

Deliver an upgraded smart home experience with Gemini

Nest Aware is now Google Home Premium – a new subscription that brings Gemini into the home, unlocking more AI help, intelligent video history, and smarter automations across your customer’s smart home devices – all accessible in the Google Home app.^{1,2}

Gemini for Home, a more helpful voice assistant

Customers can just say “Hey Google” to chat naturally. They can also interrupt, ask follow-up questions, or change topics anytime.^{1,2}

Searchable video history

Gemini helps customers understand what’s happening at home. They can ask things like “What happened to the vase in the living room?” and get a detailed description in the Google Home app.^{1,2}

Effortless automations

Help customers create home automations based on the products you’re installing and the ones they already own. With Gemini, they can just describe what they want to happen – like “Make the home safer at night” – and it will lock the doors and adjust the lights.^{1,3}

Event history

With Google Home Premium, customers can see 30 days of event-based video history from their Nest Cam or Doorbell. The Advanced plan extends this to 60 days.⁴

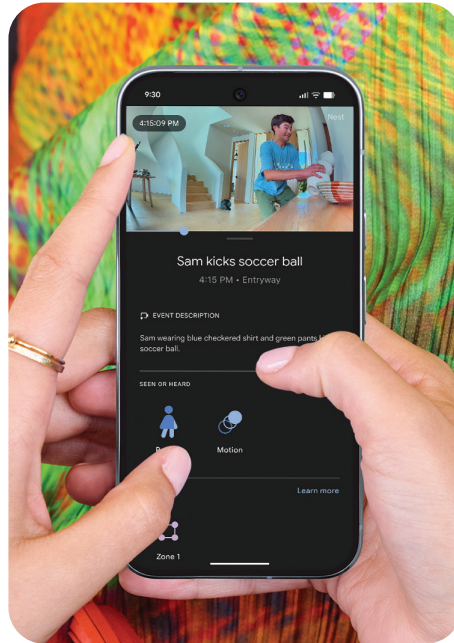

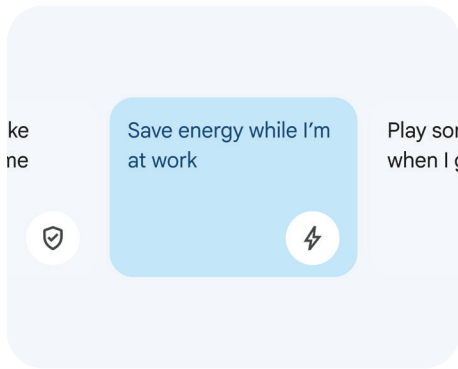

Subscription options

Features		Standard \$10/Month	Advanced \$20/Month
30 days of event-based recording		✓	✓
60 days of event-based recording		-	✓

Whole-home history – viewable activity across all devices	New	✓	✓

¹ Requires Google Home app, Wi-Fi, and internet connection. Features subject to change; available in select countries and languages. Gemini features work independently of Gemini apps. Check responses for accuracy; results may vary. ² Early access to the Gemini for Home voice assistant is available to select, existing US users with compatible speakers and displays beginning 10/28, gradually rolling out to all users with compatible devices in participating Google Home markets by early 2026. ³ Home automations may require additional enrollment and setup, and depend on working internet, Wi-Fi and service availability for compatible smart home devices (sold separately) included in the automations. ⁴ Some features, including mobile and browser notifications, remote control, video recording, video streaming and video history, require the Google Home app and working internet and Wi-Fi.

Scale your business with Google Home

Google Home Premium with Gemini offers an intuitive and user-friendly experience that makes the smart home accessible to more customers, helping you open new revenue streams for your business.

How Google Home Premium works with Nest Cams and the Nest Doorbell

AI-powered alerts that make sense

Instead of just "Motion detected," your customers will get more information – such as "The dog is digging in the garden."¹

Find footage fast

Customers can now search their camera history using natural language. Instead of searching through hours of video, they can just ask, "Did the FedEx truck stop by today?"²

Whole-home solutions

With event video history across devices, customers can catch up on all the moments they missed, from the front door to the backyard.

Enhanced security

You can help customers automate lights and speakers to act as an intruder alarm – flashing and sounding alerts when unusual activity is detected.^{2,3}
