Use case / agent name: _____

Problem Statement

Examples:

- Process & effort:
- High, unpredictable cost:
- Governance risk:
- Lack of creativity & innovation:
- Scalability challenges:
- Speed / bottlenecks:
- Quality & accuracy:
- Consistency & predictability:

How We Solved it with Gemini Enterprise

Capability Description:

Sample Prompt:

Key Benefits

Examples:

- Cost Savings:
- Time Savings:
- Reduced Risk:
- Quality, Consistency & Accuracy:
- Accelerated Time to Value:
- Creativity & Innovation:
- Engagement / Enjoyment:

Agent Designer: Adaptive AI Assistants

What is Agent Designer?

Agent Designer is a visual, no-code toolkit in Gemini Enterprise that turns business ideas into automated AI agents using everyday English.

Rigid Workflows

Follows predefined code paths. Cannot dynamically adapt to unexpected user inputs.

vs

Adaptive Agents

Dynamically adapts to handle multi-step reasoning tasks using natural language.

1

The Chat

Describe your intent in plain English within the chat pane.

2

The Blueprint

Gemini automatically scaffolds the agent's core parameters and behavioral rules.

3

Connect & Test

Link enterprise tools like Gmail in the Designer pane, then test the assistant in a live Preview playground.

Pitch it in 5 mins!

Deliver a fast-paced presentation combining visual mapping & live action

NotebookLM Mindmap

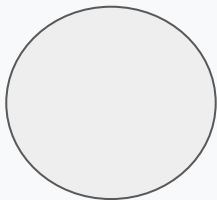

A structured visual map showcasing the connected concepts, sources, and intelligence pathways of your AI system.

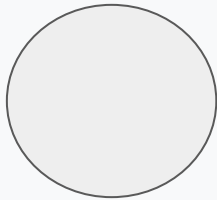

Live Demo of AI Agent

A real-time demonstration proving the agent's actual capabilities, responsiveness, and practical business value.

Judging Criteria

Google Cloud

Insert logo

Unique Differentiation

- Does this leverage internal data or systems that other agencies can't replicate?
- Does this create a unique strategic moat for the organization?

Innovation

- How novel & original is the idea?
- Have we seen this problem solved this way before or does this offer a new approach?

Demo

- Is the problem clearly defined, and is the solution effectively presented through a demo?

Adoption

- Would users or agencies adopt this, or are the barriers to entry too high?

User Experience

- Does the solution streamline a complex task, and automate for greater efficiency?

Limited Edition Google Swags Up for Grabs

Let's build the Future Together
