Our Google Journey

2014 Gmail introduced

2018 Google Classroom introduced

2020 Trolley of Chromebooks for student use purchased. Google Meet and Classroom used for online teaching

2021 Staff chromebooks purchased. Chromecasts installed in all classrooms.

2022 A buy your own device policy (BYOD) is introduced for First Year and TY students.

2023 BYOD extended to all students. SMART boards introduced to some rooms.

2024 Teachers start training for Google Educator Level 1 exams. Introduction of Education Plus for all students and staff.

2025

Introduction of Chrome Education Upgrade licensed devices for First Years.

Purchase of Gemini AI Pro for teachers.

60% of staff have either Level 1 or Level 2 Google Educator exam completed.

2025 Google Reference School and Digital Empowerment Award

Google for Education
Reference School

Our Google Highlights

Google Sites

Used by all students from 1st to TY to create a Digital Portfolio to showcase and reflect on their work.

Use by staff to collaborate:

- Learning and Teaching
- Digital Strategy
- Whole School Guidance
- Policy and Procedures

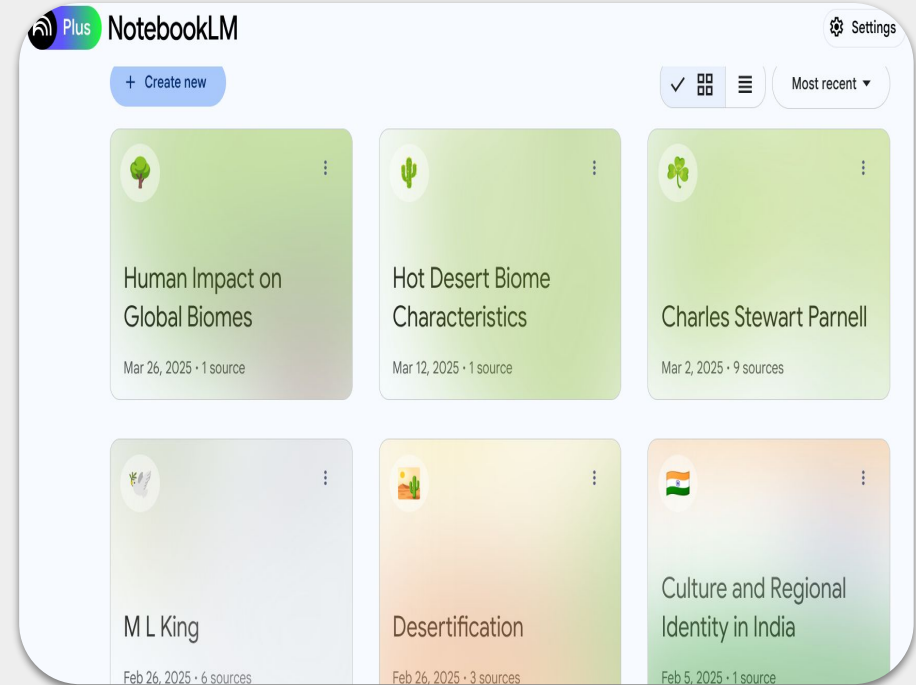

Notebook LM

Used by staff to generate resources:

Mind maps, summaries, quizzes

Audio overviews – different languages available

Video overviews

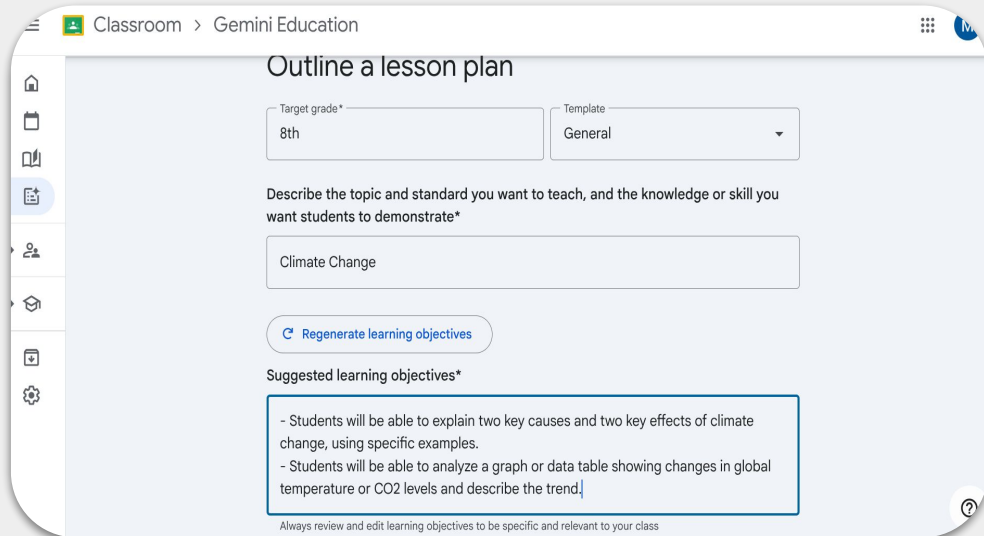

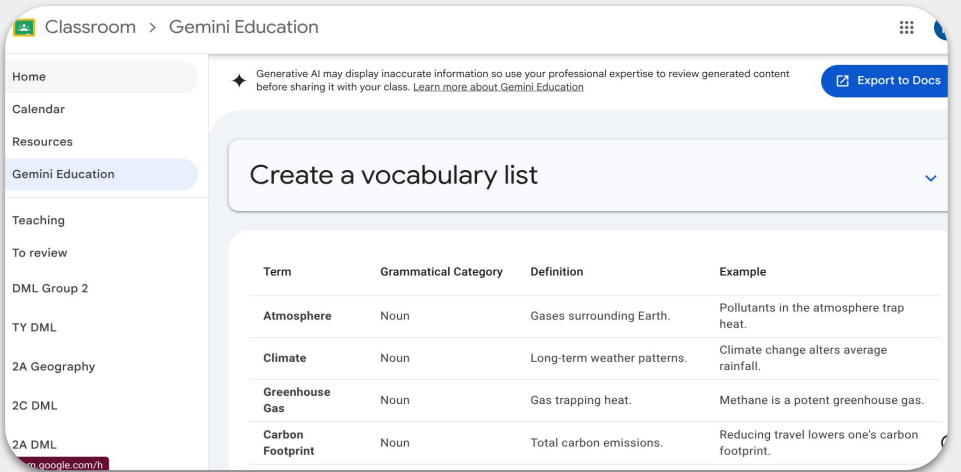

Gemini

Used by staff:

Quizzes, vocabulary lists,
brainstorming, exit tickets,
Google Forms, rubrics . . .

Planning

Re- level text

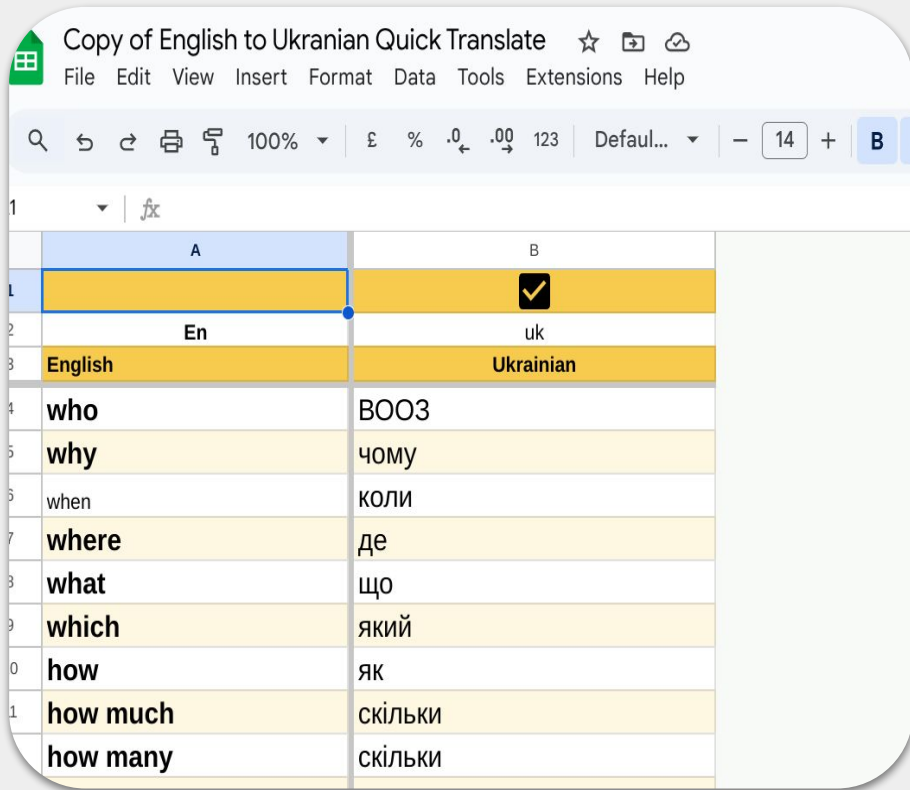

EAL Resources

Google Translate

Google Sheets Translator

Notebook LM - audio
overviews

Live Captions in different
languages - Class Tools and
Google Meet

The screenshot shows a Google Sheets window titled "Copy of English to Ukrainian Quick Translate". The interface includes a menu bar (File, Edit, View, Insert, Format, Data, Tools, Extensions, Help), a search bar, and a toolbar with various icons and settings. The main content area displays a table with two columns, A and B. Column A is labeled "English" and Column B is labeled "Ukrainian". The table contains the following translations:

English	Ukrainian
who	хто
why	чому
when	коли
where	де
what	що
which	який
how	як
how much	скільки
how many	скільки

Class Tools

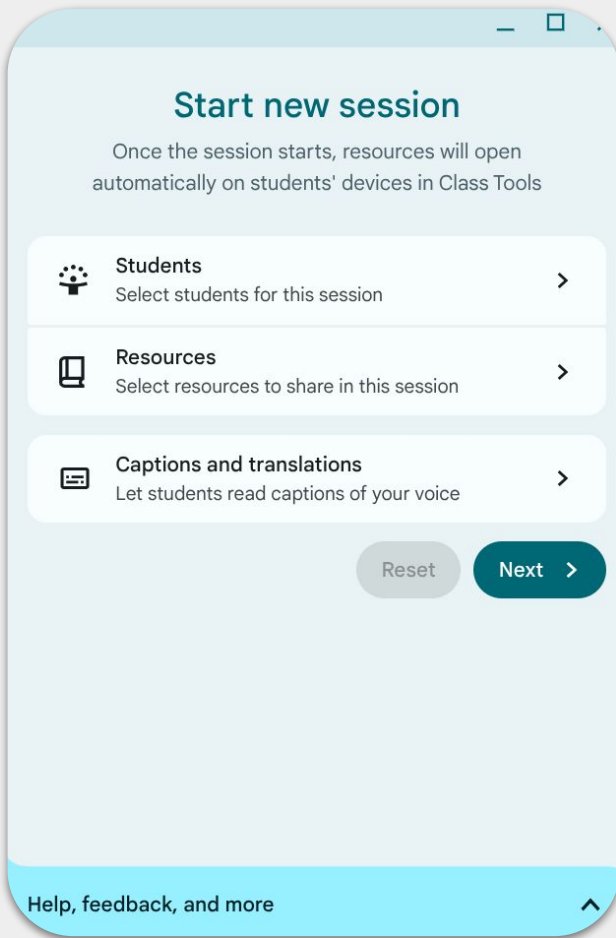

Assign work directly to student chromebook.

Choose what resources they can access.

Check in on individual students.

Provide live feedback to students.

Allow students to use captions and select language.

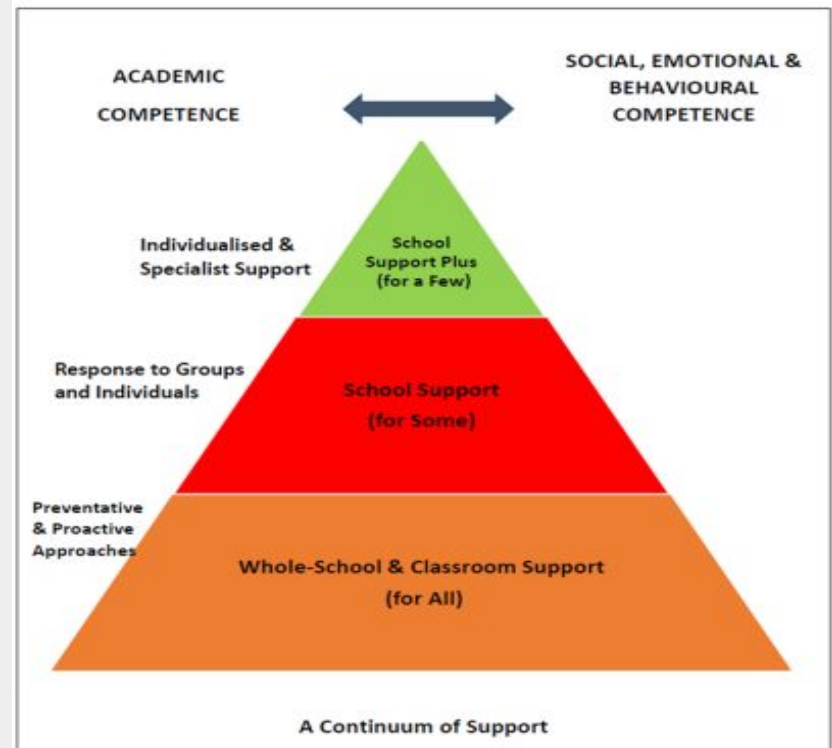

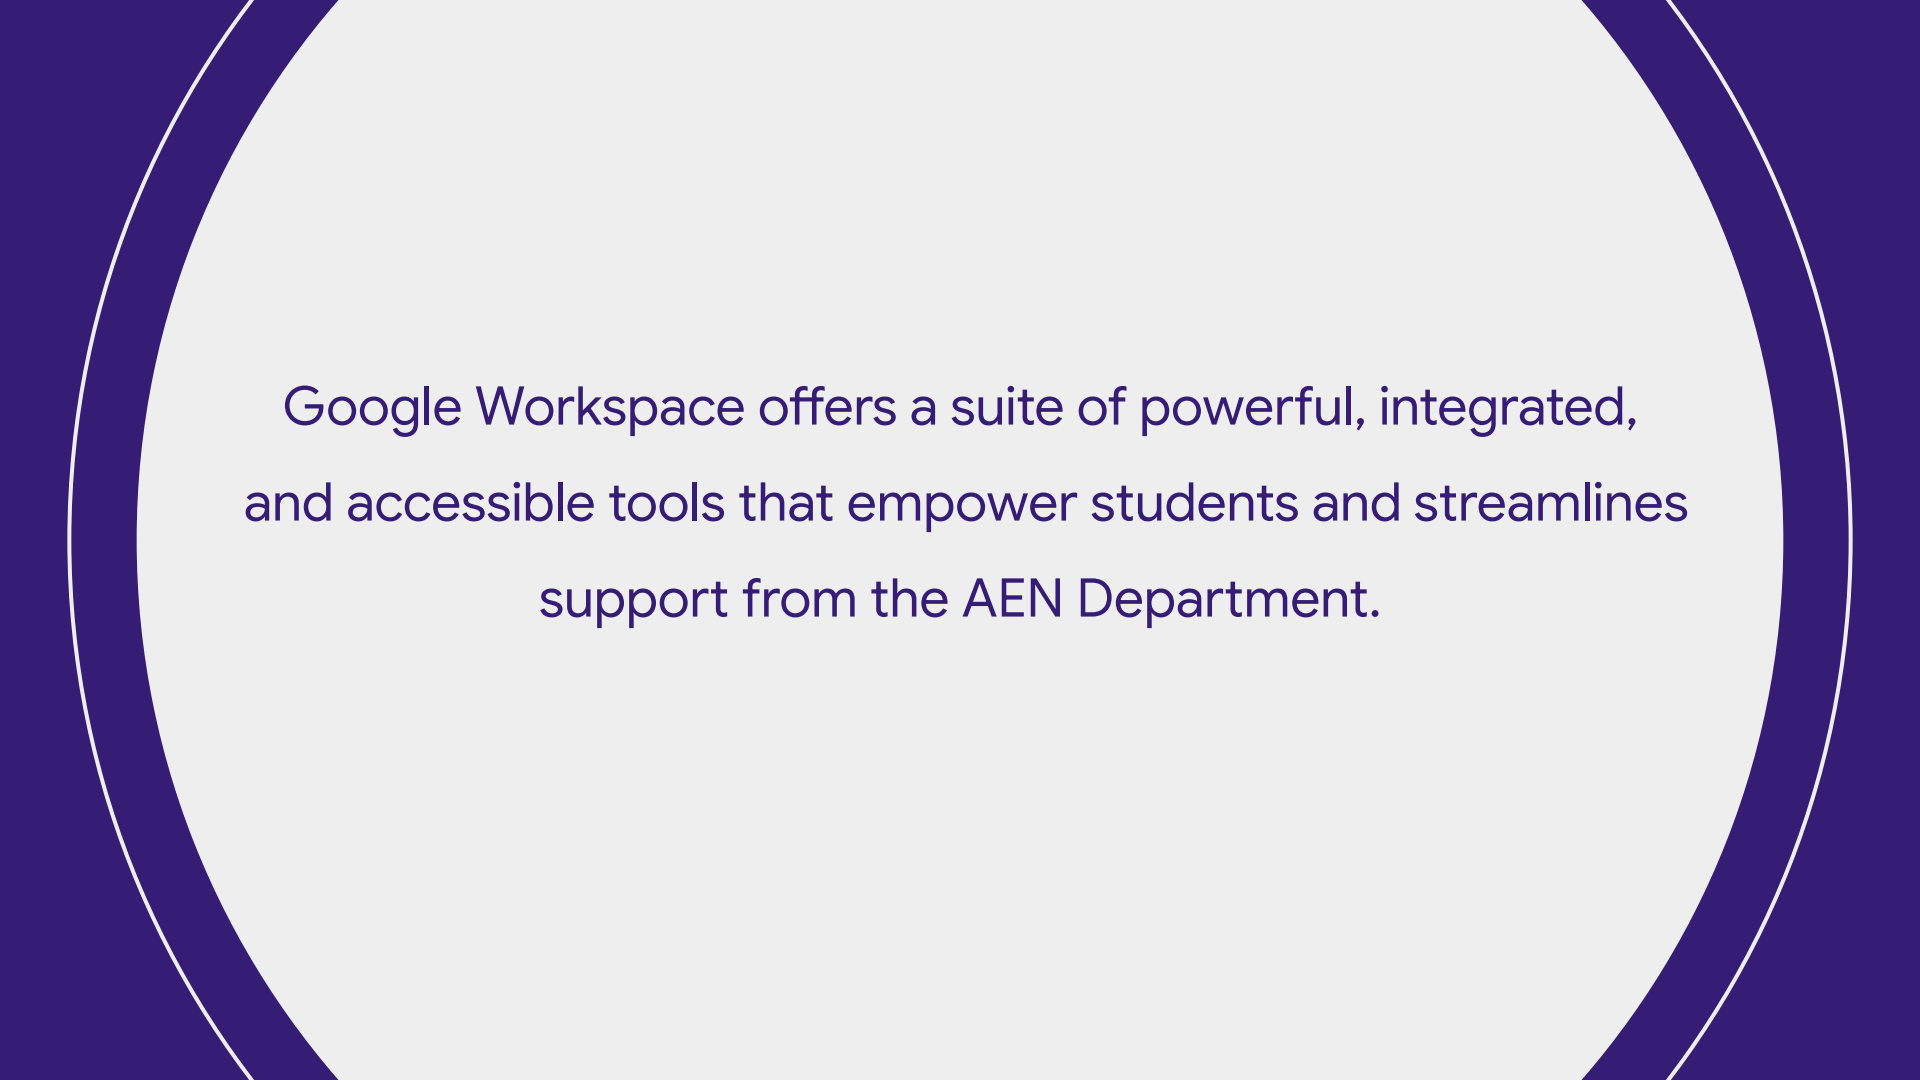

Lillian Waters
AEN Coordinator

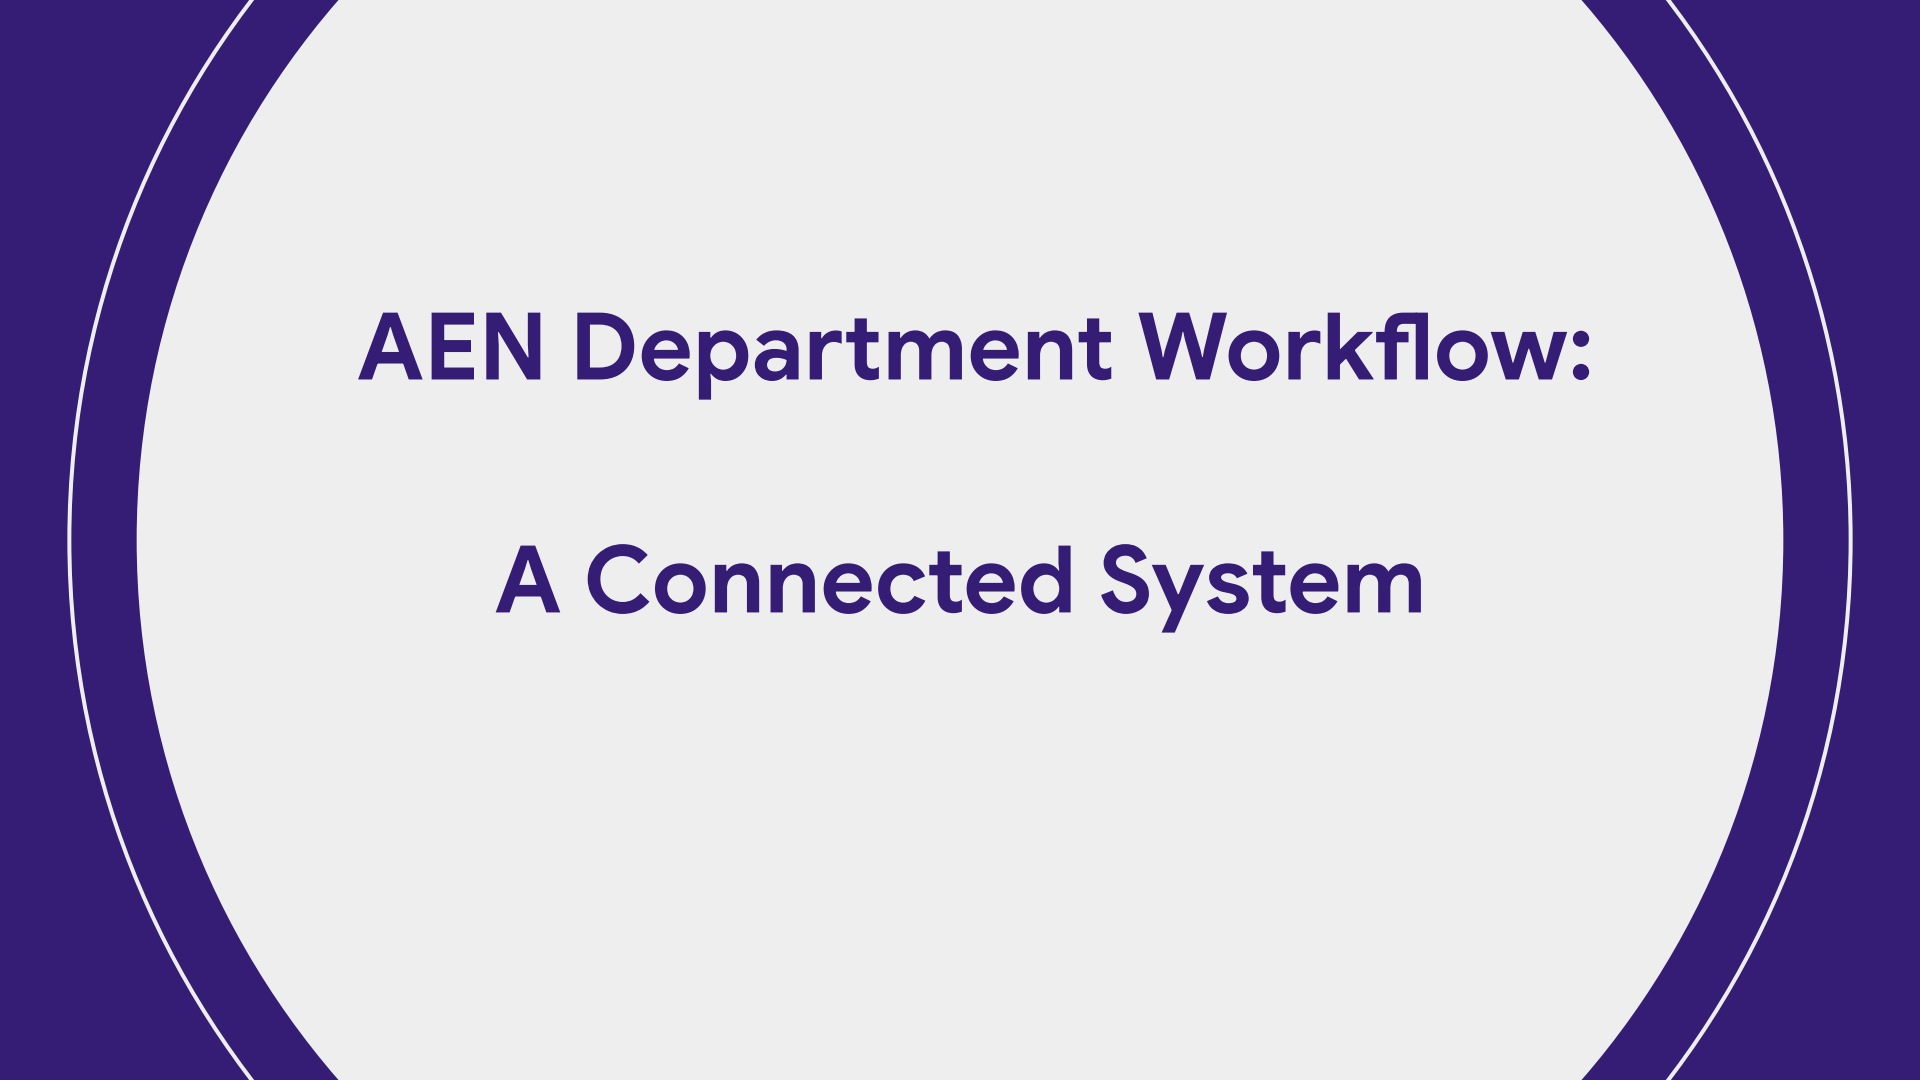

Vision: An Inclusive Digital Classroom

In line with the NEPS Continuum of Support framework, our goal is to leverage technology to provide targeted and effective support for all students with Additional Educational Needs (AEN).

Google Workspace offers a suite of powerful, integrated, and accessible tools that empower students and streamlines support from the AEN Department.

AEN Department Workflow:

A Connected System

Step 1: Referral of Concerns with Google Forms

AEN Referral Form.

How it Works:

- standardised form
- Submissions are private and go directly to the AEN department.

Benefits:

- Consistency
- Trackability

AEN Referral Form

If you would like to refer a student to the SEN team for assessment and/or assistance please complete the form below. The form will take approximately 5 minutes to complete. Thank you.

The name, email, and photo associated with your Google account will be recorded when you upload files and submit this form

A Bird's-Eye View of Every Classroom

The **Class Profile** contains a snapshot of student assessment, needs and recommended classroom accommodations.

How Google Sheets Helps:

- Collaboration
- Accessibility
- Easy Updates

Whole-School Planning & Resource Allocation

Benefits of using Google Sheets:

- Centralised Data
- Data Analysis
- Reporting

[illegible]

Step 4: The AEN Handbook in Google Docs

A Living Document for Teacher Support

Our **AEN Handbook** is a shared Google Doc that acts as a dynamic resource for all staff.

Why Google Docs is Perfect:

- Always Up-to-Date
- Searchable
- Collaborative

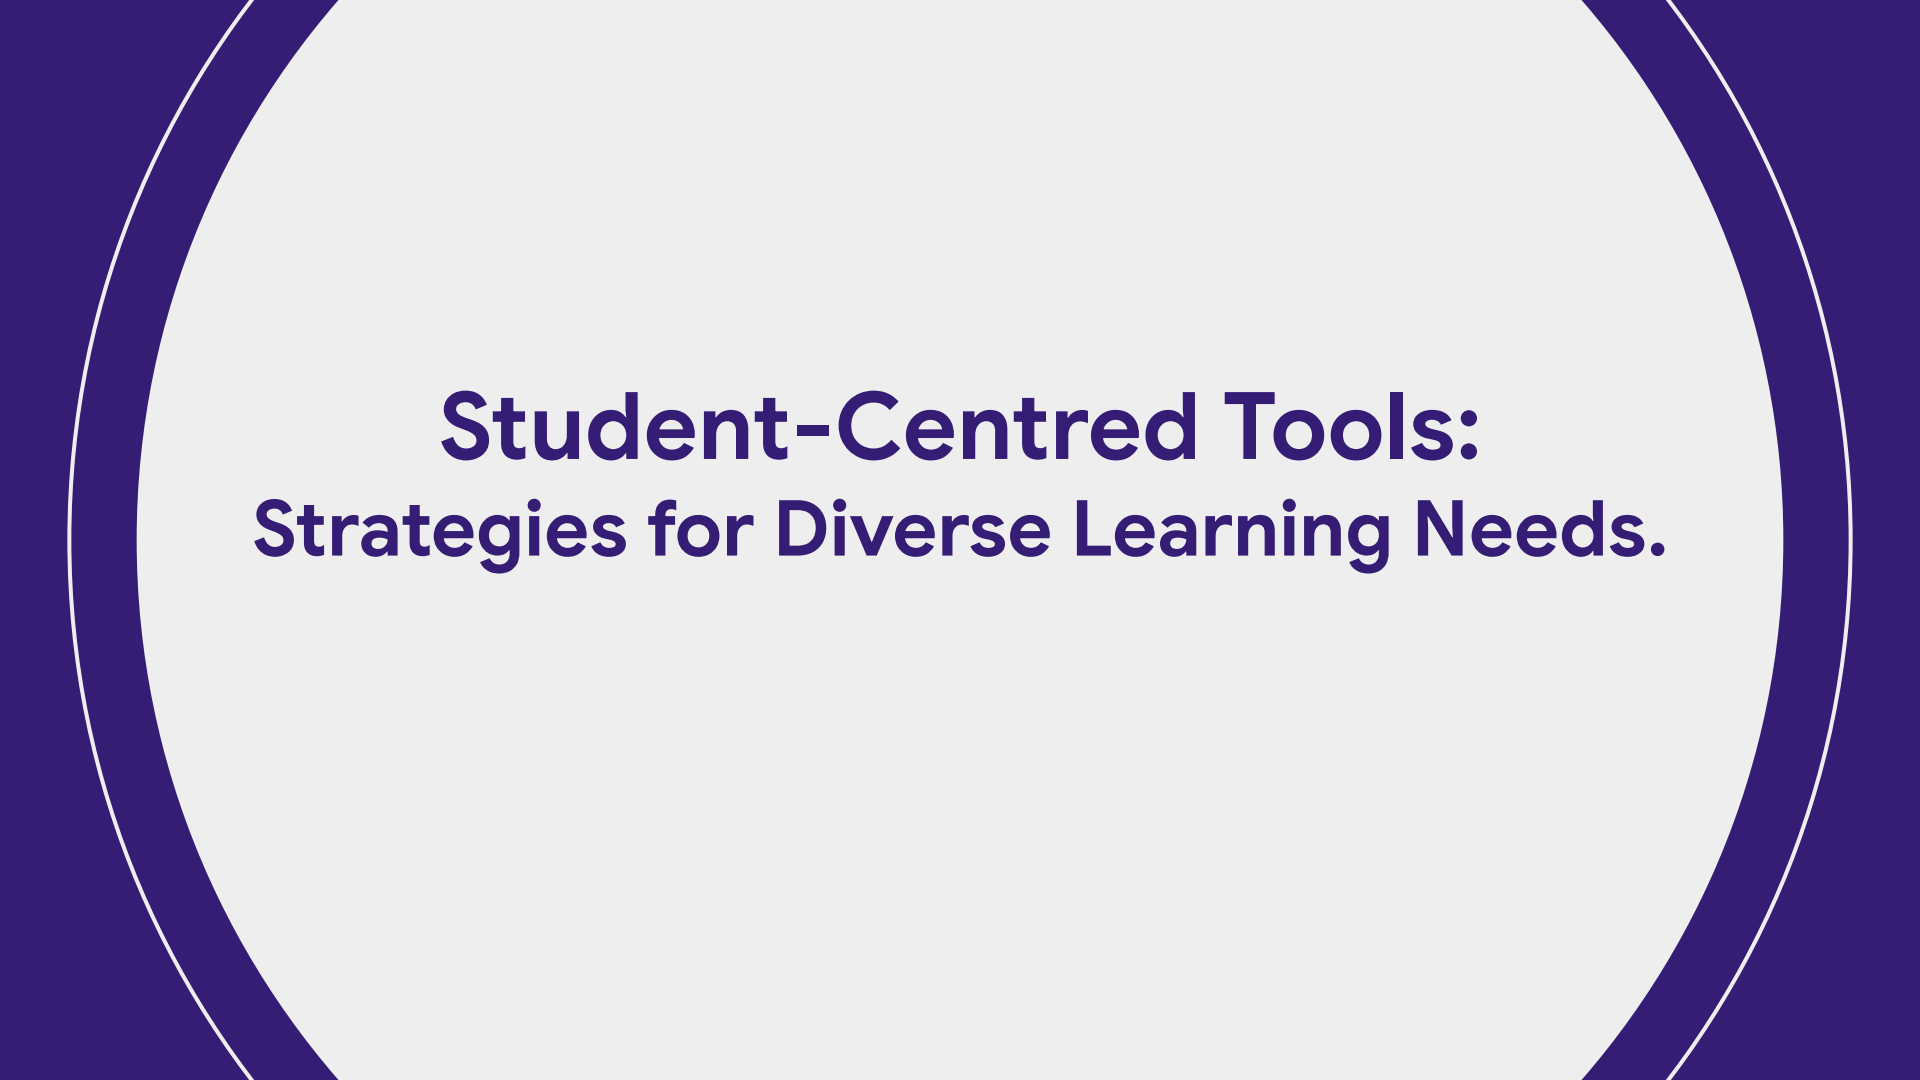

St Mary's Secondary School Charleville

St. Mary's Secondary School

AEN Staff Handbook |

2025 - 2026

Student-Centred Tools: Strategies for Diverse Learning Needs.

Supporting Students with Dyslexia & MGLD

Overcoming Barriers in Reading & Writing

- Google Docs - Voice Typing (Dictation)
- NotebookLM - audio or video overview
- Text-to-Speech (e.g., Read&Write for Google Chrome)
- Spelling & Grammar Check
- Accessible Fonts: Lexend/Arial/Courier New

Supporting Students with Dyscalculia & ADHD

Tools for Organisation, Focus, and Numeracy

- Google Sheets for Maths
- Google Keep for organisation
- Google Calendar reminders
- Google Classroom for communication & structure

Students with ASD, DCD, Speech, Hearing & Physical Difficulties

Making the curriculum accessible to all:

- Enhancing communication & predictability 
- DCD (dyspraxia): Voice Typing
- Hearing difficulties: Live Captions
- General accessibility in ChromeOS and the Chrome browser.

Fostering Independence: The Digital Workflow

The Digital Copy

File Management in Google Drive:

- E.g. History folder/1st Yr/Notes/Homework
- Reverse-chronological format & Tabs
- Shared with Teacher/SNA

The screenshot shows the Google Drive interface. At the top, the breadcrumb navigation reads 'My Drive > History > 1st Year'. To the right of the breadcrumb are icons for a checkmark, a menu, a grid view, and an information icon. Below the breadcrumb are four filter buttons: 'Type', 'People', 'Modified', and 'Source'. The main content area displays a table of files. The table has five columns: 'Name', 'Owner', 'Last modified', 'File size', and a vertical ellipsis for more options. There are two files listed: '1st Year History Homework Copy' and '1st Yr History Notes Copy'. Both files are owned by 'me' and were last modified at '7:11 PM' with a size of '1 KB'.

Name	Owner	Last modified	File size	
1st Year History Homework Copy	me	7:11 PM	1 KB	
1st Yr History Notes Copy	me	7:11 PM	1 KB	

In- Class SNA Support

- SNA access to live Google Doc
- Scribe /Organiser / Note-taking
- Allows the SNA to sit away from the student while supporting.
- Allows multiple students to be supported simultaneously.

The Result:

Student independence & confidence

By embedding Google Workspace into our AEN provision, we move beyond simple accommodation towards true inclusion.

Ava and Emma

5th Year

Use in the mini company

- Google Docs for planning
- Google Sheets for finance
- Google Forms for customer feedback and taking orders

Use in the musical

- Gmail for spreading word
- Docs for script
- Google Meet to keep in contact with musical producers

Use in class projects

Slides and Docs

The Chemistry of cosmetics

Hidden Figures Review

By Emma Bohane

Digital Portfolios in TY

We used Google Sites to create a Digital Portfolio in TY.

We had a DML class every week where we learned to create our site and got time to update it.

We uploaded examples of work from all of our subjects and modules.

We included reflections on all our activities.

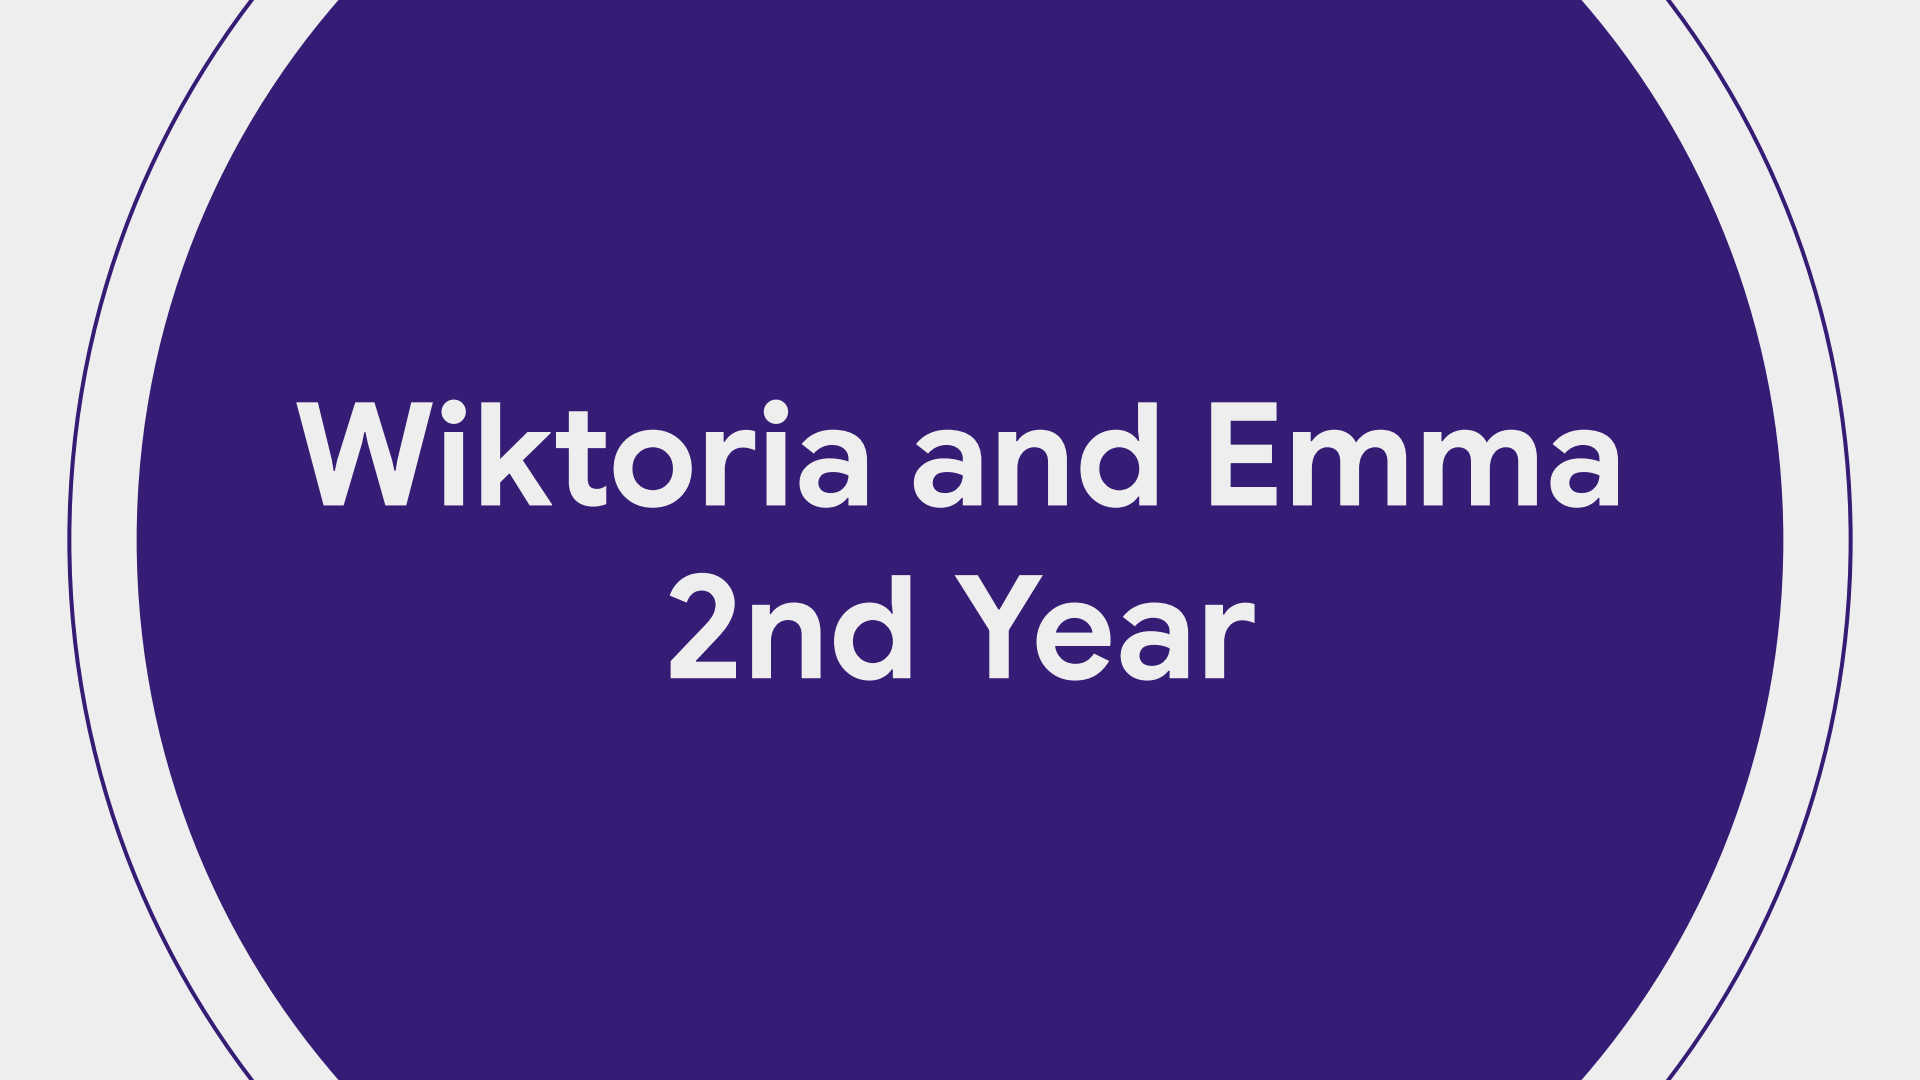

At the end of the year, our site formed an important part of our assessment.

We were interviewed by teachers who went through our site and asked about the different things we had done in TY.

Some students in TY used Google Sites to make a website for their mini company products.

In summary, Google Sites is a great way to showcase your work and it is really easy to use.

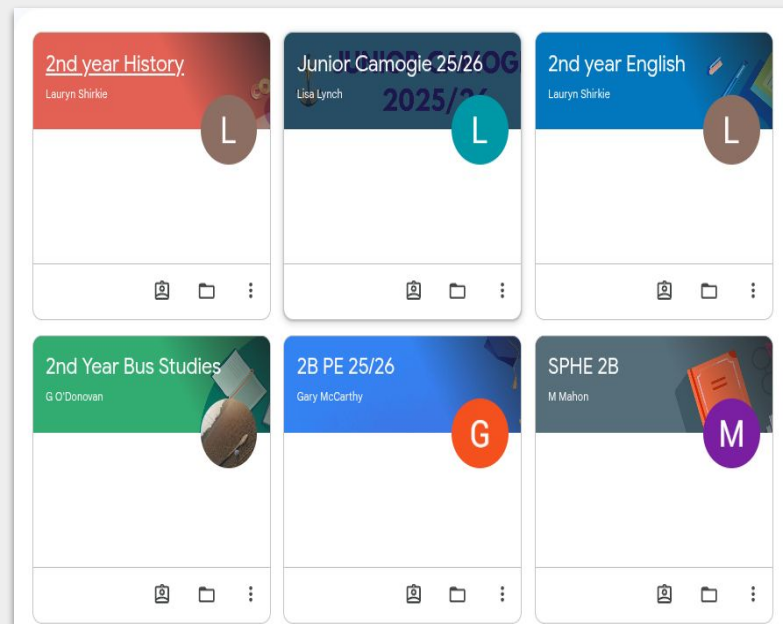

Wiktorija and Emma
2nd Year

Google in my everyday life at school

I use Google platforms everyday in school. For example, a teacher might put up notes she was using on Google Classroom so that students that are absent or didn't finish taking down notes can catch up.

Teachers also share material such as videos and links to relevant websites.

It is easy to find all your notes in Google Classroom because everything is organised by topic.

We use Google Classroom to complete assignments and submit work such as first drafts of our English essays.

We can ask questions on Google Classroom in the stream.

Glaciation

Cirque

Coastal Processes

Beach quiz

Beach - A landform of deposition

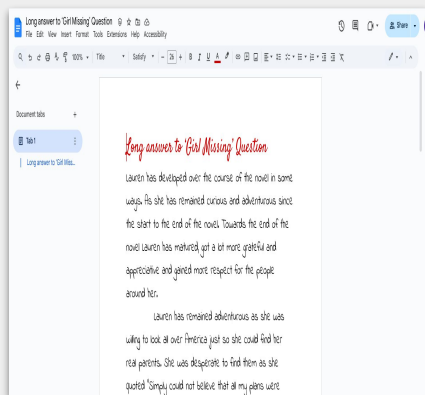

Sea Cliff - A landform of erosion

Google Slides & Google Docs

Google Docs

With google Docs it has been easy to take down quick and efficient notes for class, and helping with making online study notes.

Google Slides

With Google Slides it has been easy and fun to make presentations for slideshows and assignments. It is also a way for teachers to make and show the class notes.

My Transition to St. Mary's using Google

My transition to St. Mary's has been a lot smoother because of Google. Before I even started St. Marys, they sent out a Google Form "Getting to know you". From Easter of 6th class we & our parents received regular emails as part of the Transition to St. Mary's Programme

Extra-curriculars and Google

There are lots of extra curricular activities available in St. Mary's. Google Classroom helps with knowing what's going on sports wise for example we use Google Classroom to get knowledge on when there are matches, information about the proper gear to bring and the days trainings are on. It makes communication much easier.

Lucy and Niamh
1st Year

Chromebooks

I love having a Chromebook for school use.

They make learning very fun.

They are very easy to use.

We learn how to use them in Digital Media Literacy Class.

On one of our first days in school, we were given our Chromebooks.

The Wifi was already connected and all the apps we would need were downloaded for us.

Now all our books are available as ebooks as well and we have a choice which to use.

Class Tools

Teachers use this to give us classwork.

They give us a set amount of time to get the work done and give us resources to help.

We complete worksheets and Google Form quizzes.

The teacher sometimes gives us hints in Google Chat if we are finding something difficult.

No one else can see this which everyone likes!

Some girls in our class who do not speak English as their first language, can turn on live captions in their chosen language.

They find this very useful.

Google Vids

Our Transition Year students have started using Google Vids in project work this year. We asked them to make a short video to end our presentation.

Thank you all for listening!

POOR AESTHETIC

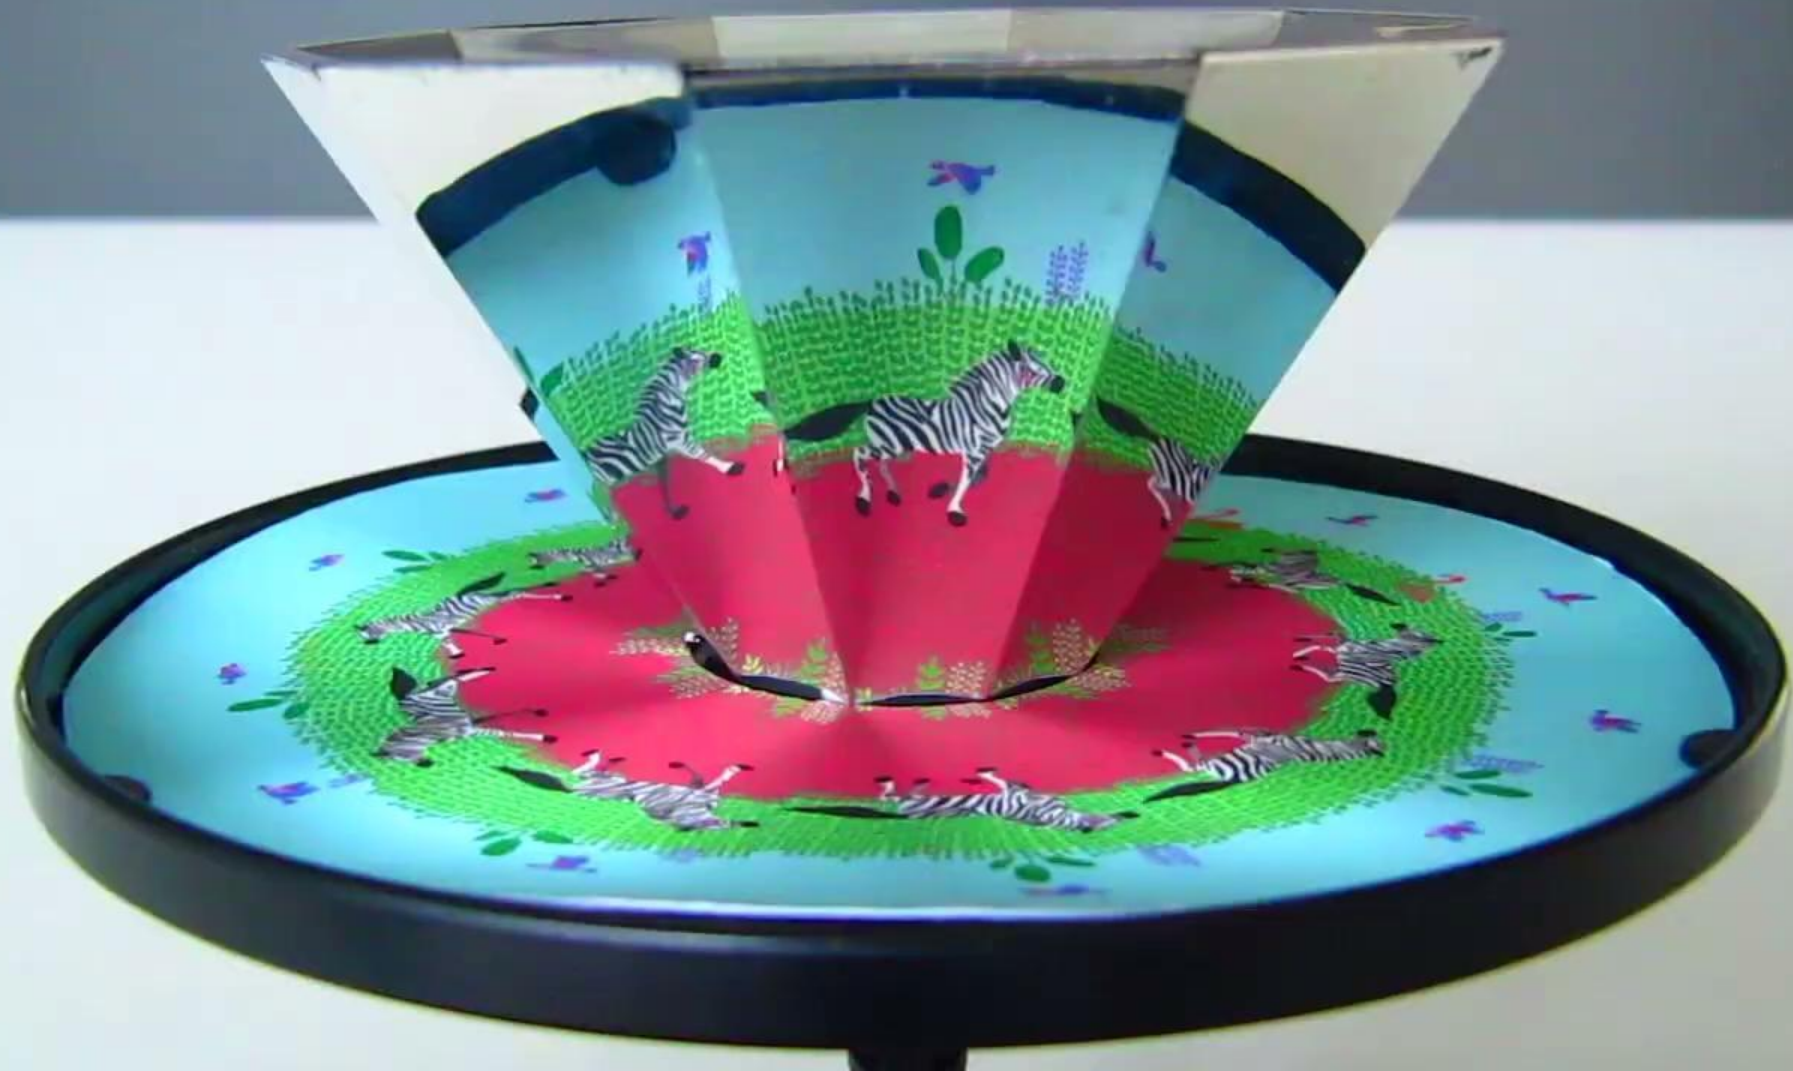

NEGATIVE ASSOCIATIONS

A woman with long brown hair, wearing a bright yellow jacket and a red skirt, is sitting in a wheelchair. The wheelchair has a large, colorful, abstract design on its rear wheel, featuring shades of pink, red, and yellow. She is positioned in front of a wall covered in vibrant graffiti, including large, bold letters and colorful patterns. The scene is set on a paved sidewalk. The text "izzy: WHEELS" is overlaid on the image in a white, stylized font.

Future of the Chromebook classroom

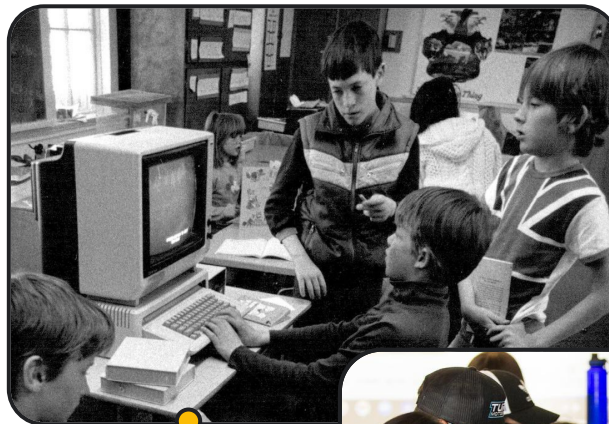

Andy Russell

Group Product Manager
ChromeOS EDU

Education has evolved from the early days of EdTech

Computer Labs *Classroom Laptops*

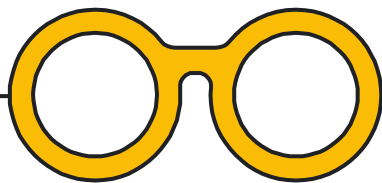

Our teaching tools need to evolve too

~~Sage on the Stage~~ *Guide on the Side*

~~Lecture Halls~~ *Production Studios*

~~Independent Study~~ *Group Learning*

With Chromebook Plus, *teachers can move freely around their classrooms to engage with students*

Chromebooks are **portable and lightweight** with dynamic features like touch and stylus support for use on the go

.....

Devices keep a **battery charged** for the school day – no need to interrupt class or tasks to recharge

.....

Educators can encourage student engagement by **sharing content to students' Chromebook screens** and providing **live captioning**

.....

Automatic updates happen in the background, so Chromebooks get better as students and educators keep working

~~Digital Whiteboards~~

↳ *Classroom Hubs*

The ~14 million interactive flat panel displays and smart boards¹ in classrooms globally easily become outdated, tough to manage, or incompatible with other classroom tech.

Modernize your tech and empower collaboration with **Chromebox OPS**, a plug-in device that maximizes your existing interactive flat panel displays (IFPDs) and smart board investments.

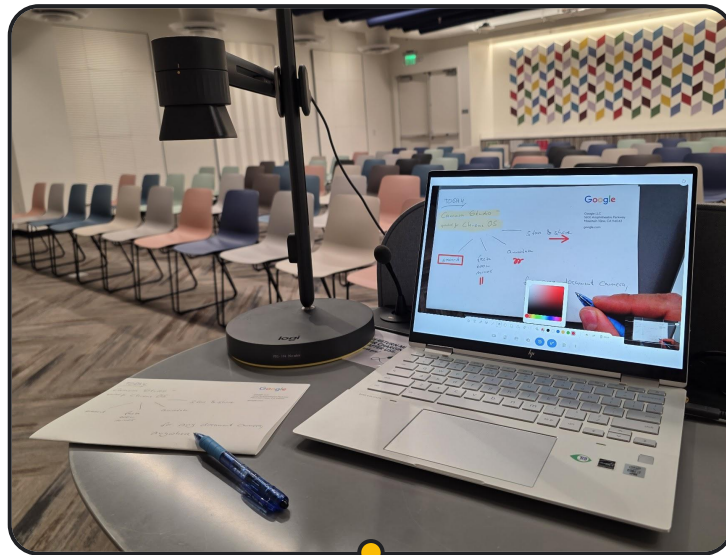

Camera Studio

Use a document camera to project paper worksheets and handwritten math problems in front of the whole class. Most document cameras come with companion apps, but previously many were incompatible with Chromebooks.

Now, there's a **universal document camera app, Camera Studio**, that will work with most hardware – use this app to **present, annotate, freeze, zoom, and mirror** your document camera onto your Chromebook or Chromebox OPS.

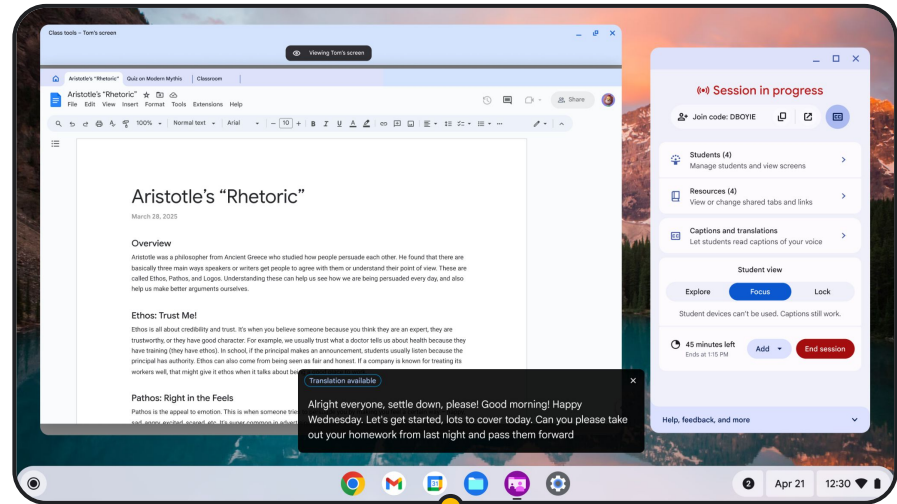

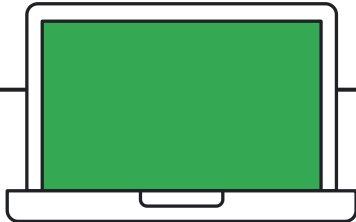

Camera Studio will be available in the Google for Education App Hub. Document cameras can be found in the Works with Chromebook program; some even go beyond documents and can record people and objects, like a science experiment.

Class Tools

Keep students on task with a new set of real-time control and student engagement features for managed Chromebooks, available with Google Workspace for Education Plus.

Class Tools *supercharges* your classroom

Teachers

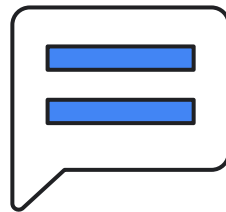

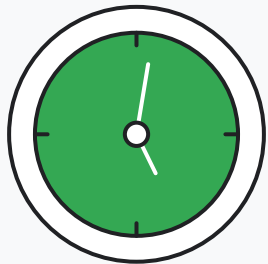

- ✓ Jump start lessons by sending content to student screens
- ✓ Monitor screens to ensure students are staying on task
- ✓ Share a student's screen to celebrate great work

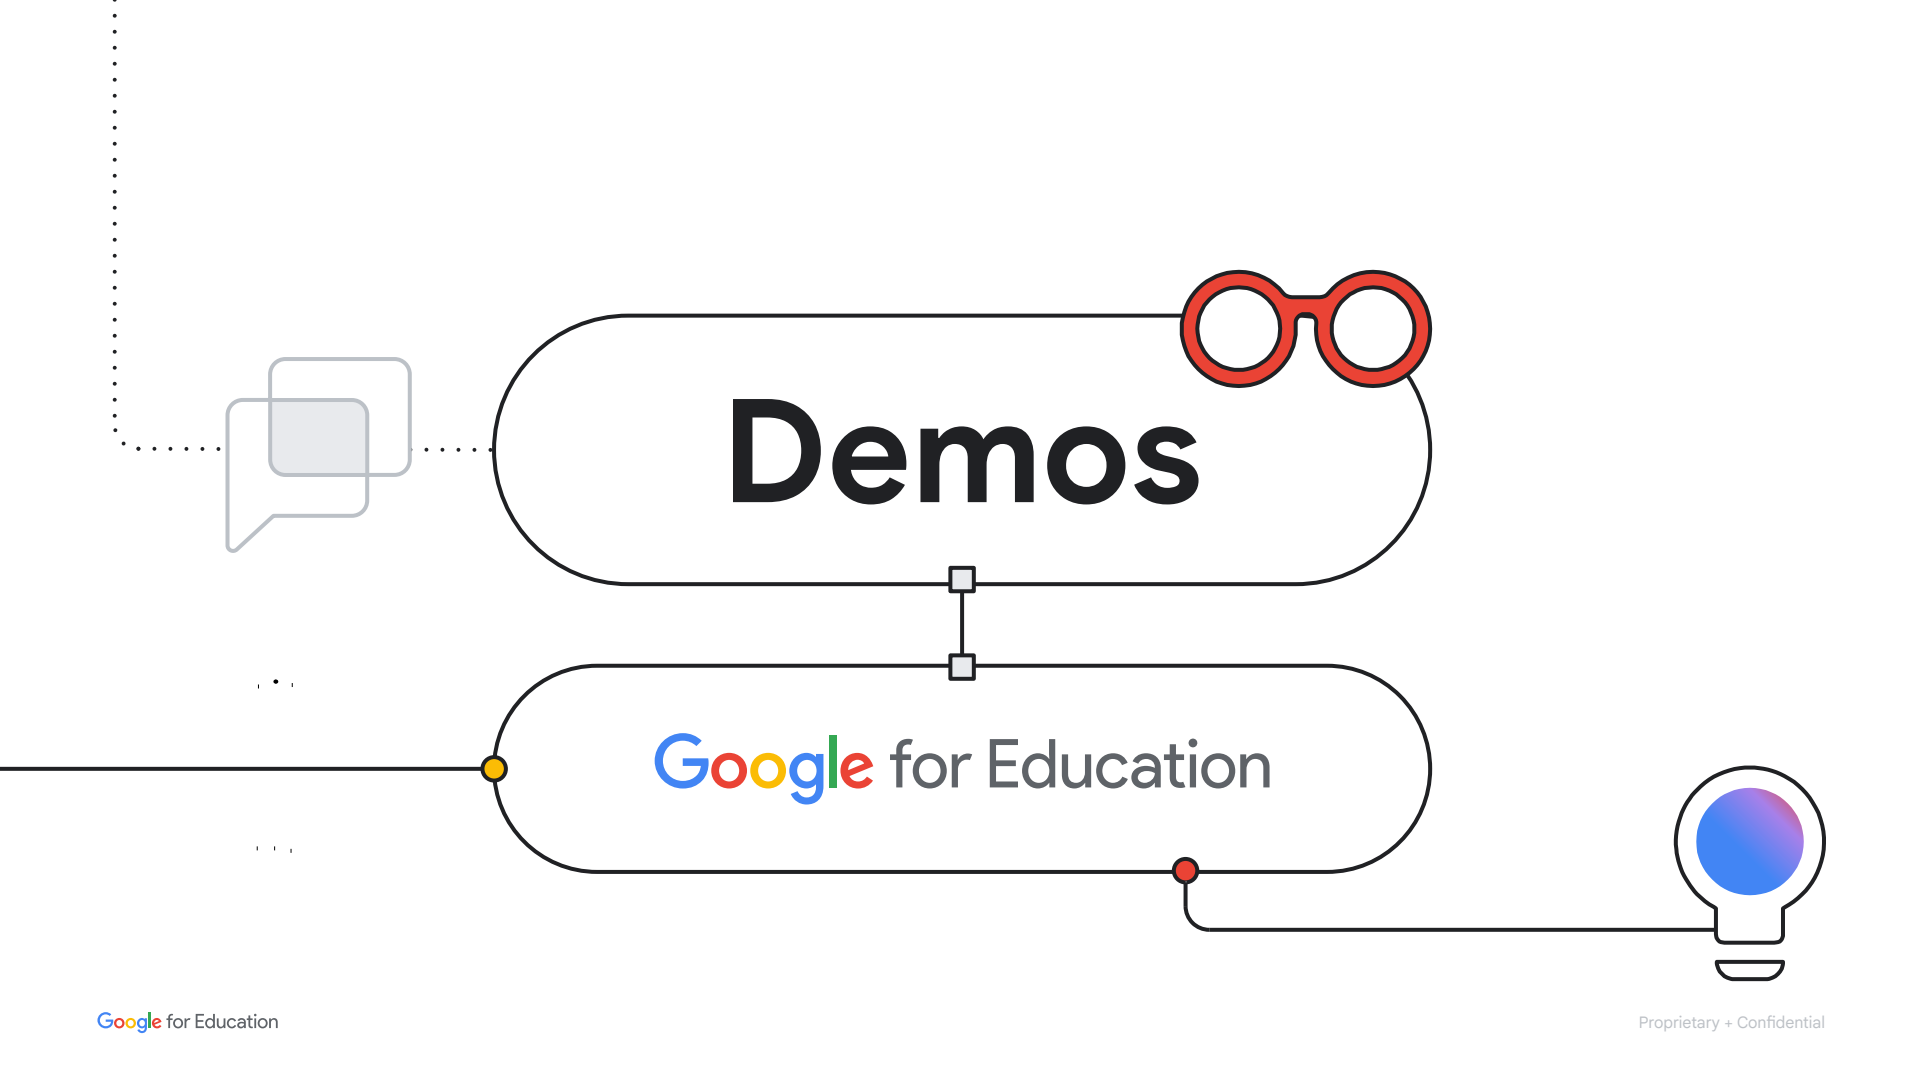

Students

- ✓ Follow along with captions of live instruction
- ✓ Learn in your primary language
- ✓ Stay focused on the instructional resources

Did you know that...
40% of students
are learning in a
secondary language?

Class Tools
real-time translates lessons into
students' preferred languages
right on their Chromebooks.

The diagram features a central horizontal line with several decorative elements. On the left, a dotted line leads to two overlapping speech bubbles. In the middle, a vertical line with two small squares connects the top and bottom rounded rectangles. On the right, a line leads to a lightbulb with a blue and purple gradient. The word "Demos" is inside the top rounded rectangle, and "Google for Education" is inside the bottom one.

- ISO 9001 (2024 Q4)

**Your AI-powered
assistant for education**

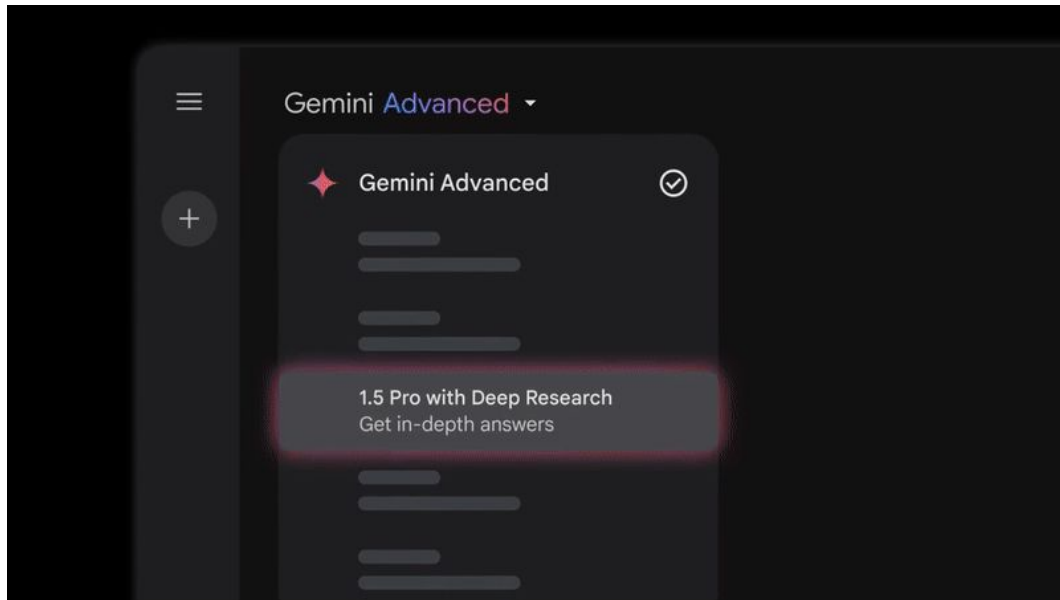

Anatomy of the Gemini app

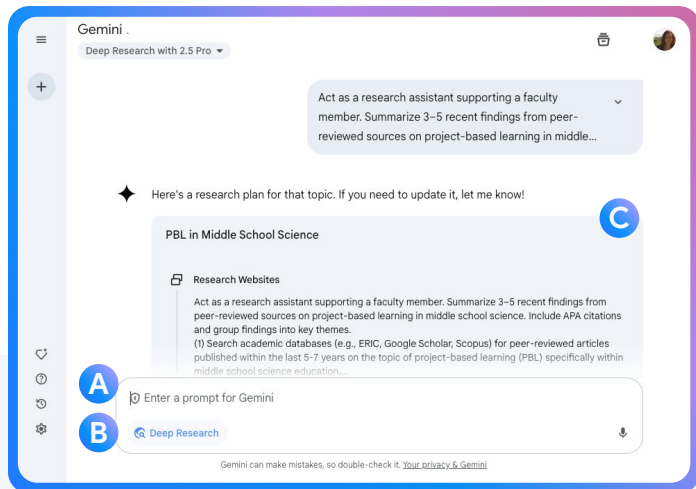

Deep Research:

Generate in-depth reports in minutes

Get up to speed on just about anything with Deep Research, an agentic feature in Gemini that can **automatically search up to hundreds of websites** on your behalf, think through its findings, and create insightful multipage reports with citations.

How Deep Research works

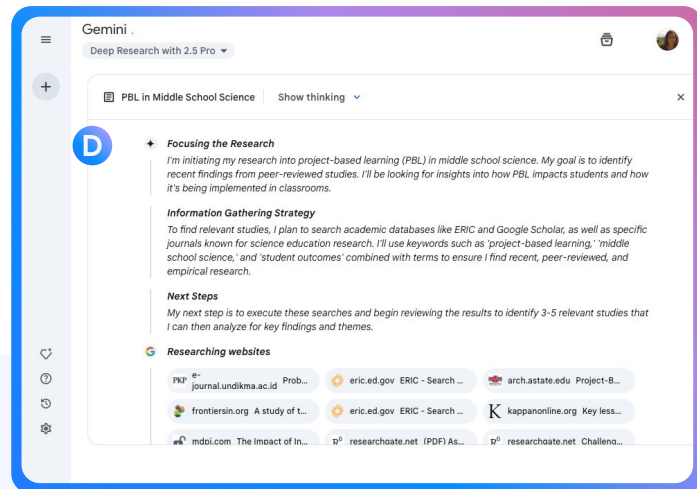

A **Initiate your request.** Submit your prompt in Gemini.

B **Select Deep Research mode.** You can do this in two ways:

- Choose “Deep Research” from the options at the bottom of the chat box.
- Alternatively, select “Deep Research” using the model picker located under the Gemini logo at the top of the interface.

C **Review and refine the proposed research plan.** Gemini will develop and present a draft research plan. Take this opportunity to review it and make any edits or refinements to better suit your needs (for example, ask to “add a section on implementation costs” or “include international examples”).

D **Start the research and observe execution.** Click “Start research” to begin. You can then watch in real time as Deep Research executes the plan and gathers information.

E **Observe the comprehensive report.** After the research is complete, Gemini will provide you with a detailed report.

Tip: After your report is complete, you can ask Gemini follow-up questions about it. These questions do not count toward your monthly limit of Deep Research reports.

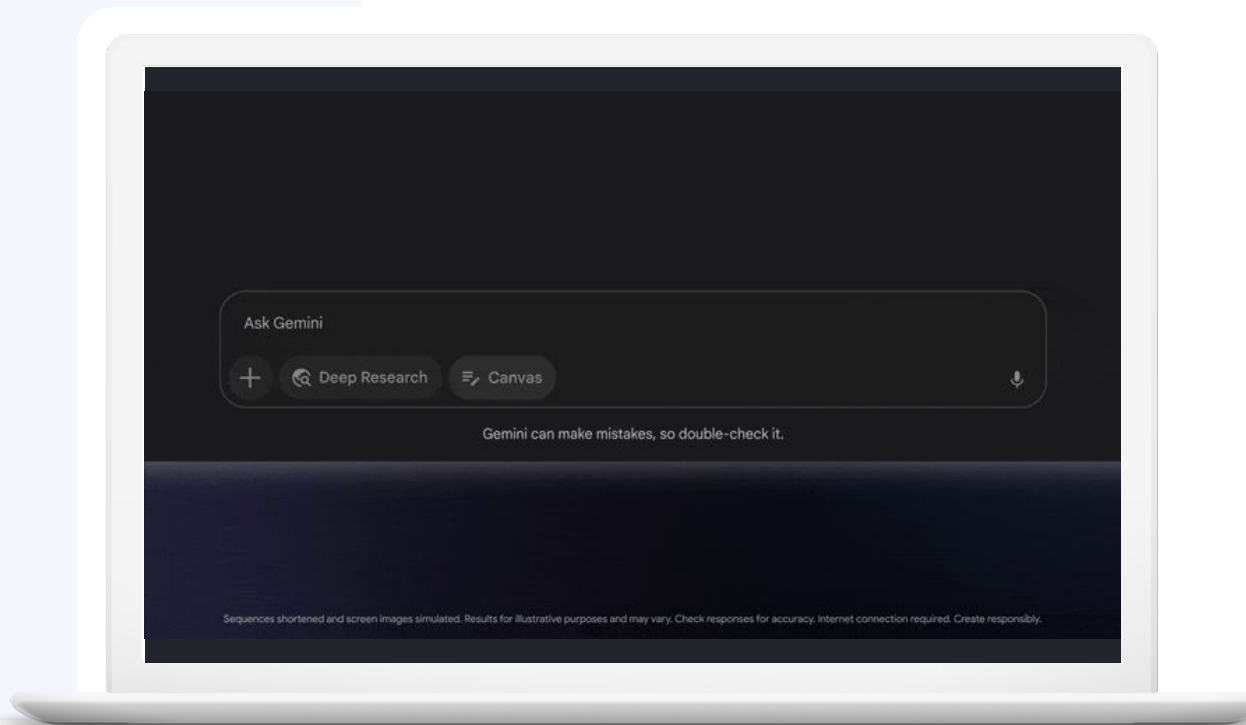

Gemini Canvas:

Create, code, and collaborate with Gemini in one space

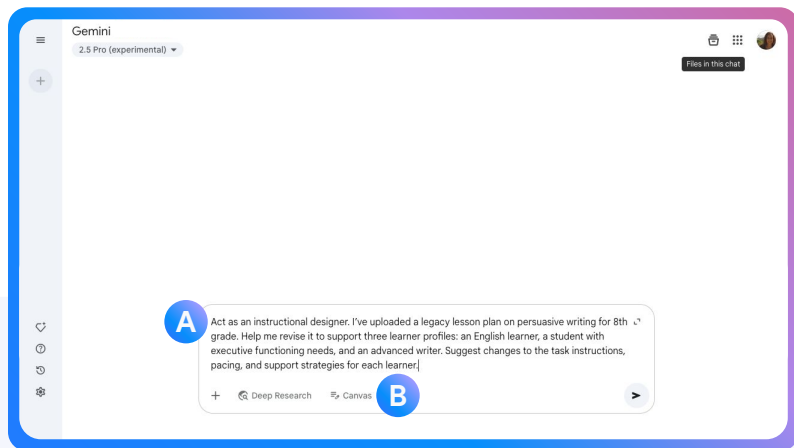

Gemini Canvas is an interactive workspace for turning your ideas into polished creations. Transform your prompts into an editable canvas for creating lessons, coding projects, or building resources – and evolve your thinking visually in real time. Your content instantly updates and you get AI-powered suggestions to level up your work. This space is designed for rapid iteration, allowing you to easily refine and develop your concepts.

Use Canvas to:

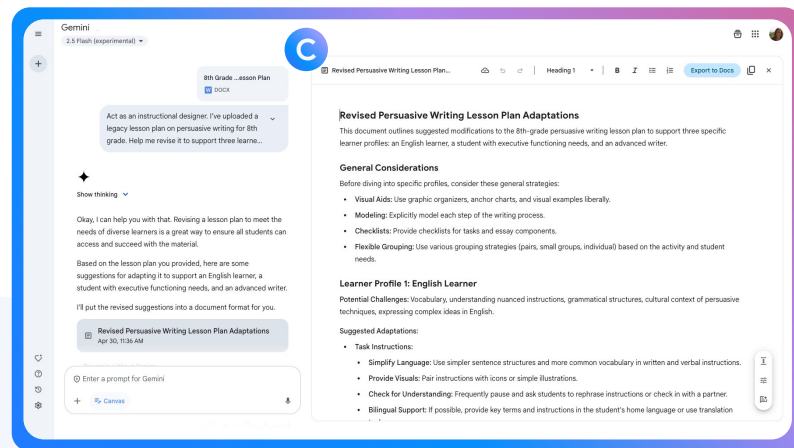

- Draft editable documents, lesson plans, or study guides in real time
- Build and test working code that can be exported into Google Colab
- Edit copy tone, length, formatting, and content
- Export to Docs, then copy, or present what you've built instantly

How Gemini Canvas works

- A** Enter your prompt in the Gemini chat box.
- B** Select **“Canvas”** from the options at the bottom of the chat box.

- C** Gemini opens Canvas in a pane separate from your chat. The Canvas output is fully editable – you can update it yourself or ask Gemini to refine and revise the content. When you're ready, just click **“Export to Docs”** to continue working or share.

Create an image of a grumpy teenager who is good at coding sitting at a computer but not really wanting to do anything

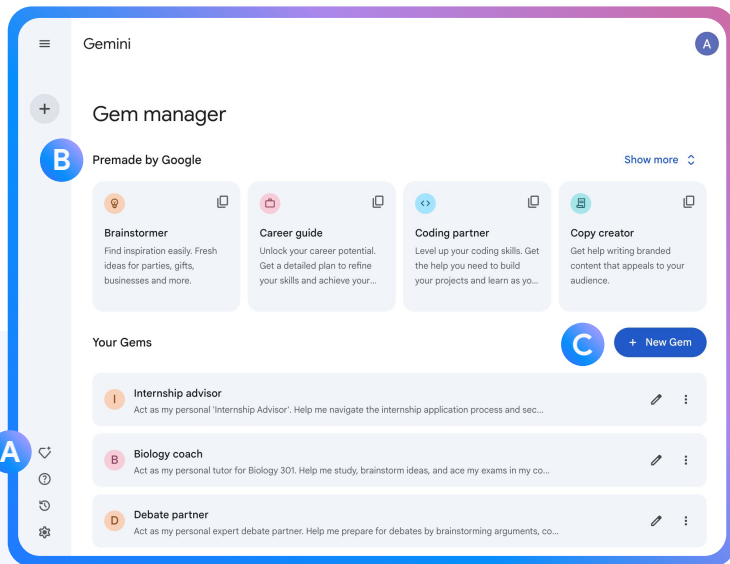

Personalize Gemini with Gems: custom AI experts for any topic

A Gem is a customized version of Gemini that you can create with specific instructions to act like an expert on a certain topic or follow particular guidelines every time you use it.

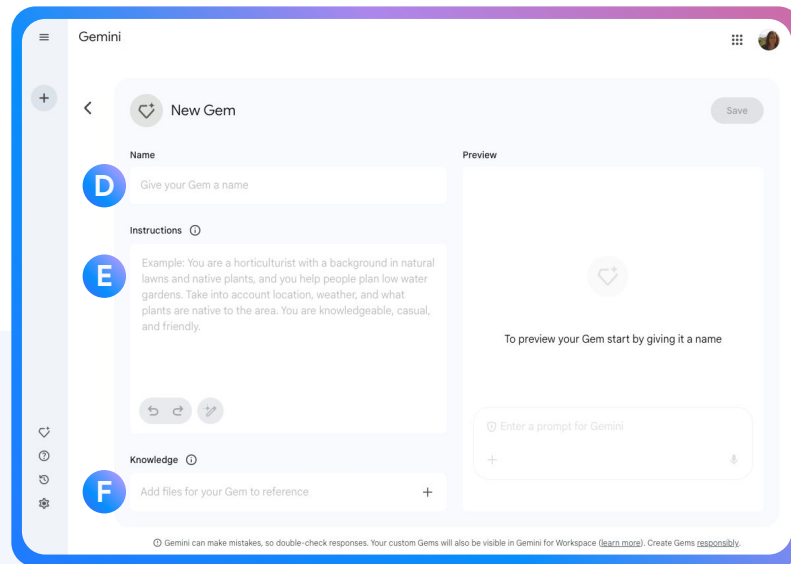

You can get started with Google's premade Gems like Learning coach, Career guide, and Brainstormer.

Leverage premade Gems or create your own

- A** Gem manager – your one-stop shop for all your Gems
- B** Get started easily with premade Gems by Google
- C** Create a new Gem built to tackle your specific needs

- D** Give your new, personalized Gem a name
- E** Provide detailed instructions to make your Gem work for you
- F** Optional: Upload files to give more context and get more helpful responses

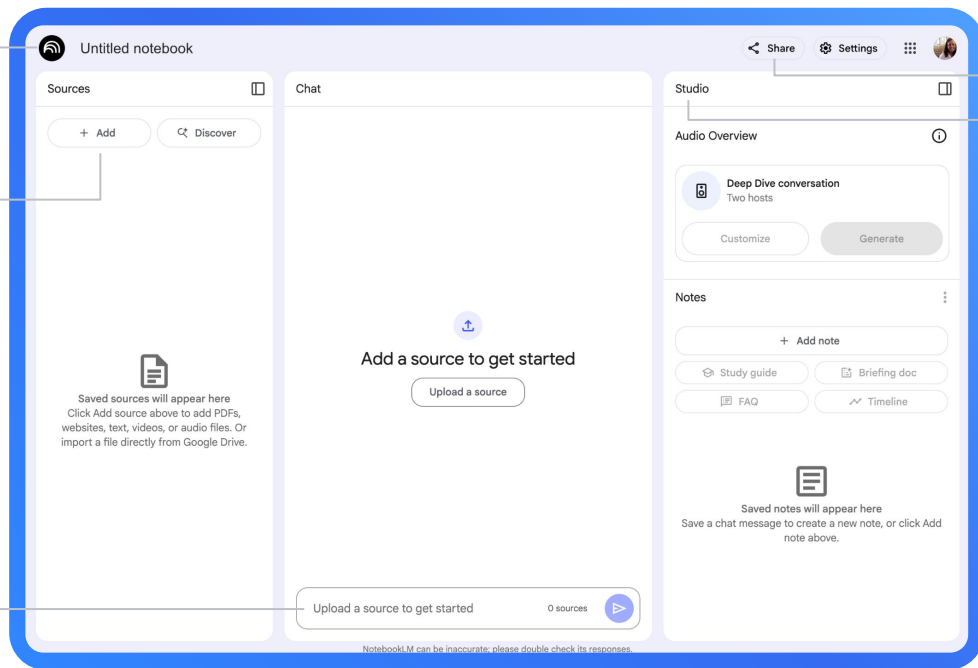

Anatomy of NotebookLM

Give your notebook a name

Upload your sources

Ask questions of your sources

(Optional) Share your notebook with colleagues or students

(Optional) In the Studio panel, generate a podcast-style audio overview, study guide, FAQ doc, and more

Listen and learn on the go with audio overviews

Audio overviews turn your sources into a **podcast-style summary**, voiced by two AI hosts. It's a fast, engaging way to absorb your materials, and it's perfect for multitasking or auditory learning.

With just one click, NotebookLM summarizes your notes, lesson plans, documents, research, articles, website links, or videos into a conversational audio file. And with the **Customize** feature, you can guide the hosts to focus on what's most important to you.

Studio

Audio Overview

Foundations of Physics: An 8-Week Unit Plan

07:23 / 07:23 • English

Interactive mode

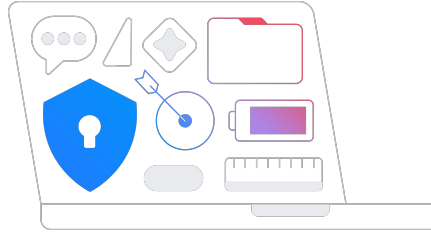

BETA

Turn your sources into engaging visual explainers with Video Overviews

Video overviews transform your sources into a quick, illustrated video summary with AI-powered hosts. It's a dynamic way to visualize your content and is ideal for visual learners or for quickly getting the gist of a long document.

With a single click, NotebookLM can now create a video from your lesson plans, research, articles, or other sources.
