chromeOS

Everything you need to manage **kiosk & signage devices**

Kiosk & Signage Upgrade is a management license that gives you comprehensive security and management capabilities for all your ChromeOS kiosk and signage devices. Remotely deploy apps, control updates, and monitor the health and status of devices to reduce downtime while enhanced security features keep your business protected.

Advanced Security

Kiosk & Signage Upgrade provides IT with powerful security controls to protect your business. Prevent data theft by remotely disabling or wiping devices that have been lost or stolen. Place devices in persistent enrollment, ensuring they are always enrolled in management, even if factory reset.

Simplified Remote Management

Kiosk & Signage Upgrade helps IT simplify management of the organization's device fleet. IT gains access to device policies and fleet oversight capabilities, all from the easy-to-use, cloud-based Google Admin console.

Scalable Monitoring & Control

IT can monitor the health and operation status of all deployed ChromeOS devices and get valuable device reports to greatly reduce device downtime. Remotely monitor and control devices through Chrome Remote Desktop.

24/7 IT admin support

Contact Google for ChromeOS troubleshooting assistance with 24/7 IT admin support.

Manage devices from anywhere

With Chrome Remote Desktop, you can use a computer or mobile device to secure kiosk and signage applications on another device.

Remotely troubleshoot, support, control, and manage devices from anywhere.
