Stylus

Capture what's on your mind

Students can jot down notes and write directly on documents while teachers illustrate complex concepts and give visual feedback—all without the hassle of paper

Designed to resemble a #2 pencil

Built to share between students and devices—no charging or pairing necessary

Machine intelligence predicts the stylus stroke, so writing is more fluid

Affordable and easy to replace

STAEDTLER

Noris® digital

for Chromebook

The STAEDTLER Noris digital stylus looks and feels like a regular pencil and provides a natural writing and drawing experience on Chromebooks

- Wacom EMR (electro-magnetic resonance) technology

- No charging required (it's passive and does not use energy)

- Wood content from PEFC-certified sustainably-managed German forests

- Line width can be adjusted automatically with writing or drawing pressure on select apps

- Only recognizes the writing screen and ignores all other surfaces—such as the palm of your hand

❝

My students are extremely engaged when using a stylus—it makes devices accessible and more collaborative. For younger students, the stylus gives them a choice to write the letters or words they want to use since they haven't mastered typing yet—and it definitely saved time for some of them.
