Prompt like a pro: 5-step framework

Structure of a great prompt

Great prompts follow the 5-step framework – a simple way to guide Gemini step-by-step in creating exactly what you need. Use this as a model when building your own.

Step	What it means	Example
Persona	Which expertise you want AI to draw from	Economics professor
Task	What you want AI to help you with	Test prep
Context	Any background information AI needs to help you with this task	Exam on macroeconomics
Format	How you want the results to appear e.g. table, bulleted list, paragraph	Open-ended and multiple choice questions
References	[Optional] Examples of what you are looking for	Example of quiz question

Example Prompt:

You are an economics 101 professor. I am studying for a midterm exam on macroeconomics. Quiz me on the concepts of Gross Domestic Product (GDP) and the business cycle, starting with easier questions and getting progressively more challenging. Ask questions in open-ended and multiple choice format. For example, "What does the economic indicator Gross Domestic Product (GDP) measure?"

Introduction to Gemini

Your personal AI assistant for learning.

Get started at gemini.google.com

Your personal AI assistant for learning.

Add files from Google Drive or your computer to your prompt, to provide more context.

Gemini Notebook

Pro Tip: Connect your existing notebooks from Gemini Notebook to unlock Gemini's features on your existing sources.

Explore additional Gemini features in the Tool Menu, like:

Deep Research: Conduct in-depth, cited research reports on complex topics

Create Videos: Create 8-second videos you can use for presentations

Images: Generate new images based on a prompt, or upload images for editing

Canvas: Build apps, custom code, games, or work with Gemini to edit documents

Guided Learning: Receive Interactive, step-by-step guidance from Gemini.

Model Picker: Select your Gemini model.

Toggle between different Gemini models depending on whether you are looking for quick answers or advanced math, coding, and reasoning.

Guided Learning

*Access Gemini features in your 'Tools' menu

Guided Learning acts as your personal study partner, walking you through problems and concepts step-by-step to ensure you master the concepts.

Use Guided Learning to...

- ✓ Move beyond answer-only output to receive full, adaptive explanations that reveal the “how” and “why” behind concepts
- ✓ Deepen your learning through active dialogue and open-ended questions
- ✓ Deepen your learning through active dialogue and open-ended questions

Example Prompt

“What are the parts of a plant cell?”

Gemini will break down learning concepts step-by-step. Ask follow-up and clarifying questions to dive deeper.

Optional: upload references and notes to generate better results

Select 'Guided Learning' from the tool box

Explore complex topics by opening interactive images (if available in the output) in the side panel and clicking labels for in-depth insights.

Deep Research

*Access Gemini features in your 'Tools' menu

Deep Research helps you get up to speed on just about anything by automatically browsing hundreds of websites and creating insightful reports in minutes.

Use Gemini Deep Research to...

- ✓ Transform your prompt into a personalized, multi-step research plan to break down complex concepts more clearly
- ✓ Kickstart assignments and prepare for exams with broad, initial research summaries of your topics of interest
- ✓ Verify facts and cite with confidence with research findings that directly link back to original sources

Example Prompt

"I'm working on a paper about the current and future trends in robotics. Can you help me understand what are key emerging trends and technological advancements driving those trends?"

Return back to your prompt to iterate and ask additional questions at any time.

Create web pages, infographics, quizzes, flashcards, and audio overviews of your research report

The screenshot displays the Gemini Deep Research interface. On the left, a sidebar shows the Gemini logo and a 'Start research' button. Below this, a message states: 'I've completed your research. Feel free to ask me follow-up questions or request changes.' A card titled 'Robotics Trends and Future Advancements' with a timestamp of 'Dec 11, 5:02 PM' is visible. At the bottom of the sidebar, there is a search bar with the text 'What do you want to research?' and a 'Fast' dropdown menu. The main content area on the right shows a research plan titled 'Robotics Trends Research Plan'. It includes a title 'The Cognitive Convergence: Emerging Trends and Technological Drivers Shaping the Future of Robotics (2025-2030)' and a section 'I. Executive Summary'. The summary text describes the global robotics landscape's transition towards intelligent, flexible, and embodied systems, driven by the convergence of advanced AI, particularly Physical AI and Generative AI, with sophisticated physical platforms like Soft Robotics and Humanoids. At the bottom of the summary, it mentions 'Current market scaling is robust, driven by operational efficiencies facilitated'. The interface also features a 'Create' dropdown menu with options for 'Contents', 'Share & Export', and 'Create'.

Optional: upload references, like notes and readings, to give more context and get better results

Select 'Deep Research' from the tool box

At the end of your report, Gemini will list the sources it referenced in its output for you to review and dive deeper

Nano Banana Pro

*Access Gemini features in your 'Tools' menu

Nano Banana Pro allows you to create and edit images with more creative control, enhanced details, and improved text rendering.

Use Create images in Gemini to...

- ✓ Quickly create and edit images using simple, natural language prompts
- ✓ Generate clear text for posters, diagrams and infographics for clubs and activities
- ✓ Transform a photo into a professional headshot by adjusting style, camera angle, color, and more

Example Prompt

"Create an infographic about this plant focusing on interesting information."

Uploaded reference photos will appear above the chat

Describe your image

+ 🗨️ 📷 Image X

Optional: upload reference photos to give more context and generate better results

Describe the image you would like to create in the prompt bar

Gemini will share the generated photo directly in chat.

Iterate on your prompt to adjust the output.

Coding Partner (Canvas)

*Access Gemini features in your 'Tools' menu

With the **Canvas feature**, make Gemini your collaborative coding partner and go from prompts to prototypes within minutes to bring your ideas to life.

Use Gemini Canvas to...

- ✓ Turn Deep Research reports into apps, games, web pages, and more.
- ✓ Get real-time feedback on your coding logic, debug errors, and refine your code
- ✓ Generate code that brings your ideas to life as a working, shareable game or app based on your prompt

Example Prompt

"Help me build a simple physics simulation that shows a ball falling under gravity. Use Python and show how to adjust gravity, time, and object mass. Explain what each part of the code does".

Return back to your prompt to iterate and ask additional questions at any time.

Export your finished output

The screenshot shows the Gemini Canvas interface. On the left, the chat bar contains the prompt: "Help me build a simple physics simulation that shows a ball falling under gravity. Use Python and show how to adjust gravity, time, and object mass. Explain what each part of the code does". Below the chat bar, there is a "Show thinking" dropdown and a "Let's write or build together" button. The main area displays the generated Python code for a gravity simulation using Pygame. The code includes comments explaining the configuration, physics constants, and colors. At the bottom right, there is an "Export to Colab" button.

```
1 import pygame
2 import time
3
4 # =====
5 # 1. CONFIGURATION (Adjust these values!)
6 # =====
7 WINDOW_WIDTH = 800
8 WINDOW_HEIGHT = 600
9
10 # Physics Constants
11 GRAVITY = 9.8 # Acceleration due to gravity (m/s^2). Tr
12 MASS = 5.0 # Mass of the ball in kg (Used for Energy
13 PIXELS_PER_METER = 50 # Scale: 50 pixels on screen = 1 meter in
14 TIME_STEP = 0.016 # Delta time (dt). 0.016 is roughly 60 fr
15 RESTITUTION = 0.8 # Bounciness (0.0 = no bounce, 1.0 = perf
16
17 # Colors (R, G, B)
18 WHITE = (255, 255, 255)
19 BLACK = (20, 20, 20)
```

Enter your prompt in the chat bar.

Select 'Canvas' from the tool box

Gemini will provide code output based on your initial prompt

With quizzes and flashcards in Gemini Canvas, turn your class notes into interactive study tools.

Quizzes & Flashcards (Canvas)

*Access Gemini features in your 'Tools' menu

Use Gemini Canvas to...

- ✓ Transform pages of lecture notes into study guides and flashcards
- ✓ Generate practice exams directly from your course notes to spot knowledge gaps and boost your learning
- ✓ Get a prioritized study plan that focuses your attention exactly where you need it most

Example Prompt

"Generate a quiz about the impressionist movement".

Return back to your prompt to iterate and ask additional questions at any time.

Gemini will provide an interactive quiz based on your prompt and uploaded documents

Here is a quiz to test your knowledge of the Impressionist movement, covering its origins, key artists, and defining techniques.

Impressionism: Art of Light and Moment
Dec 12, 3:14 PM

Let's write or build together

Thinking

Gemini can make mistakes, so double-check it

Impressionism: Art of Light and Moment

1/10

1. Which painting by Claude Monet is credited with giving the Impressionist movement its name?

A. The Starry Night

B. Water Lilies

Strengths and Growth Areas
Get a summary of your key strengths and discover areas where you can focus your studies. [Analyze my performance](#)

Keep Learning

Flashcards
Create a complete set of flashcards from all your quiz material. Good for quick review and mastering key concepts.

Study guide
Generate a comprehensive study guide based on the materials you are studying. Good for in-depth review.

[Review quiz](#) [More questions](#)

Optional: add your class notes to your prompt for tailored quiz questions and recommendations

At the end of the quiz, get a detailed breakdown of performance and additional study resources

Gems let you turn your go-to prompts into reusable study tools, like custom tutors or flashcard generators, so you can spend less time setting up, and more time learning.

Access Gem manager in the side panel of Gemini

Get started easily with pre-made Gems by Google, like "Career Guide"

Create your own custom Gem built to tackle your specific needs. Scroll down to the Gem Manager to get started.

Give your new, personalized Gem a name, like "Chemistry Tutor".

Add a description for your Gem.

Provide detailed instructions to make your Gem work for you. You can use the prepared prompts at the end of this guide for inspiration.

Test your Gem in the preview panel.

Select a default tool, like Guided Learning, for your Gem.

Optional: Upload files to give more context and get more helpful responses.

Introduction to Gemini Notebook

Your personal AI assistant for learning.

Get started at notebooklm.google.com

Gemini Notebook

Understand anything with Gemini Notebook

Give your notebook a name

Upload your own materials (like course notes, research, readings, or study guides) or browse the web for sources.

Gemini Notebook will only use information from the sources you provide. Think of it as an expert on your specific documents.

Share your notebook with your class so they can access the information and get their questions answered.

The screenshot displays the Gemini Notebook interface. At the top, the notebook is titled "The Industrial Revolution: An Advanced Study". Below the title bar, there are three main sections: "Sources", "Chat", and "Studio". The "Sources" section on the left lists several sources related to the Industrial Revolution, including "51-202 Class 1 Industrial Revol...", "51-202 Class 2 Industrial Revol...", "51-202 Class 3 Industrial Revol...", "51-202_ The Industrial Revoluti...", and "Agricultural Revolution: Forging...". The "Chat" section in the center shows a conversation with the notebook, starting with a gear icon and the title "The Industrial Revolution: An Advanced Study". Below the title, it says "7 sources" and provides a detailed summary of the Industrial Revolution, mentioning the "initial phase" and "second wave". The "Studio" section on the right offers various tools for interacting with the sources, including "Audio Overview", "Video Overview", "Mind Map", "Reports", "Flashcards", "Quiz", "Infographic", "Slide Deck", and "Data Table". A line from the "Data Table" tool in the Studio section points to a detailed description of the tool at the bottom of the page.

Audio Overview: Turn your sources into in-depth audio summaries.

Mind Map visually summarize your sources as a branching diagram.

Flashcards: Create interactive cards from your sources

Infographic: Turn your sources into a single, engaging visual summary

Data Table:: Synthesize your sources into clear, structured tables

A grid of nine Studio tools, each with an icon and a pencil icon for editing. The tools are: Audio Overview (purple), Video Overview (green), Mind Map (pink), Reports (yellow), Flashcards (orange), Quiz (light blue), Infographic (purple), Slide Deck (yellow), and Data Table (light blue). Lines connect each tool to its corresponding description on either side of the grid.

Video Overview: Turn your sources into a video of AI-narrated slides.

Reports: Generate custom documents, like blog posts, based on your sources.

Quiz: Test your comprehension with questions based on your sources.

Slide deck: Transform your sources into a polished presentation

Choose from over 80 available languages

Select your Audio Overview format.

1. *Deep dive into your sources*
2. *Snackable brief to grasp core ideas*
3. *Critique to improve your material*
4. *Debate to offer new perspectives.*

Choose your Audio Overview length

Access [Audio Overviews](#) in the Studio Panel.

Choose the 'Edit' icon to customize the overview.

Describe the key topics, sources, and more that you'd like your Audio Overview to focus on.

Remember: the Audio Overview will be based on the content from your uploaded sources

Your Audio Overviews will be saved in the Studio Panel.

You can listen, share, rename, download, and delete your saved Audio Overview at any time.

Transform your sources into a video of AI-generated slides.

Choose from over 80 available languages

Select your Video Overview format.

1. A structured, comprehensive overview
2. A bite-sized overview to grasp core ideas

Choose your Video Overview style

Access Video Overviews in the Studio Panel.

Choose the 'Edit' icon to customize the overview.

Describe the key topics, sources, and more that you'd like your Video Overview to focus on.

Remember: the Video Overview will be based on the content from your uploaded sources

Your Video Overviews will be saved in the Studio Panel.

You can watch, share, rename download, and delete your saved Video Overview at any time.

Mind Map

Connect the ideas from your sources with a Mind Map.

The initial Mind Map will help you understand the big picture and key themes of your uploaded sources, quickly.

Access Mind Maps in the Studio Panel.

Click on the icon to open the Mind Map

The screenshot shows the Gemini Notebook interface. The main window displays a mind map titled "The Anatomy of the Industrial Revolution" based on 7 sources. The mind map has a central node "The Industrial Revolution" with branches for "Historical Phases", "Pre-Conditions in Britain", "Key Technological Innovations", "Socio-Economic Transformation", "The Human Cost", "Global Diffusion", and "Modern Legacy". The Studio Panel on the right contains icons for "Audio Overview", "Video Overview", "Mind Map", "Reports", "Flashcards", "Quiz", "Infographic", "Slide Deck", and "Data Table". Below the Studio Panel, there are entries for "The Industrial..." with source counts and an "Add note" button.

Click on a node to expand the Mind Map and visually discover how different ideas relate to each other.

Your Mind Maps will be saved in the Studio Panel.

Create customizable reports based on your source documents.

Select the type of report you would like to generate.
Create your own, or choose from one of the following:

1. Briefing doc highlighting key insights and quotes
2. Study guide of key concepts and test materials
3. Blog post of source material

Access Reports in the Studio Panel.

Click on the icon to open the Reports menu.

Your Reports will be saved
in the Studio Panel.

You can view, share,
rename download, and
delete your saved Reports
at any time.

Reinforce key terms and core concepts with flashcards.

Select the number of Flashcards you would like to generate.

Select the level of difficulty for your Flashcards

Access Flashcards in the Studio Panel.

Choose the 'Edit' icon to customize the Flashcards.

Describe the key topics, sources, and more that you'd like your Flashcards to focus on.

Remember: Flashcards will be based on the content from your uploaded sources

Your Flashcards will be saved in the Studio Panel.

You can view, share, rename download, and delete your saved Flashcards at any time.

Click on a flashcard to reveal the answer.

You can ask Gemini to 'Explain' an answer, which will open a chat window with more context.

Test your comprehension and challenge yourself with interactive quizzes.

Select the number of Quiz questions you would like to generate.

Select the level of difficulty for your Quiz

Access Quizzes in the Studio Panel.

Choose the 'Edit' icon to customize the quiz.

Describe the key topics, sources, and more that you'd like your Quizzes to focus on.

Remember: Quizzes will be based on the content from your uploaded sources

Your Quizzes will be saved in the Studio Panel.

You can view, share, rename download, and delete your saved Quizzes at any time.

After answering a question, You can ask Gemini to 'Explain' the correct answer, which will open a chat window with more context.

Turn complex information from your sources into a single, engaging visual summary.

Select the language for your infographic

Choose between landscape, portrait, and square for the orientation of your infographic

Access Infographic in the Studio Panel.

Choose the 'Edit' icon to customize the infographic.

Choose the level of detail you would like your infographic to cover. Standard is selected by default.

Describe the style, focus, key topics, sources, that you'd like your infographic to focus on.

Remember: Infographics will be based on the content from your uploaded sources

Your Infographics will be saved in the Studio Panel.

You can view, share, rename download, and delete your saved Infographics at any time.

Transform your sources into a polished presentation by generating a Slide Deck

Select the language for your infographic

Choose between a detailed deck or a presenter deck for the format of your generated slides

Access Slides in the Studio Panel.

Choose the 'Edit' icon to customize the slides.

Describe the style, focus, key topics, sources, that you'd like your slides to focus on.

Remember: Slides will be based on the content from your uploaded sources

Choose the desired length of your generated slide deck

Your Slides will be saved in the Studio Panel.

You can view, share, rename download, and delete your saved Slides at any time.

Data Table

Synthesize your sources into clean, structured tables, ready to export to Google Sheets

Select the language for your data table

Access Slides in the Studio Panel.

Choose the 'Edit' icon to customize the data table.

Describe the style, focus, key topics, sources, that you'd like your data table to focus on.

Remember: Data tables will be based on the content from your uploaded sources

Your Data Tables will be saved in the Studio Panel.
You can view, share, rename download, and delete your saved Data Tables at any time.

Studio > Data Table

Industrial Revolution Innovations, Developments, and Key Figures

Based on 7 sources

Innovation or Development	Category	Associated Figure	Date or Era	Key Impact	Primary Resources Required	Inferred Industrial Wave	Source
James Watt's Steam Engine	Steam Power	James Watt	1776; c. 1760-1840	Became the workhorse of the revolution; revolutionized energy sources and powered the factory system, trains, and ships.	Coal, Water	First (c. 1760-1840)	51-202 Class 1 Industrial Revolution Advanced Study; [1]
Water Frame	Textile Manufacturing	Richard Arkwright	1769	Led to the factory system.	Water power	First (c. 1760-1840)	51-202 Class 1 Industrial Revolution Advanced Study
Spinning Jenny	Textile Manufacturing	James Hargreaves	c. 1764	Multiplied the amount of thread a single worker could produce.	Not in source	First (c. 1760-1840)	51-202 Class 1 Industrial Revolution Advanced Study
Power Loom	Textile Manufacturing	Edmund Cartwright	1785	Mechanized weaving, dramatically increasing cloth production.	Not in source	First (c. 1760-1840)	51-202 Class 1 Industrial Revolution Advanced Study
