

Chrome Enterprise Recommended Solution Overview with Cisco Webex Meetings

Between working remotely and working securely, there's Webex

The workplace is rapidly changing driven by an evolving workforce and the changing nature of work.

On average, 37% of employee time is spent in meetings with over 70% of employees admitting to bringing other work to meetings. As work becomes more unstructured, employees increasingly demand flexibility in how, when, and where they work.

Clearly, making meetings simple, effective and secure remains a top business priority.

We believe that the work you do matters--no matter where you do it.

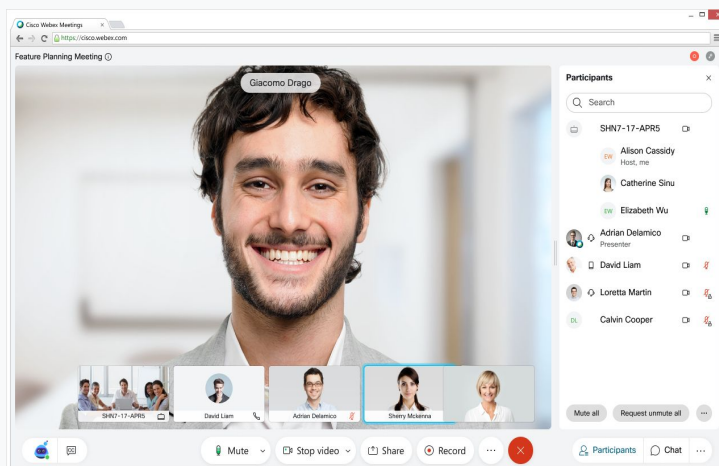

With our Chrome Enterprise Recommended solution, you will get simple, secure and reliable video conferencing that lets you get work done anywhere, on Chrome devices and Chrome OS.

Discover the benefits

Enjoy hassle-free video conferencing that just works

The Cisco Webex Meetings web app lets you join meetings, events, and training sessions. Offering a simple and intuitive experience with no downloads and plug-ins required with all of the core meeting functionality on Chrome OS.

Whether meeting on the go or working from home, Cisco Webex Meetings on mobile delivers industry-leading collaboration for the modern enterprise. You can experience amazing ways to improve and sustain your productivity with features like custom virtual backgrounds, optimized video sharing, and screen sharing on Chrome OS devices.
