Google Workspace with Gemini

Unlock safer work for people and AI agents

AI models capable of hacking, agent sprawl, and sophisticated nation-state and ransomware adversary groups pose challenges that legacy tools were not designed to address.

- Dependency on exploitable desktop apps
- Complexity and added costs to govern agents
- Ineffective defenses against AI-accelerated attacks

Google Workspace with Gemini: Built for the agentic era

Built-in threat defenses

- Block >99.9% of spam, phishing attempts, and malware in Gmail before they reach users.
- Protect important files with AI-powered ransomware detection and restore in Google Drive.
- Mitigate AI abuse and threats, including indirect prompt injections, with built-in safety defenses in Gemini.

Unified data and agent governance

- Protect sensitive data at scale with AI classification, contextual access policies, and DLP policies.
- Manage AI agents like users with identity-based policies and agent runtime data protection controls.
- Gain visibility and control over user and agent activity with robust observability tools and reports.

Trusted, compliant infrastructure

- Meet global compliance standards and requirements such as HIPAA, FINRA, FedRAMP High, and DoD IL4.
- Address sovereignty needs with vendor access controls, in-region data processing, and local data storage.
- Authoritatively control access to data from agents or external entities with client-side encryption.

Enterprise-ready, secure AI

Google Workspace with Gemini helps teams do more, while helping to keep data confidential, secure, and compliant.

Confidential

Your prompts, responses, and data aren't reviewed by humans or used for training outside your domain without permission.

Compliant

Gemini holds certifications, including ISO 42001, SOC 1/2/3, and BSI C5, and can help meet HIPAA and FedRAMP High requirements.

Why customers choose Workspace

2x More malware detected by Gmail than third-party antivirus alone[1]

0 Google Workspace entries in CISA's Known Exploited Vulnerabilities Catalog[2]

57% fewer email security claims than Microsoft 365 customers[3]

"Gemini is an enterprise-grade application that respects our data and infrastructure security while at the same time allowing us to safely experiment with new gen AI capabilities."

Katie Peperkorn,
AVP, AI Platforms & Virtual Agents,
ATB Financial
