

Google Unified Security Recommended Solution Overview with **Palo Alto Networks Prisma** **Access**

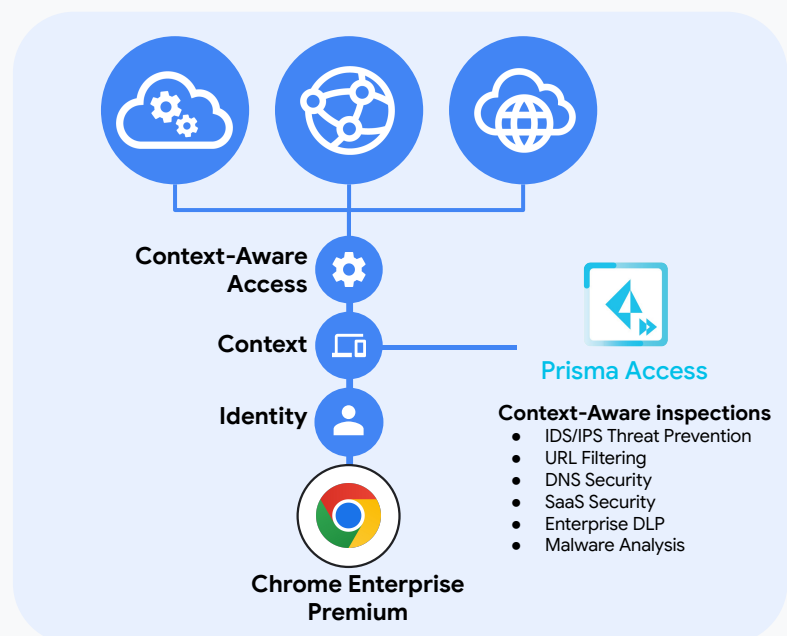

Seamless access for any user, on any device, to any app,
anywhere: simply and securely

As organizations embrace hybrid work and cloud-native applications, securing access without compromising performance or user experience is paramount. This strategic partnership between Palo Alto Networks Prisma Access and Google Unified Security delivers a simplified, high-performance, and secure solution.

This unique partnership extends Prisma Access application-defined networking and security capabilities with consistent policies across every user, device, and application, significantly improving security posture, reducing operational complexity and TCO.

Prisma Access integrates with Google Unified Security solutions to provide customers with enhanced security capabilities

Palo Alto Networks Prisma Access integrates deeply with Chrome Enterprise Premium and Google Security Operations. This establishes a modern, AI-driven zero-trust network access solution by unifying network and browser security, enforcing granular, context-aware policies, and accelerating threat response with hyper-scale telemetry ingestion. The combination reduces complexity while ensuring consistent, low-latency access.

Integrate Prisma Access with Google Cloud Security to enforce dynamic, context-aware policies via Chrome Enterprise, centralize threat telemetry in Google SecOps, and accelerate Mandiant-led incident response for a unified security posture.

Google Security Operations

Accelerate investigations by correlating Prisma Access network traffic with Chrome browser events within Google Security Operations.

chrome enterprise

Enforce unified Zero Trust access policies across network and browser by combining Prisma Access device posture with Chrome Enterprise controls.

Mandiant

Empower Mandiant incident responders with instant visibility into global network traffic and user activity via Prisma Access telemetry.

Google Threat Intelligence

Palo Alto Networks Prisma Access works in tandem with Google SecOps where high-severity alerts from the solution are ingested and enriched by Google Threat Intelligence data.
