

# Transform how you teach, learn and work with Gemini for Education

Empower everyone in your institution with Gemini, your AI assistant for education. Enhance research, streamline administration, accelerate innovation, and support students – all in a private and secure environment.

## Top ways your education community can use Gemini

### Faculty

- Accelerate literature reviews, summarize long documents, refine research ideas, and get feedback on writing
- Generate assessments and assignments from scratch or use previous examples with corresponding answer keys
- Enhance lectures with interactive in-class activities, discussion questions, and custom images for presentations

### Students

- Deepen understanding with on-demand support, like explanations of challenging concepts and step-by-step guidance
- Prepare for exams by creating personalized practice quizzes based on hard-to-grasp concepts
- Brainstorm and research ideas, get feedback on writing, and generate citations

### Staff

- Go from a blank page to a grant proposal, alumni outreach template, newsletter, or email draft
- Summarize long documents, analyze data, and create templates for budget proposals, staff meeting agendas, and more
- Brainstorm new initiatives, develop project plans, and draft talking points for presentations

## The Google Advantage

### The only full-stack AI solution

Google provides the cloud infrastructure, hardware devices, AI models and the software they power – enabling end-to-end privacy and security, reliability, and rapid innovation.

### Bold but responsible approach

Google partners with experts at institutions like Columbia Teachers College, Arizona State University, and NYU Tisch to test and improve our technology.

### Best-in-class data protection

Gemini and [NotebookLM](#) are Core Services covered under your Workspace for Education terms and supports compliance with many industry regulations, like FERPA. Your chats are not reviewed by humans or used to improve generative AI models

### Grounded in learning science

By using learning science principles as the backbone of how we build Gemini, we're ensuring that it is as helpful as it can be for learners. Infused with [LearnLM](#), Gemini 2.5 Pro is the world's leading model for learning<sup>1</sup> and experts preferred LearnLM over GPT-4o by an average of 31% when evaluated across a diverse set of learning scenarios.<sup>2</sup>

### Industry pioneer in AI

The work underpinning generative AI comes from Google's [invention of the Transformer in 2017](#). And AI has powered Google products for nearly a decade – from autocomplete suggestions to malware detection in Gmail.

### Rapid innovation

Research and product teams work together to develop new features and improve products faster – like bringing additional capabilities to [NotebookLM](#).
