

Certificate

Certificate number: 2022-013

Certified by EY CertifyPoint since: July 19, 2022

Based on certification examination in conformity with defined requirements in ISO/IEC 17021-1:2015 and "HDS Accreditation framework - version 2.0", the Information Security Management System as defined and implemented by

Google LLC*

located in Mountain View, California, United States of America is compliant with the requirements as stated in the standard:

Health Data Host (HDS) certification framework - version 2.0

Issue date of certificate: July 18, 2025

Re-issue date of certificate: December 19, 2025

Expiration date of certificate: May 14, 2027

Last certification expiration date: July 18, 2025

EY CertifyPoint will, according to the certification agreement dated September 24, 2025, perform surveillance audits and acknowledge the certificate until the expiration date noted above. This certificate is only valid in combination with a valid and accredited ISO/IEC 27001:2022 certification with certificate number 2012-001b issued by EY CertifyPoint, with issue date May 10, 2024 and expiry date May 14, 2027.

**The certification is applicable for the assets, services and locations as described in the scoping section at the back of this certificate, with regard to the specific requirements for information security as stated in the Statement of Applicability, dated February 17, 2025.*

Scope for certificate 2022-013

The scope of this 'Health Data Host (HDS) certification framework - version 2.0' certification is limited to the Google Cloud information security management system, which is implemented in the following Product Area, its offerings and locations as listed below, along with the data contained or collected by those offerings. The scope of this 'Health Data Host (HDS) certification framework - version 2.0' certification is limited to Enterprise Customers.

In accordance with the certification scope, the following activities are applicable to the below-listed locations within the European Economic Area (EEA):

1. The provision and maintenance in operational condition of physical sites for hosting the hardware infrastructure of the information system used to process the health data;
2. The provision and maintenance in operational condition of the hardware infrastructure of the information system used to process the health data;
3. The provision and maintenance in operational condition of the virtual infrastructure of the information system used to process the health data;
4. The provision and maintenance in operational condition of the platform for hosting information system applications; and
5. The management and operation of the information system containing the health data.

Data Centers in scope for Activities 1 to 5:
