We recently used Meet to bring in a guest speaker from the Ainu community, a marginalized group here in Japan. The speaker inspired our students with their story and taught them important life lessons about equity and inclusion.”

Nate Gildart, Teacher, Nagoya International School

School communities are discovering many ways to enrich education with Google Meet – both in and out of the classroom. Explore how you can enhance the learning experience, improve professional development, and engage your whole school community with easy-to-use, reliable, and secure video conferencing.

Meet has become our go-to for providing professional development for our staff from a location that is comfortable for them. Moreover, unlike the in-person sessions we conducted pre-pandemic, Meet makes it easy to record these sessions, so teachers who are unable to attend live can still access the content and learn from it.”

Megan Swope, Technology Coach, Pennsbury School District

Discover more ways to empower and connect your school community.

Educators are constantly finding new ways to use Meet. Here are a few examples of how you can use it in your school community:

- Meet with parents or guardians remotely
- Conduct and record virtual professional-development sessions with teachers in your school or district
- Host virtual school-board meetings while auto-transcribing the meeting for easy review
- Have scheduled or impromptu meetings with other faculty members or administrators
- Attend recurring meetings with other faculty members and form group-learning communities
- Host extracurricular activities remotely
- Live stream events like graduation ceremonies on YouTube so no one misses out

Create more ways for students to learn and connect.

Check out some of the top ways educators are using Meet to enhance the student learning experience:

- Host online classes when students can’t be in class in person, like during snow days
- Enable guest speakers to present virtually – even in their native language – with live translation
- Teach smaller groups or clubs remotely
- Host virtual field trips for students
- Make it easier for students to get help from their teachers with flexible office hours
- Allow students to take tests from different locations and monitor student exams remotely
- Make connections with classes at other schools – invite or attend another class’s lesson

Learn anytime, anywhere with Google Meet

edu.google.com/products/meet
Get inspired by Google Meet features that enable more flexible teaching and learning in your school.

Real-time translation and transcription
- Communicate and interact easily with students, parents, or guardians who speak other languages with real-time translated captions
- Keep records of classes by auto-transcribing meetings in Google Docs so students can search and review lessons later

Live streaming
- Live stream public events like award and talent shows and post them to YouTube
- Involve the extended school community by recording live streams for viewing at a later time
- Include Q&A and polls within the live stream for immediate feedback and collaboration
- Invite guest speakers to present and record for professional development sessions

Deeper collaboration
- Empower students to easily share ideas during group work by launching a meeting from Google Docs, Sheets, or Slides
- Improve collaboration in professional development sessions by sending educators into breakout rooms
- Collect student feedback and opinions with Q&A and polls – and easily consolidate their answers

Recordings
- Create a repository of recorded classes to allow students to review and other educators to learn from
- Send recorded messages to students and guardians
- Help students stay caught up when out sick by sending them recorded assignments and resources
- Prepare substitute teachers for classes by equipping them with recorded resources

These features are available with the Teaching and Learning Upgrade and Google Workspace for Education Plus. Choose the edition that’s right for your institution.

Teach and learn confidently with Google Meet security features
Conduct your classes knowing that they’re private and secure. Meet undergoes regular, rigorous security and privacy audits and hands more control over to meeting hosts with features like muting and removing participants, giving multiple co-hosts moderation abilities, and more.
