

Scam protection for the AI age

As scammers get more sophisticated, Android keeps you a step ahead with multiple layers of proactive protection powered by the latest in Google AI.

Android

Intelligent, proactive scam protections for every kind of conversation

Phone calls

Verifies callers and flags scam patterns and tactics

Text messages

Warns you if a conversation is suspicious and most likely a scam

Messaging apps

Extends scam protections to non-Google messaging apps

Scam Detection

Likely scam

Suspicious activity detected for this call.

Not a scam

End call

PHONE CALLS

Scam Detection in Phone by Google

On-device AI detects scam conversation patterns in real-time without recording or transcribing audio, warning you with audio, haptic, and visual alerts.

Scam Detection

Likely scam

Suspicious activity detected. Common scams often start this way. [Learn how scams are detected](#)

Not a scam

Report & block

TEXT MESSAGES

Scam Detection in Google Messages

Your existing spam protection is augmented by real-time Scam Detection, with on-device AI warning you when text messaging conversations are suspected to be scams.

App · 5m

MESSAGING APPS

Scam Detection in chat notifications

Android can warn and protect you from potential scams in chat notifications across many popular messaging apps, including WhatsApp and Signal.

This may not be Mom

Someone may be pretending to call from your contact's number

Hang up

PHONE CALLS

Fake call detection

As more scammers impersonate the phone numbers and voices of your contacts using AI deepfake technology, Fake call detection warns you if an incoming call appears spoofed and recommends that you hang up.

Likely scam call ended

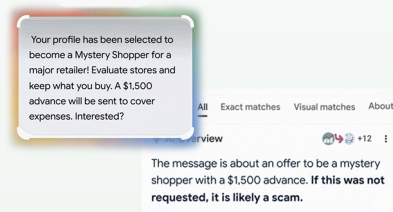

For your protection, your phone ended a call the TriBank app identified as a likely scam

Settings

PHONE CALLS

Verified financial calls

We partner with participating banks to automatically block calls from potential scammers trying to impersonate your financial institution.

MESSAGING APPS

Circle to Search for scams

Now you can use Circle to Search to help spot scams across any messaging app — simply circle a message to receive instant AI analysis.

Only Android uses the best of Google AI to help keep you safe from the latest scams.
