

Terms	Definition
Google Workspace for Education	Google Workspace for Education empowers your school community with simple, flexible, and secure tools to collaborate easily, streamline instruction, and keep the learning environment secure.
Google Classroom	Classroom is where your child can find their assignments, grades and feedback, and communicate directly with the teacher. As a guardian, you can opt into guardian summaries to keep up with your child's progress.
Google Meet	Meet is a secure platform where teachers can hold class, parent/teacher conferences or office hours, especially with distance learning . Meet can be used to recreate the experience of your child being in class to keep them learning.
Google Docs, Sheets, or Slides	Your child can create documents, spreadsheets, or presentations that they can share with others, receive feedback on through comments, and edit in real time with it all being saved automatically.
Google Forms	Teachers can do a lot in Forms, like creating quizzes, parent feedback surveys, or even field trip forms. Your student may also use forms for in-class activities like creating a poll, or sending out a survey to their class.
Google Drive	Drive is your child's virtual backpack, where they can hold all of their assignments, projects, and notes online. It saves automatically, can be shared with others, and is accessible from any device—all they have to do is login to their student account!
Google Calendar	Each class in Google Classroom has its own calendar, which helps your child know when they have upcoming events or assignments. Teachers can also use Calendar to create appointment slots to meet with students, or hold parent-teacher conferences.
Google Sites	Teachers can create sites that collect work, share the curriculum students will be learning, and make the schedule for the class easily viewable. You can also find announcement banners on Sites, specifically made to share updates with guardians and families.
Assignments	Assignments, an application for your learning management system, gives educators a faster, simpler way to distribute, analyze, and grade student work – all while using the collaborative power of Google Workspace.
Socratic	Socratic can help your student navigate learning roadblocks and master difficult concepts. It has videos, step by step explanations, and other resources to help your child understand the problem they are tackling.

Lens

A tool where your student can share questions via their camera and be presented with trusted homework explanations. [Lens](#) allows you to explore the things around you in a new way, and can also be used in a context outside of school.

Google Search

A search engine that can be used to answer your students questions and deepen their understanding of difficult concepts or problems. When your student searches a homework problem, Search quickly connects them to possible explanations and extra resources to figure out a solution. Search also has an [Augmented Reality \(AR\) feature](#), where your student can use AR to look at body systems, animals, and more- all in 3D.

Read Along

Read Along engages young children as they learn to read, helping them improve their reading skills while having fun with Diya, their in-app reading buddy. Diya listens to them read aloud, offers support when they struggle, and rewards them with stars when they do well.
