Google Cloud

Public Sector Summit UK 2024

- **AI in Government - Future Thinking**

Join Google Cloud's EMEA CTO to understand the latest innovations and applications of Google's technology that can be harnessed to power public services. Offering a concise glimpse into the power and potential of Google Cloud's AI, Security and Productivity solutions, John will also share some of the Google magic that enables our culture of innovation and accelerated delivery that could unlock new potential across the public sector.

- **MINISTERIAL ADDRESS**

Hear directly from a key government Minister on their perspectives on enabling innovation and technology to deliver on their vision for digital government. Addressing key opportunities around AI, cybersecurity and infrastructure modernisation, the Minister will shed light on how together we can overcome challenges and barriers, and deliver the full impact of cutting-edge technology in service of HMG.

- **Competition: Unlocking the power of new partnerships in the Public Sector**

As the government seeks to enhance the UK's technology significance on the global stage, and as each department looks for new ways to power productivity, policy and public experience, this panel will dissect the complex and competitive landscape of technology providers, and share their insights into the findings of the latest CMA report on how to create a more inclusive and value-driven tech economy for the public sector.

- **Securing the Nation**

Join Anne Keast-Butler for an in-depth conversation with Google leadership as she shares the latest insights on the state of cybersecurity for the UK. As new threats evolve and the complex geopolitical landscape continues to shape policy and practice in the sphere of cybersecurity, Anne will decode some of our critical national security priorities for the year ahead.

- **Enabling cybersecurity to build resilience and mitigate emerging threats**

Building on the crucial topic of cybersecurity, our expert panel will exchange ideas on how we can build better resilience to meet the demands of new explicit and covert adversaries. Challenging our preconceptions, these cybersecurity experts will explain their understanding of the threat landscape today, and how technology can be used to both exploit as well as mitigate vulnerabilities, ensuring that we all can consider just what are the right steps to take to build resilience in protection and defence of our most critical national assets.

- **Powering Public Service in the UK**

As public sector organisations seek to enhance productivity, precision insights and public experience through technology, this industry panel will share their perspectives on the challenges and opportunities that lie ahead. Dive deep into current examples of where technology is being leveraged to share data, collaborate on policy-making, and create the time and space for public sector workers to prioritise essential services over administrative toil; and consider just how leading organisations are developing the strategy, skills and frameworks to double down on technology innovation in the context of public service.

Strategic tracks to dive deeper into your priority topics:

Commercial + Operational	Technical + Delivery
Building the business case for legacy migration	How can AI augment coding? Gemini Code Assist Deep Dive
What does an API Strategy for Data Sharing xGovernment look like? -	How to mitigate threats and rapidly respond to emerging cybersecurity challenges?
How to build the database to power a national data sharing platform?	How can AI support transformation of the mainframe?

- **AI for Good: What is the impact of AI in the UK?**

Artificial Intelligence has arrived to reimagine how we work, live, communicate and play, and Google lives at the heart of this change. As we seek to improve lives through the power of AI we will share the latest research on just where and how Google's responsible application of AI is delivering economic impact, powering jobs, industry and innovation across the UK.

- **AI in Action: Augmenting public service through AI Innovation**

Having understood where AI is having an impact at the macro-economic level, join this industry panel to learn more about where AI is having an impact on the ground in the public sector today. From saving sight through clinical research models, through to connecting the nation to enhanced wifi at pace, this session showcases the art-of-the-possible and the practical considerations needed to make AI work hardest in pursuit of your public sector missions.

- **AI Leadership Huddles**

Join these tailored AI Leadership Huddles to get to grips with the AI opportunities in your specific area of operation. From powering productivity across clinical teams in healthcare, to improving emissions through AI powered traffic control, all the way to leveraging AI in the context of defence and security and central government operations - each of these interactive working sessions is designed to provide you with the opportunity and insight to harness AI to meet your priority goals.

- **AI in HEALTHCARE**
- **AI in TRANSPORT**
- **AI in CENTRAL GOVERNMENT**
- **AI in DEFENCE + SECURITY**

- **Google Cloud AI Hackathon Showcase: AI in your hands**

Across the course of the past year, Google Cloud has supported leading public sector organisations to take AI into your hands. This closing session gives the platform to the winning teams from each of our strategic hackathons to showcase what can be achieved in solving public sector challenges in just 2 days.

From reducing the administrative burden on GPs through to improving accessibility across the transport network, learn from these diverse teams of hackers just what they have achieved, and what's next for the prototypes they developed.
