

HVAC System Health Monitor helps your customers contact you when they need you most.

Supercharge your business retention with Nest thermostats.

HVAC System Health Monitor automatically detects issues with your customers' systems.

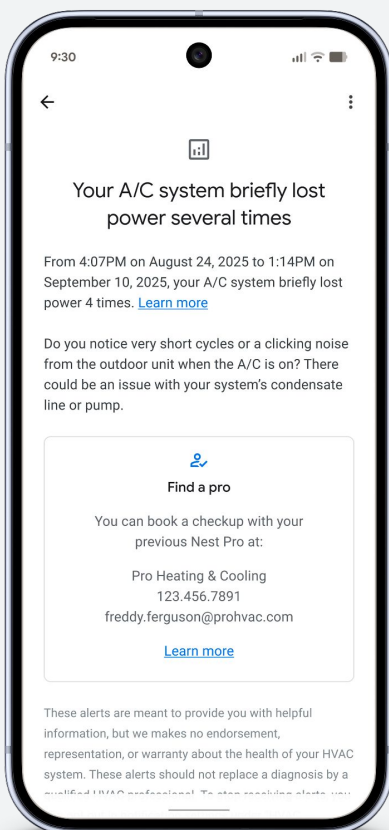

All Nest thermostats monitor HVAC system performance and can send alerts about potential issues.¹

Your contact details are included in the alert.

The alert uses your Nest Pro ID to help your customers contact you, right from the app or the device they're already using.

Provide a suitable repair.

Depending on the issue, you can provide the required maintenance or repair and invoice the customer directly, whether the job is large or small.

¹ List of eligible HVAC systems is available at g.co/nest/hvac-monitoring. Alerts can notify users of a potential issue with an eligible HVAC system. They're meant to provide helpful information, not an endorsement, representation, or warranty of any kind about the health of an HVAC system. Alerts aren't intended to replace a diagnosis by a qualified HVAC professional.

Start getting HVAC repair requests from your customers.

All Nest thermostats include HVAC System Health Monitor.
