

## Know more. No charging.

Meet the new 2nd-gen wired Nest Doorbell. With built-in intelligent alerts and always-on power, your customers can know what's happening at their front door 24/7.<sup>1</sup> And it's designed to replace a wired doorbell and requires a transformer, so they can rely on you for an easy, worry-free installation.

### See what's happening at the door.

It knows the difference between a person, package, animal, and vehicle and sends alerts – no subscription required.<sup>1</sup>

### Peace of mind with 24/7 live view.

There's no need to recharge batteries, so customers can see activity at their front door around the clock.<sup>1</sup>

### More video history included in the Google Home app.

With 3 hours of event video history included, it's easy for people to see what they missed.<sup>1</sup> They can also watch 2-second previews and 5-minute clips of important activity.

### Cover it all with continuous video recording.

With a Nest Aware Plus subscription (sold separately), the Nest Doorbell can record what's happening at the door 24/7 for up to 10 days.<sup>4</sup>

### Wi-Fi problems? Not a problem.

If Wi-Fi goes out, it automatically records events for up to an hour.<sup>3</sup>

### Works with compatible doorbell transformers.

It requires a 16–24VAC, 10–40VA rated transformer and chime (both sold separately).<sup>2</sup> Keep a compatible transformer on your truck for simple installation.

### Better together.

Customers can see who's at the door on Nest Hub, or hear visitor announcements on Nest Mini or another compatible speaker or display (all sold separately).

### See more at the door, day or night.

HDR helps people see details in sunlight or shadows, while night vision helps them see in the dark.

### Exclusive pro warranty.

Your customers can get an extended 3-year warranty with professional installation.
