Models			
Gemini 3 Pro	Deliver a more helpful AI experience to your class with Gemini 3 Pro, our most intelligent model available in the Gemini app. Whether you're analyzing data or brainstorming ideas, experience improved reasoning across text, images, audio, and video with the best model in the world for multimodal understanding. Learn more	All editions	Available globally, 18+
Gemini 2.5 Pro, infused with LearnLM	Empower students and educators with Gemini 2.5 Pro – the world's leading model for learning. Learn more	All editions	Available globally
Gemini 2.5 Flash	Get personalized, instant, and step-by-step assistance for your high-volume tasks with Gemini 2.5 Flash – a fast, lightweight thinking model that delivers rapid, intelligent reasoning for efficient student and administrative support. Learn more	All editions	Available globally
Create images with Nano Banana	Turn a single photo into countless new creations with Gemini's upgraded AI image generator, powered by the Nano Banana model. Learn more	All editions	Available globally, 18+
Create images with Nano Banana Pro	Create the perfect visual, from stunning mock-ups to data-rich infographics. Blend up to six images, design sharp text, and even make diagrams auto-populated with key facts and a polished design. Learn more	All editions	Available globally to try at no cost; paid editions have expanded access, 18+
Create videos with Veo 3	Boost student engagement by producing cinematic videos using Veo 3, including realistic environmental sounds and character dialogue. Learn more	Google AI Pro for Education	Available globally in english, 18+
Create videos with Veo 3.1	Transform your lesson materials into engaging videos with richer native audio, greater narrative control, and enhanced editing features that allow you to easily insert or remove objects. Learn more	Google AI Pro for Education	Available globally in english, 18+

Gemini for Education

Launch	Product/feature description	Availability	Geographic availability
Gemini Canvas			
Flashcards	Create interactive flashcards in Gemini Canvas to help students study for exams. Learn more	All editions	Available globally
Study guides	Generate customizable study guides in Gemini Canvas that you can ground in your class materials. Learn more	All editions	Available globally
Interactive quizzes	Encourage students to quiz themselves on any topic by generating personalized quizzes from their notes or prompts to get instant feedback, hints, and questions featuring charts or graphs. Learn more	All editions	Available globally
Slide generation	Create presentations instantly with a simple prompt or uploaded source. Generate a set of slides, complete with a theme and relevant images, and export them to Slides to easily collaborate on them with others. Learn more	All editions	Available globally
Storybook	Craft unique learning materials easily with the new Gemini storybook feature. Create a 10-page illustrated book, complete with custom audio narration using your own photos, files, and a simple prompt. Learn more	All editions	Available globally
Infographics	Reinforce learning and make data easier to understand by transforming complex information into clear, visual summaries in Gemini Canvas. Turn research reports, class notes, or reading materials into infographics in seconds. Learn more	All editions	Available globally

Gemini for Education

Launch	Product/feature description	Availability	Geographic availability
Gemini available to users of all ages	Help students of all ages learn confidently with the Gemini app. Students of all ages can now receive in-the-moment support, get feedback on their work, and more. Learn more.	All editions	Available globally
Gemini LTI: Assign Gems directly in Canvas by Instructure and PowerSchool Schoology Learning	Help students learn in their own way by assigning Gems directly in PowerSchool Schoology Learning, and Canvas by Instructure. Learn more.	All editions	Available globally
Gemini Live	Get instant, personalized guidance and deeper insights by starting a natural, voice-first conversation in the Gemini app. Learn more.	All editions	Available globally, 18+
Better visual aids in Gemini responses	Understand challenging topics with interactive diagrams and visuals directly in Gemini responses. Learn more	All editions	Available globally
Audio Overviews	Turn any file – even your Deep Research reports – into a podcast that you can listen to anytime, anywhere. Learn more.	All editions	Available globally, 18+

Gemini for Education

Launch	Product/feature description	Availability	Geographic availability
Gemini app data retention controls	Support data privacy and compliance with institutional policies with admin controls for how long Gemini app conversations are retained. Learn more	All editions	Available globally
Google Vault: Search Gemini app conversations	More easily monitor AI adoption in your institution and support compliance by allowing admins to quickly search Gemini conversations, export results, and get usage reports using Vault. Learn more	All editions	Available globally
Gemini audit logs exported to BigQuery	Help admins view Gemini adoption and usage data across all Google Workspace apps by exporting Gemini Audit logs directly to BigQuery Export. Analyze user interactions for enhanced security and reporting via BigQuery or existing tools like the Admin SDK and security investigation tools. Learn more	All editions	Available globally
Gemini app data now included in Access Transparency, Access Management, and Access Approvals	Ensure control over your organization's Gemini app data security. Access Management, Access Transparency, and Access Approvals now cover the Gemini app, so admins have full insight into which Google support staff can view data for troubleshooting and when. Learn more	Google Workspace for Education Plus, Teaching and Learning add-on	Available globally
Organization logos in the Gemini app	Experience Gemini customized for your institution. When you sign in to the Gemini app with your work or school account, you'll now see your organization's logo next to your profile picture, just like in other Google services. Learn more	All editions	Available globally

Launch	Product/feature description	Availability	Geographic availability
Infographics	Make it easier for students to understand complex insights, facts, and ideas in your sources by turning them into clear, high-quality infographics. Learn more	All editions	Available globally, 18+
Slide generation (PDF only)	Save time and effort bringing your ideas to life. Get help creating polished Google Slides directly from your sources, and share them as a PDF. No design skills needed. Learn more	All editions	Available globally, 18+
Video Overviews	Use video overviews to transform dense information from your documents into digestible, narrated video essays. Customize them by topic, learning goals, and target audience. Learn more	All editions	Available globally, 18+
Mind Maps	Break things down logically in a visual way when exploring topics from a variety of sources. Mind Maps visually summarize your uploaded sources, showing the key themes and their related ideas as a branching diagram. Learn more	All editions	Available globally
Flashcards	Make students' learning and studying experiences easier by effortlessly creating flashcards with key terms, dates, and concepts from uploaded sources. Learn more	All editions	Available globally
Study guides	Foster active learning and deeper understanding by instantly generating a study guide from uploaded sources. Learn more	All editions	Available globally
Interactive quizzes	Empower students to go beyond simple reviews or memorization. Now, they can test their comprehension with personalized questions based on class material, adjust the topic and difficulty level, and easily share their study sets with peers. Learn more	All editions	Available globally

Launch	Product/feature description	Availability	Geographic availability
Studio panel	Create and store multiple Audio Overviews and Video Overviews within a single notebook with the Studio panel in NotebookLM. Learn more	All editions	Available globally
Learning Guide	Help students build a deeper understanding of a subject. Instead of just giving answers, the new Learning Guide in NotebookLM encourages participation by offering open-ended questions, breaking down problems into steps, and adapting explanations to learners' needs. Learn more	All editions	Available globally
Public notebooks from OpenStax	Save time with interactive notebooks from popular academic textbooks. Biology, psychology, and business content is already preloaded into ready-to-use notebooks in NotebookLM so students can create flashcards, quizzes, and reports. Learn more	All editions	Available globally
Gemini LTI: Assign notebooks from NotebookLM directly in Canvas by Instructure and PowerSchool Schoology Learning	Help students learn in their own way by assigning notebooks directly in Canvas by Instructure and PowerSchool Schoology Learning. Learn more	All editions	Available globally
Fast Research	Pull in sources based on a query to conveniently begin new notebooks and build comprehensive collections of relevant materials. You can search for sources from the web or Google Drive with Fast Research, or you can use Gemini Deep Research directly within NotebookLM. Learn more	All editions	Available globally
Deep Research	Deep Research is an agentic feature that can automatically browse up to hundreds of websites on your behalf, think through its findings, and create insightful multipage reports in minutes. Learn more	All editions	Available globally, 18+
Expanded access to students of all ages	Provide students of all ages access to NotebookLM to help them understand class materials, create their own study guides, and more. Learn more	All editions	Available globally
Audio Overviews language expansion	Upload sources in over 50 languages to NotebookLM and then generate podcast-style audio discussions in any of them. Learn more	All editions	Available globally, 18+

Gemini in Google Classroom

Launch	Product/feature description	Availability	Geographic availability
AI tools built for educators			
Generate content and resources with Gemini in Classroom	Accelerate resource creation by giving educators more than 30 AI-powered tools directly within a central place in Classroom. Draft curriculum, rubrics, and project ideas based on learning objectives with new scaffolded tools for generating and refining content. Learn more	All editions	Available globally in English
Create audio lessons with Gemini in Classroom	Turn any topic or content into a captivating, podcast-style audio lesson – right from Classroom. Learn more	All editions	Coming soon; will be available globally in English
Convert files to rubrics during assignment creation	Help educators quickly adapt existing rubrics from Google Drive or local files for Classroom assignments with Gemini's assistance. Learn more	All editions	Available globally in English
Teacher-led AI learning experiences for students			
Educator-led NotebookLM	Build a binder of digestible resources with NotebookLM – now assignable from Classroom. Select resources from your class to instantly create interactive study guides, Audio Overviews, and Mind Maps that are grounded in your sources. Learn more	All editions	Available in NotebookLM-supported languages
Educator-led Gems	Enable students to create custom versions of Gemini in Classroom. In Classroom, use Gem templates or create your own Gem. All Gems are informed by your uploaded class materials and the web. Learn more	All editions	Available in Gemini app-supported languages
Stories generated in Read Along	Empower educators to create their own stories directly within the Read Along in Classroom workflow. Generated stories will then be transformed into interactive Read Along activities for students. Learn more	Google Workspace for Education Plus, Teaching and Learning add-on, Google AI Pro for Education add-on (formerly Gemini Education add-ons)	Available globally in English

Google Workspace with Gemini

Launch	Product/feature description	Availability	Geographic availability*
Gemini in Google Forms	Quickly create assessments and surveys with Gemini in Forms. Generate a form based on a Google Docs file or a Slides presentation from your Drive storage, and use Gemini to summarize form responses. Learn more	Google AI Pro for Education	Available globally in English
Gemini in Google Vids	Create your own engaging videos for learning with Gemini in Vids. Gain access to generative AI tools that help you automate the production, editing, and customizing of videos. Learn more	Google AI Pro for Education	Available globally in English
Veo 3 in Google Vids	Enhance lessons and bring ideas to life with Veo 3 in Vids. Quickly generate 8-second videos, complete with speaking characters and immersive sound effects. Learn more	Google AI Pro for Education	Available globally in English
Gemini in Google Sheets multistep tasks and expanded editing	Handle multiple actions from a single prompt with Gemini in Sheets, so you don't have to simplify instructions or interrupt your workflow with separate prompts. Learn more	Google AI Pro for Education	Available globally
Scheduled actions in the Gemini app	Provide more proactive and personalized student updates, reminders, and classroom workflows with scheduled actions in Gemini. Enable educators to automate recurring tasks or program actions to occur at set times. Learn more	Google AI Pro for Education	Available globally
Generative AI in Google Workspace Privacy Hub	Get a summary of Gemini in Workspace Apps privacy and security controls – and quickly understand what Gemini does and doesn't do by visiting the Privacy Hub. Learn more	Google AI Pro for Education	Available globally

*All Google Workspace with Gemini features are 18+

Google Workspace with Gemini

Launch	Product/feature description	Availability	Geographic availability*
Quick meeting setup in Gmail	Allow Gemini in Gmail to detect when you're trying to schedule a meeting. Click the "Help me schedule" button and automatically get suggested available times based on your Google Calendar and email context. Learn more	Google AI Pro for Education	Available globally
"Take notes for me" enabled before meetings	Stay fully engaged during meetings by receiving a full transcript and summarized notes from your Google Meet calls. With "Take notes for me," meeting organizers can now enable this feature when scheduling meetings in Calendar. Learn more	Google AI Pro for Education	Available globally
Gemini-analyzed data from multiple tables in a spreadsheet	Understand and analyze multiple tables within a single tab of a spreadsheet with Gemini in Google Sheets. Now, you can select or deselect tables to be a part of the analysis, or select an area of a table as input for your query. Learn more	Google AI Pro for Education	Available globally
AI-generated meeting backgrounds from mobile devices	Create custom meeting background images from your Android or iOS device with Gemini. Obscure your surroundings to remove distraction or make meetings more engaging. Learn more	Google AI Pro for Education	Available globally

*All Google Workspace with Gemini features are 18+

Google Workspace with Gemini

Launch	Product/feature description	Availability	Geographic availability*
Image editing in Google Slides and Vids with Nano Banana	Improve the quality of your images with Nano Banana image editing now available in Slides and Vids. Create or edit images with custom prompts right in your presentation or video by simply selecting an image, typing your prompt, and inserting it directly into your work. Learn more	In Google Slides, this feature is only available in Google AI Pro for Education; in Google Vids, this feature is available in Google AI Pro for Education and in Education Plus and Teaching and Learning subscriptions until May 2026	Available globally
Google Slides transformed into videos with scripts, AI voiceovers, and music	Automate video creation and transform your existing Slides content into engaging, shareable videos. Convert presentations in Vids and enable Gemini to generate polished scripts, AI voiceovers, and background music instantly. Learn more	Google AI Pro for Education Education Plus; available with Google Workspace Education Plus and Teaching and Learning add-on through May 2026	Available globally
Smarter, more conversational formulas in Google Sheets	Get smarter, more resilient formula generation with upgraded Gemini functionality for Sheets. Now, you can receive detailed explanations for formulas and corrections to help fix issues fast. For complex tasks, Gemini can also provide multiple formula options. Learn more	Google AI Pro for Education	Available globally
Gemini in Google Sheets now supports seven new languages	Generate text, categorize data, or analyze sentiment directly within cells with Gemini in Sheets. Now, this features is available in seven additional languages: Spanish, Portuguese, Japanese, Korean, French, Italian, and German. Learn more	Google AI Pro for Education	Available globally
Google Chat messages refined with Gemini	Chat more efficiently using Gemini in Chat. This feature helps you improve clarity, conciseness, and accuracy in wording, grammar, and spelling. Learn more	Google AI Pro for Education	Available globally

*All Google Workspace with Gemini features are 18+

Google Workspace with Gemini

Launch	Product/feature description	Availability	Geographic availability*
Google Slides text refined with Gemini	Quickly polish your text in Slides. Just ask Gemini to rephrase, shorten, formalize, or bulletize your text boxes in Slides using a custom or preset prompt. Learn more .	Google AI Pro for Education	Available globally
AI avatars in Google Vids	Simply write a script and choose a persona to deliver your content, and Vids will automatically generate a polished video for you. Learn more	Google AI Pro for Education	Available globally
Dynamic tables in Google Sheets	Convert your data into a formatted table with a single click using Gemini in Sheets. Accept a “Convert to table” suggestion and Gemini automatically formats your data as a table and creates a meaningful table name. Learn more	Google AI Pro for Education	Available globally
Listen to Google Docs with Gemini	Create audio versions of your documents using Gemini in Docs and listen to your document content instead of reading it. Learn more	Google AI Pro for Education	Available globally
More ways to catch up in Google Chat	Summarize unread conversations in the Chat home view and summarize files shared in conversations with Gemini in Chat. Now, you can also catch up on unread messages in a direct message, group conversation, or space. Learn more	Google AI Pro for Education	Available globally

File summaries on the homepage in Google Drive	Find what you need faster on Drive. See a quick summary of your Docs, Sheets, Slides, and PDF files directly on your Drive homepage. If you need more detail, simply click “See more” to ask Gemini follow-up questions or get a deeper analysis right in the side panel. Learn more	Google AI Pro for Education	Available globally

*All Google Workspace with Gemini features are 18+

Google Workspace with Gemini

Launch	Product/feature description	Availability	Geographic availability*
More languages for “suggested next steps” when using “Take notes for me”	Use “Take notes for me” and get auto-suggested next steps, now in seven more languages: French, German, Italian, Japanese, Korean, Portuguese, and Spanish. Learn more	Google AI Pro for Education	Available globally
Gemini in Google Docs on iOS devices in 20+ languages	Extend your AI capabilities to Docs on iOS devices with Gemini now integrated into Google Workspace business plans. Efficiently summarize long reports, find specific details by asking questions within documents, and generate first drafts of plans, all from an iPhone or iPad and without switching applications. Learn more	Google AI Pro for Education	Available globally
Image support for Gemini in the side panel of Google Drive	Ask Gemini questions about your Drive images and get instant answers and summaries. You can even extract text or data, or write a story about it. Learn more	Google AI Pro for Education	Available globally in English
Organize your Google Drive with Gemini	Stay on top of all your files and folders with Gemini as your organization assistant in Drive. Gemini can now recognize more natural language to move selected files into the folder you choose. Open Gemini in the side panel of Drive and type a simple prompt to get started. Learn more	Google AI Pro for Education	Available globally
Email a Google Meet meeting summary	Get an overview of your meeting sent directly to your email inbox. After a meeting, Meet will send an email summary of the meeting and provide suggested next steps when you use “Take notes for me.” If you’re a meeting host or co-host on a web browser, you can also choose who the meeting notes should be sent to. Learn more	Google AI Pro for Education	Available globally
Audio summaries for PDFs in Google Drive	Convert long, text-heavy PDFs, like reports or meeting transcripts, into a podcast-style audio summary using Gemini for Google Workspace. With just a click, a new audio file is saved directly to your Drive. Learn more	Google AI Pro for Education	Available globally
Workspace content in Gemini Deep Research	Seamlessly gather information from your content in Gmail, Chat, and Drive – including Slides, Sheets, and Docs files – in addition to the web, to create more personalized reports using Gemini’s Deep Research integrated in your Workspace apps. Learn more	Google AI Pro for Education	Available globally

*All Google Workspace with Gemini features are 18+

Google Workspace for Education

Google Workspace for Education

Launch	Product/feature description	Availability	Geographic availability
Google Vids: Now available for all Google Workspace for Education customers	Inspire the next wave of storytellers with a collaborative video creation app for students and educators. Now, all Workspace for Education customers can get started on video projects quickly using templates and stock content, collaborate in real time, and more. Learn more	All editions	Available globally
Google Vids: Limited-time generative AI feature access	Supercharge your videos with AI power. Go from idea to video faster using Veo for text-to-video creation, or use “Help me create” to generate storyboards and video drafts. Convert a Slides presentation to video with voiceovers, or present with AI avatars, preset voices, and a read-along teleprompter. Polish content using transcript trim and image editing. Learn more	For a limited time, until May 2026, select gen AI features in Vids are available to Google Workspace for Education Plus and Teaching and Learning add-on users	Available globally
eSignature in PDFs	Speed up permissions and approvals by electronically requesting secure signatures right from within Google Docs and PDFs stored in Drive. Learn more	Google Workspace for Education Plus, Teaching and Learning add-on	Available globally
New templates in Google Slides	Save time creating lesson plans, book reports, project reports, and more by accessing a refreshed library of professionally built Slides templates. Learn more	All editions	Available globally
New controls for third-party apps	Have more control over who can access your data. Manage app policies using organizational units, review user-level insights in the Admin console, and enable educators to request app access for their students. Learn more	All editions	Available globally
Playwrite Fonts	Help primary school students learn how to draw letters with this new visual aid feature in Google Workspace, Google Classroom, and Google Fonts. Learn more	All editions	Available globally
Google Forms security updates	Enhance security over Forms responses by enforcing Google Drive sharing policies, and getting more control over who can respond to Forms. Learn more	All editions	Available globally
Google Meet waiting room	Gain more control over your Meet calls. The waiting room lets you easily oversee attendee entry, bring participants in and out, and have everyone wait briefly before joining the meeting. Learn more	Google Workspace for Education Plus, Teaching and Learning add-on	Available globally in all Google Meet-supported languages

Google Workspace for Education

Google Workspace
for Education

Launch	Product/feature description	Availability	Geographic availability
Board in Google Chat	Streamline team collaboration with a virtual bulletin board in Chat. Pin crucial messages, files, and links for instant access, and use AI-powered suggestions to quickly find and add relevant resources. Learn more	All editions	Available globally in all Google Chat-supported languages
Google Slides: New building blocks, layouts, and stock images	Boost your creativity and design efficiency in Slides. Create visually compelling presentations faster using new building blocks, professional layouts, and an expanded library of stock images. Learn more	All editions	Available globally
Data classification labels for Gmail	Better protect your sensitive information in Gmail. Empower admins to define and apply custom data classification labels for Gmail at the app level within the Admin console. Learn more	Google Workspace for Education Plus, Teaching and Learning add-on	Available globally in all Gmail-supported languages
Ransomware detection and file restoration with Google Drive for desktop	Minimize the impact of a ransomware attack on personal computers in your institution and restore your files instantly. For users with Google Drive for desktop, this feature automatically pauses syncing upon detection and alerts you and your admins. Easily select and revert multiple infected files back to their uncompromised versions with an easy restore process.* Learn more	Google Workspace for Education Plus, Teaching and Learning add-on	Available globally
Client-side encryption in Google Sheets	Make it easier for admins to analyze and control sensitive information. Manage data for compliance audits by converting client-side encrypted Sheets into an Excel file when exporting. Learn more	All editions	Available globally
Security for third-party apps	Apply Context-Aware Access policies to all third-party apps that use Google for sign-in. Instead of setting policies for each app individually, admins can now use one setting to enforce security rules across all of them. Learn more	All editions	Available globally
Context-Aware Access	Ensure NotebookLM is only accessed by authorized users. With Context-Aware Access in NotebookLM, admins can now grant access based on user identity, location, and device status to provide an extra layer of protection. Learn more	All editions	Available globally

* Note: Drive for desktop isn't available for Chromebooks since ransomware protection is built in by default.

Google Classroom

Launch	Product/feature description	Availability	Geographic availability
