

Smarter, faster Wi-Fi that powers your connected home business.

Meet Nest Wifi Pro. It's made for advanced Wi-Fi 6E, which is up to 2x faster than a Wi-Fi 6 mesh system. So customers can get more out of their devices – like a stronger live connection to Nest Doorbells and Nest Cams and faster streaming with Chromecast.^{1,2,3}

More bands. More speed.

Deliver faster speeds to your customers with 2.4 GHz, 5 GHz, and the new 6 GHz band.⁴ The three separate bands help reduce interference to provide a reliable connection for more devices.

Made for the future of Wi-Fi.

Nest Wifi Pro uses the latest, most advanced Wi-Fi 6E technology.¹ So it isn't compatible with previous generations of Google Wifi or Nest Wifi.

Coverage for the entire home.

Each router provides up to 2200 square feet of fast, reliable Wi-Fi.⁵ You can customize any setup with additional routers to add coverage.

Built with digital safety in mind.

Nest Wifi Pro has automatic updates and secure booting to help protect your customers' networks from hacks and unauthorized software. And they can see every device connected to their network in the Google Home app.⁴

Smarter network. Smoother connections.

It automatically manages network performance and activity to prioritize things like video calls. And it can monitor and diagnose common issues on its own.⁴

Made for Matter. So devices work together.

Matter (coming soon)⁶ is the new universal standard for smart home devices. It will connect and control all your customers' Matter devices, so their smart homes will be easier to build, faster to set up, and more responsive and reliable.

Buy now at your local stocking distributor.

Don't miss all the benefits of being a Nest Pro, including exclusive pro products, VIP support and training, and amazing rewards.

¹A Wi-Fi 6E client device is needed to directly access the 6 GHz band, which is limited to indoor use only. ²Up to 2x faster as compared to a Wi-Fi 6 router that supports 80 MHz channels. Wi-Fi 6E specifications are based on use of a Wi-Fi 6 or later generation client device that supports 160 MHz channels. Actual speeds depend on your internet service provider, network conditions, connected device, local regulations and environmental factors. ³Nest Doorbell and Chromecast with Google TV sold separately. ⁴Actual speeds depend on your internet service provider, network conditions, connected device, local regulations and environmental factors. ⁵Router placement and home size, materials and layout can affect how Wi-Fi signal travels. Poor placement and larger homes or homes with thicker walls or long, narrow layouts may need extra Wi-Fi routers for full coverage. Strength and speed of signal will also depend on your internet provider. More than 5 routers in a network may result in degraded performance and is not recommended. ⁶Check g.co/nest/matternow for availability of Matter's functionality on Nest Wifi Pro.
