Google AI Educator Series

Content Library

Program Overview

Welcome to your primary anchor for facilitating the **Google AI Educator Series (GES)**. This document is designed to support you as you function in the role of facilitator. It serves as your first stop—a comprehensive roadmap that equips you with the narrative, frameworks, and technical strategies needed to successfully deliver this content.

Format

Session content is provided in two different formats to allow for flexibility:

- **Google Slide decks for in-person training**
- **Online for self-serve training**

At the end of each session, learners are prompted to take a quick assessment to validate their understanding and receive a badge.

The sessions are non-sequential and intended to fit into an educator's schedule. Sessions will span from 10-15 minutes for K-12, and 30-45 minutes for Higher Education from start to certification.
