

How Nest thermostats can make heat pumps even better.

Nest thermostats have improved intelligent heat pump control features that help customers save energy.¹ With the Inflation Reduction Act and the growing popularity of electrification in the HVAC industry, demand and incentives for heat pumps will continue to grow.

Optimize your customer's system.

Nest thermostats use information from recent heating or cooling cycles to actively adjust how much auxiliary heat is used, keep the system running efficiently, and keep the home from overheating.¹

Compatible with most heat pumps.

The Nest Learning Thermostat works with standard 24V controlled heat pumps up to 4 heat / 2 cool. And both the Nest Thermostat and the Nest Thermostat E work with standard 24V controlled heat pumps up to 2 heat / 1 cool.²

Help protect the heat pump.

You can adjust the compressor lockout temperature to switch to auxiliary heat during extreme outdoor temperatures. And HVAC System Health Monitor alerts customers about system issues – and makes it easy to book a repair with their Nest Pro.³

Balance comfort and control.

Help your customers prioritize comfort, savings, or a combination of both with Heat Pump Balance. Or turn off this feature and manually set the auxiliary and compressor lockout temperatures.

Don't miss all the benefits of being a Nest Pro, including exclusive pro products, VIP support and training, and amazing rewards.⁴ Sign up at g.co/nestpro

¹Not available on the 1st or 2nd generation Nest Learning Thermostat. ²Nest thermostats are not compatible with heat pumps that require a special closed protocol communicating thermostat. ³List of eligible HVAC systems is available at g.co/nest/hvac-monitoring. Alerts can notify users of a potential issue with an eligible HVAC system. They're meant to provide helpful information, not an endorsement, representation, or warranty of any kind about the health of an HVAC system. HVAC System Health Monitor is only available to registered Nest Pros. A person with legal signing authority for the Pro company can register for a Pro ID at g.co/nestpro. HVAC system alerts will surface the information of a Pro company if the Pro company is enrolled in HVAC System Health Monitor and a Pro ID is entered on the thermostat. ⁴Reward items may vary by region. Availability of individual rewards items not guaranteed. Nest Pro Rewards available to Nest Pros in the US and Canada (excluding Quebec).
