

Provide quality care with cloud-native solutions

Cloud-power your practitioners to get faster access to information and provide better care in the moment.

Time constraints on healthcare workers can have a detrimental impact on their performance. Staff need a way to access information on-the-go, reduce unnecessary admin, and overcome frustrating data silos.

Only **14%** of healthcare workers report having the time they need to provide the highest standards of care.¹

Enable secure entry points into the cloud with Chrome Enterprise

Giving employees ready access to medical records and information can improve safety, efficiency and patient confidence. Healthcare workers can access a single, centralized source of truth from a device or shared workstation in seconds. With easy, comprehensive device management and a lower total cost of ownership², Chrome Enterprise is the smart choice for any healthcare organization.

With Chromebooks, boot time shrank dramatically. Chromebooks start up right at the Citrix login screen, so caregivers can access clinical data right away."

Matt Thorne
Head of IT, Chapters Health System

Spend less time worrying about technology, and more time caring for patients:

Mobilize healthcare workers

Provide easy and secure access to the information and apps that practitioners need, whether visiting patients in hospital or at home.

Digitize training and communications

Keep employees engaged with shared devices for ongoing training. House custom apps with managed Google Play to maintain control over deployment.

Temporary staff

Deploy Chromebooks in minutes and share securely among shift staff and visiting professionals. 'Grab and go' self-service model enables access from any device, with all session data wiped after each use.

Shared workstations

Provide seamless and secure access to EHR systems via a fixed or mobile shared workstation using single sign-on and VDI solutions.

Key benefits for Your workforce:

Ready access to information

Support for healthcare apps via the Chrome Browser, VDI and Android apps

A better way to work

Background updates, 10 second boot time and a familiar UI make it easy to start and stay fast without compromising security

Versatile devices

Flexible device options for any use case whether it's a shared workstation or a portable device for a mobile worker.
