

Put patients in the driver's seat with cloud-powered care

Eliminate unnecessary staff admin while improving overall patient experience

As healthcare IT moves into the cloud, organizations have the opportunity to cloud-power their healthcare workers and personalize patient experiences. Your patients are consumers. More than ever before, they are “shopping” for healthcare services, seeking out the best overall experience when receiving care.

Hospitals that offer a superior patient experience have been shown to have 50% higher margins than their peers.¹

Provide a better patient experience with increased patient facetime

With Chrome Enterprise, your staff can move from legacy devices to mobile, cloud-native solutions to get seamless, real-time access to information to better assist patients. And with its low total cost of ownership, multiple layers of security and ease of management, you can easily provide patients access to Chrome devices to keep them better informed--eliminating staff admin time and better engaging patients in their care.

Benefits for your patients

Better informed

Give patients better access to personalized and informative information with individual devices and self-service kiosks.

Improved experience

With the technical and administrative aspect of healthcare reduced, patients have more time with their doctor.

Personalized care

Instant access to patient data drives more personalized care.

¹ Accenture, Patient Engagement: Happy Patients, Healthy Margins, 2015

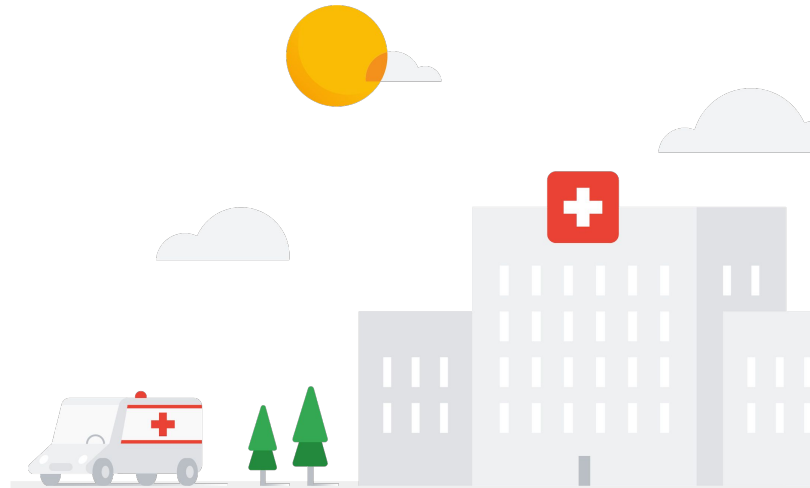

Enhance the patient experience with Chrome Enterprise

In-room entertainment and information

Enable patients to request assistance, keep tabs on their healthcare, securely browse the web, or stream content for entertainment through a lightweight, easy-to-use loaner device.

Self-service

Self-service kiosks streamline the check-in and check-out process, facilitate information collection, and reduce the administrative burden on staff.

Because Google makes us more efficient, employees have more time to spend caring for patients. With more time tending to patients' needs, we can fulfill our company mission. Now that's good medicine.

Sy Zahedi, CEO, MedXM
