Chrome Enterprise Recommended

dialpad

Chrome Enterprise Recommended Solution Overview **with Dialpad Talk**

Dialpad & Chrome OS: One Beautiful Workspace so you can work from anywhere

Built on the Google Cloud Platform for unmatched security and reliability, Dialpad is the leading cloud communications platform for AI-powered calling, conferencing and contact centers.

With crystal clear call quality, internal/external SMS/MMS, team messaging, and call transcriptions all powered on your Chrome OS devices, staying in the loop at or away from your desk has never been easier.

Built for the Modern Workforce - Dialpad gives remote employees the business phone features and tools they need to succeed directly from any Chrome OS device so they can work from anywhere.

Real-Time Insights, Real-Time Benefits - Running on Chrome OS devices, Dialpad's proprietary AI helps companies unlock conversation insights, improve productivity, and drive better performance - all in real time.

Discover the benefits

Dialpad + Chrome OS enables you to manage calls, texts, voicemail, chat and meetings from any Chrome OS device

- Unified Experience - End-to-end calling, messaging, conferencing and call routing connects every part of your business.

- Voice Intelligence (Vi™) - Dialpad is built on a powerful voice AI engine that automatically captures action items, takes notes and more in real-time.

- Voice Quality - A unique telephony architecture using Intelligent call routing and global data centers ensures HD call quality for voice & video.
