

Expand your business with Google Nest.

With a full ecosystem of products designed to work together, the Nest Pro program can help you boost your bottom line and connect to customers all year round.

Heat up your business with two great thermostats, in premium and budget-friendly options.

Build long-term customer relationships with HVAC System Health Monitor, included on all Nest thermostats.¹

Pair a Nest thermostat with your HVAC systems to help you stand out from the crowd.

Become a Nest Pro at g.co/nestpro

¹ List of eligible HVAC systems is available at g.co/nest/hvac-monitoring. Alerts can notify users of a potential issue with an eligible HVAC system. They're meant to provide helpful information, not an endorsement, representation, or warranty of any kind about the health of an HVAC system. HVAC System Health Monitor is only available to registered Nest Pros. A person with legal signing authority for the Pro company can register for a Pro ID at g.co/nestpro. HVAC system alerts will surface the information of a Pro company if the Pro company is enrolled in HVAC System Health Monitor and a Pro ID is entered on the thermostat.

Nest Learning Thermostat (4th gen)

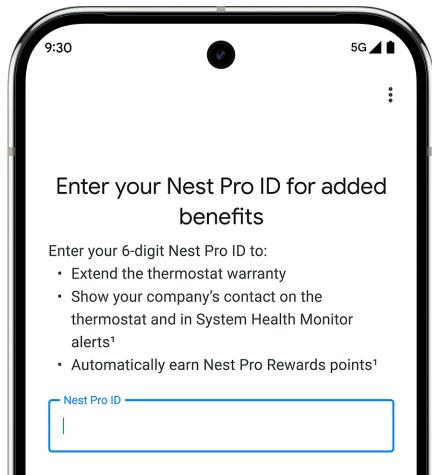

Nest Thermostat

Energy-saving features²	Smart Schedule Home/Away Routines Adaptive Eco Adaptive Comfort Natural heating and cooling Smart Ventilation ³ Seasonal Savings Heat Pump Balance Humidity Helper ⁴ Energy Shift ⁵	Savings Finder Home/Away Routines Eco Temps - - - Seasonal Savings Heat Pump Balance Cool to Dry -
Design	Available in multiple colors High-res color display Dynamic Farsight	Available in multiple colors Mirrored display

¹Requires compatible HVAC ventilation system and Google Home app. ²Google Home app required for most energy saving features. ³Smart Ventilation requires compatible HVAC ventilation system. ⁴Humidity Helper requires air conditioner, heat pump, or central humidifier or dehumidifier. ⁵Adjustments are primarily designed to shift the timing of electricity usage from your heating and cooling, but these shifts typically result in net energy savings.

Ditch the stickers. Not the leads.

HVAC System Health Monitor (previously HVAC monitoring) is a popular feature with customers – and a big opportunity for your business.¹ It looks out for issues and sends customers an alert with your contact info when something might be wrong.² And it's more effective than a service sticker because it keeps you connected for the life of the system – from maintenance to repairs to eventual replacement.

Enter your Nest Pro ID at installation to make sure your contact info appears in the alert – and unlock even more benefits.²

Customers can even book an HVAC checkup with you right from their Google Home app.³

Grow your bottom line with the brand customers know and trust.

Nest thermostats work seamlessly with products like Nest Protect and Nest Hub for easy bundling. And the Google Home app works with Google and Matter devices, plus thousands of other brands you're already installing. Add them to your portfolio to open new revenue streams and keep customers coming back for more.

Visit g.co/nestpro to learn more.
