

Professional Google Workspace Administrator

[Click to register](#)

A Professional Google Workspace Administrator transforms business objectives into tangible Google Workspace configurations, policies, and security practices as they relate to users, content, and integrations. Through their understanding of their organization's infrastructure, Google Workspace Administrators let people work together, communicate, and access data in a secure and efficient manner.

Recommended candidate:

- Has understanding fundamentals of Google Cloud
- Has experience deploying cloud applications and monitoring operations
- Has experience managing cloud enterprise solutions
