

Improve operational and clinical efficiencies with the power of cloud-native imaging

Radiologists are under enormous pressure to accelerate reporting speeds while ensuring diagnostic accuracy. The number of medical exams and accompanying medical images are increasing, while the number of radiologists is decreasing.

To address these urgent needs, Change Healthcare and Google Cloud have joined forces to enable healthcare providers with a powerful yet intuitive and cost-efficient medical imaging solution. Change Healthcare Stratus Imaging PACS (picture archiving and communication system) takes care of every step in the radiology workflow, from access and management to reporting and analysis, so you can focus on better patient care.

Drive faster, more accurate diagnoses

Accelerate results with a purpose-built imaging solution created by the leaders in medical imaging and cloud innovation.

Access images anytime, anywhere, anyhow

Securely access, review, and deliver medical images from anywhere to anyone on any device.

Modernize with a fully managed cloud-native platform

Improve performance and reduce costs with a fully managed enterprise imaging platform, built from the ground up with cutting-edge Google Cloud technologies.

Reimagine experiences to deliver better patient care

Deliver exceptional user experiences with an enterprise imaging platform that addresses the needs of all stakeholders from clinicians, physicians, and patients to IT and operations.

Digital healthcare with a PACS for the digital world

With Change Healthcare Stratus Imaging, you can drive faster, more accurate diagnoses while reducing the strain on healthcare staff, IT resources, and budgets.

The cloud-native choice for a high return on investment

Change Healthcare Stratus Imaging enables you to address increasing pressures to reduce hard costs and uncover invisible costs. Future-proof your healthcare imaging needs and gain upfront visibility into pricing with a fully managed, cloud-native imaging solution. Experience the proven benefits firsthand of seamless data migration, 99.99% or higher uptime, interoperability, and more.

Fast

Images are automatically uploaded to the cloud and immediately available in the Stratus platform

Hassle-free

Fully-managed solution from data migration to continuous maintenance, with zero downtime

Cloud-native

The first major cloud-native enterprise imaging platform offered as a fully managed SaaS solution

Intelligent

AI, machine learning, and pixel data algorithm for better, faster diagnoses

Full visibility

Ability to provide a consumer-grade streaming experience to any stakeholder

Cost-effective

All-inclusive, price-per-exam subscription model with no upfront fees

Flexible

View from anywhere, on any device

Secure

Best-in-class Zero Trust security framework

Experience the future of medical imaging, today

Solve today's medical imaging challenges and build the foundation for new enterprise models and opportunities with the deep cloud, data, and medical imaging expertise you can only get from Change Healthcare and Google Cloud. [Learn more.](#)
