Google for Education

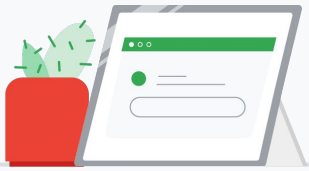
FAMILIES AND GUARDIANS

Getting started with Google for Education tools

Explore these resources to better understand the technology your student may use in the classroom and at home – and learn best practices to stay involved in their learning journey.

Learning in school

Navigating technologies in the classroom



- Learn more about the tools your student is using in the classroom with the Google for Education video series and the Google Terms Glossary. These assets guide you through popular Google features and share more resources to help you get started.
- Stay up to speed with your student's work by signing up for guardian email summaries, which are weekly reports about their activity in Google Classroom.
- Help your student gain an understanding of how they learn best with a broad range of inclusive, customizable accessibility features in Google Workspace for Education and Chromebooks.

Communicating with teachers

- One of the best ways to stay involved with your student's progress in the classroom is to keep open lines of communication with their teachers. Check out these Google Meet quick tips to learn how easy it is to set up a virtual check-in or your next parent-teacher conference.

Learning at home

Digital well-being and online safety

- Teach your learner how to be a safe explorer of the online world while they learn the fundamentals of digital citizenship and digital skill-building with fun games, resources, and more with Be Internet Awesome, Applied Digital Skills, and common sense media.
- Help your learner establish a healthy relationship with screen time and determine appropriate content for them with Family Link. Sync your student's school account to your Family Link account to access school tools and classwork from home, with familiar Family Link parental controls and tools still in place.

Make learning an adventure

- Expand learning possibilities outside of the classroom with tools made just for students. Access interactive lessons, videos, and games about some of the most famous locations and artwork with Google Arts & Culture and Google Earth.
- Give kids a family-friendly environment to learn online and explore on their own. With YouTube Kids, it's easy for you to guide your learner's journey as they discover exciting, new interests.
