people

Plan, migrate, and deploy your hybrid cloud with proven, experienced advisory and professional services with HPE's Pointnext services bolstered by Cloud Technology Partners (CTP) and RedPixie to provide full, end-to-end services delivery, along with joint and collaborative support for the validated solutions.

Everything as a service

Experience a fully managed as-a-service Google Kubernetes Engine (GKE) environment on-premises with HPE GreenLake. Fully integrated with Google Cloud, HPE GreenLake delivers a container-based hybrid cloud across on-premises and public cloud environments.

Achieve greater agility, lower costs, and simplify your hybrid and multi-cloud journey with Google Cloud and HPE. Learn more at cloud.google.com/hpe.
