ChromeOS is built for providers

Technology should adapt to your evolving delivery models and patient preferences.

**Delivery model shifts**
The emergence of new channels of care such as telehealth create the need for custom IT functionality. Solutions must overcome compatibility barriers and offer scalability.

88% of patients would continue using virtual care as long as physical examinations were not required.²

**Administrative burden**
Physicians are inundated with administrative processes. Prioritizing solutions such as electronic prior authorizations enable practitioners to provide patients accurate, customized care.

72% of physicians believe that non-clinical administrative duties inhibit their ability to provide quality care.³

**Cybersecurity & HIPAA compliance**
Integrating EHRs can create deployment complexities. Solutions must safeguard patient data.

52% of healthcare leaders adopted virtualization solutions for data compliance and productivity reasons.¹

88% of patients would continue using virtual care as long as physical examinations were not required.²

**Built-in, proactive security**
Deploy devices with secure data storage, built-in executables blocking, automatic security updates, and a multi-layered OS architecture to safeguard patient health information.

Run confidently with no reported ransomware attacks ever and easier zero-trust security.

56% of healthcare buyers consider security and compliance as critical factors when evaluating non-Windows systems.¹

**Fast deployment & easy management**
Leverage the Google Admin Console for zero-touch device deployment to geo-distributed hospitals and labs, and remotely manage your endpoints’ security, users, apps, policies and more.

**Simple access**
Maximize uptime with background updates, devices with near-instant boot times, integrated access legacy apps through VDI, and quick SSO options to maximize patient face-time.

**Modern experience for everyone**
Connect to an array of peripherals, including electronic signature pads and barcode scanners, to increase practitioner productivity and enhance patient experiences.⁴
Provide a higher quality of care by upgrading to ChromeOS

Beyond universal security benefits, ChromeOS’ user-friendly and intuitive solution is designed to support the needs of every caregiver and patient.

**Benefit from a Connected Ecosystem**

Because Google makes us more efficient, employees have more time to spend caring for patients. With more time tending to patients’ needs, we can fulfill our company mission. Now that’s good medicine.”

CEO,
MedXM
