		<ul style="list-style-type: none"> Access Transparency is a feature that enables you to review logs of actions taken by Google personnel regarding your user content. Log entries include: the affected resource, the time of action, the reason for the action (e.g. the case number associated with the support request); and data about who is acting on data (e.g. the Google personnel's location). 	
4.	4. where doubts exist about whether the service provider is effectively performing tasks in compliance with all applicable legal and administrative provisions, adequate measures shall be initiated;	<p><u>Cease use of Service</u></p> <p>If you wish to stop using our services you may do so at any time.</p> <p><u>Remedies</u></p> <p>If Google's performance of the Services does not meet the Google Workspace Service Level Agreement regulated entities may claim service credits.</p> <p><u>Termination</u></p> <p>Regulated entities may terminate our contract with advance notice for Google's material breach after a cure period or if necessary to comply with law.</p>	<p>Ceasing Services Use</p> <p>Services</p> <p>Term and Termination</p>
5.	5. the credit institution must continue to possess the necessary specialist knowledge to effectively monitor the outsourced tasks and to control any risks associated with such outsourcing;	<p>You operate the services independently without action by Google personnel. You decide which services to use, how to use them and for what purpose. Therefore you stay in control of the relevant activities.</p> <p>Google provides documentation to explain how regulated entities and their employees can use our Google Workspace services. If a regulated entity would like more guided training, Google also provides a variety of courses and certifications.</p> <p>See Row 3 for information on how you can monitor Google's performance of the services.</p>	<p>Instructions</p> <p>Technical Support</p>
6.	6. the service provider shall inform the credit institution without delay about any development that may materially impede its ability to perform the outsourced tasks effectively and in compliance with all applicable legal and administrative provisions;	<p>Google will make information about developments that materially impact Google's ability to perform the Services in accordance with the SLAs available to you. More information is available on our Status Dashboard page.</p> <p>In addition, Google will notify you of data incidents promptly and without undue delay. More information on Google's data incident response process is available in our Data incident response whitepaper.</p>	<p>Significant Developments</p>

7.	7. the credit institution must be able to terminate the outsourcing agreement if required, without doing so having any negative effect on the continuity and quality of the services provided for its customers;	<p>Regulated entities can elect to terminate our contract for convenience, including if necessary to comply with law, or where directed by the supervisory authority.</p> <p>Google recognizes that regulated entities need to be able to exit our Services without undue disruption to their business, without limiting their compliance with regulatory requirements and without any detriment to the continuity and quality of their service to their own clients. To help regulated entities achieve this, upon request, Google will continue to provide the Services for 12 months beyond the expiry or termination of the contract.</p>	<p>Termination for Convenience</p> <p>Transition Term</p>
8.	8. the service provider shall cooperate with the FMA and the Oesterreichische Nationalbank with regard to the outsourced activities;	Google will fully cooperate with supervisory authorities exercising their audit, information and access rights.	Enabling Customer Compliance
9.	9. the credit institution, its bank auditors, the FMA and the Oesterreichische Nationalbank must actually have access to the data related to the outsourced activities and to the service provider's business premises. The FMA and the Oesterreichische Nationalbank must be able to exercise such access rights;	Google recognizes that regulated entities must be able to audit our services effectively. Google grants audit, access and information rights to regulated entities, supervisory authorities and both their appointees. This includes access to Google's premises used to provide the Services to conduct and on-site audit. Regulated entities may access their data on the services at any time and may provide their supervisory authority with access.	Customer Information, Audit and Access Regulator Information, Audit and Access
10.	10. the service provider shall protect all confidential information about the credit institution and its customers;	<p>The security of a cloud service consists of two key elements:</p> <p><u>(1) Security of Google's infrastructure</u></p> <p>Google manages the security of our infrastructure. This is the security of the hardware, software, networking and facilities that support the Services.</p> <p>Given the one-to-many nature of our service, Google provides the same robust security for all our customers.</p> <p>Google provides detailed information to customers about our security practices so that customers can understand them and consider them as part of their own risk analysis.</p> <p>More information is available at:</p> <ul style="list-style-type: none"> • Our infrastructure security page • Our security whitepaper • Our cloud-native security whitepaper • Our infrastructure security design overview page • Our security resources page 	<p>Confidentiality</p> <p>Data Security; Security Measures (Data Processing Amendments)</p>

		<p>Google recognizes that you expect independent verification of our security, privacy and compliance controls. Google undergoes several independent third-party audits on a regular basis to provide this assurance. Google commits to comply with the following key international standards during the term of our contract with you:</p> <ul style="list-style-type: none">• ISO/IEC 27001:2013 (Information Security Management Systems)• ISO/IEC 27017:2015 (Cloud Security)• ISO/IEC 27018:2014 (Cloud Privacy)• SOC 1• SOC 2• SOC 3 <p>You can review Google's current certifications and audit reports at any time.</p> <p><u>(2) Security of your data and applications in the cloud</u></p> <p>You define the security of your data and applications in the cloud. This refers to the security measures that you choose to implement and operate when you use the Services.</p> <p><u>(a) Security by default</u></p> <p>Although we want to offer you as much choice as possible when it comes to your data, the security of your data is of paramount importance to Google and we take the following proactive steps to assist you:</p> <ul style="list-style-type: none">• Encryption at rest. Google encrypts certain data while it is stored at rest on a disk (including solid-state drives) or backup media. Even if an attacker or someone with physical access obtains the storage equipment containing your data, they won't be able to read it because they don't have the necessary encryption keys.• Encryption in transit. Google encrypts all data while it is "in transit"--traveling over the Internet and across the Google network between data centers. Should an attacker intercept such transmissions, they will only be able to capture encrypted data, at one or more network layers when data moves outside physical boundaries not controlled by Google or on behalf of Google. <p><u>(b) Security products</u></p> <p>In addition to the other tools and practices available to you outside Google, you can</p>
