Everything you need, all in one place

Google Workspace for Education provides a comprehensive suite of tools made for teaching and learning.

Collaboration and productivity							
Calendar	Docs	Forms	Vids	Slides	Sheets	AppSheet	Sites

Generative AI	Email and messaging			Class management and plagiarism detection	
✦ Gemini / NotebookLM	Gmail	Chat	Groups	Classroom	Assignments

Storage	Privacy, security, and device management	Visibility and analytics		Video conferencing
Drive	Admin	Looker Studio / BigQuery		Meet

Strengthen security and insights

Protect your institution with proactive, centralized controls and analytics

- Access free, secure AI tools (Gemini for Education, NotebookLM) as Core Services, providing enterprise-grade data protection where your data is never reviewed or used to train AI models

- Prevent, detect, and remediate threats in the unified security center

- Support compliance with Google Vault for data retention and automated Data Loss Prevention (DLP) rules

- Control access to apps and data with context-aware access policies and multi-party approvals

- Gain visibility with Drive inventory reporting, Classroom analytics*, and BigQuery data exports

Enrich teaching and learning

Deliver impactful instruction with premium tools for every educator

- Build independent reading skills and gain insights on student progress with Read Along in Classroom

- Engage students in real time with Class tools on managed Chromebooks

- Personalize learning with interactive practice sets and assignable content from Classroom add-ons

- Produce compelling video projects with AI-powered tools in Google Vids

- Promote academic integrity with unlimited originality reports and a private, school-owned repository

- Connect your community with Meet sessions for up to 1,000 participants and public live streaming for up to 100,000 viewers

- Streamline administrative workflows with eSignature for Google Docs and PDFs

Drive transformation and efficiency

Consolidate your tech stack and unlock new possibilities with AI

- Direct student learning with AI experiences you can assign* in Classroom. Use NotebookLM for activities grounded in your sources, and Gems to explore topics using course materials and the web

- Streamline workflows with Gemini in Classroom to help plan lessons, create content, and streamline grading*

- Create compelling videos with AI-powered features in Google Vids*

- Reduce costs and save time by consolidating security, collaboration, and teaching tools into a single solution
