

Know more. On any door.

Meet the new battery-powered Nest Doorbell. It has built-in intelligent alerts for important activity. And with wired and wire-free options, it's the only doorbell you'll need on your truck.

Designed for any door.

It can be wired to a house chime¹ or installed wire-free, so you can offer a Nest doorbell at any job.

Know what's happening, and where.

It knows the difference between people, packages, animals, and vehicles, and sends relevant alerts.² With Activity Zones, users can choose to get alerts only for specific areas.

Better together.

Customers can see who's at the door on Nest Hub, or hear visitor announcements on Nest Mini or another Nest speaker or display (all sold separately) when someone rings the doorbell. No wired chime required.

Go back in time.

With up to 3 hours of free event video history, customers can see what they missed. With a Nest Aware Plus subscription, they'll get up to 60 days of event video history.⁴

Wi-Fi problems? Not a problem.

If the Wi-Fi goes down or there's a power outage, the Nest Doorbell can automatically store up to 1 hour of recorded events in its local memory.³

Protects their privacy.

The Nest Doorbell uses encrypted video, two-step verification, and enhanced security through a Google Account to help protect users' privacy.

Pro-exclusive extended warranty.

Customers receive an exclusive three-year warranty with Nest Pro installation.

Helpful accessories.

Add a vertical or horizontal wedge to get the perfect angle, or a power adapter for homes with no doorbell wiring.⁴
