

Managing Complex Security Challenges at Charles Schwab

Company

Charles Schwab

Industry

Financial Services

Google Security Product/s

**Security Operations,
Threat Intel,
Gemini**

Summary

Using Google Security products and Gemini, investment and brokerage giant Charles Schwab is seeing improvements in how it manages complex security incidents when it comes to helping seasoned security professionals quickly discover, investigate, and respond to threats.

Key Points

1. AI's power to transform financial security with generative AI, Chronicle, and Mandiant in an ever-changing cybersecurity landscape
2. Shared responsibility model to build a valuable security system at exceptional scale
3. Moving towards self-healing systems capable of swiftly identifying and mitigating risks and advancing cybersecurity capabilities for a safer digital environment

With Chronicle, we have the ability to establish scale, collect fantastic level of telemetry without any limitation. We're able to automate and correlate with Threat Intelligence from Mandiant. Leveraging AI, we've been able to build much more in value adjacent to it on the generative AI and predictive AIs."

Bashar Abouseido, SVP & CISO, Charles Schwab
