

Chrome Enterprise Recommended Solution Overview with RingCentral

Next generation communications that accelerate the world's ability to connect.

Providing a modern agent experience ensures agents can communicate with their customers across every channel, handle high ticket volumes, and protect their customer's data against fraud. With RingCentral Engage Voice, RingCentral Engage Digital, and Google Chrome OS, you can provide agents with easy to use tools they need to provide great service, all from a secure endpoint that's easy to manage.

Discover the benefits

RingCentral Engage + Chrome OS = Happy Agents + Happy Customers

Increase agent productivity and efficiency

With RingCentral Engage's robust modern application on the familiar Chrome OS device, agents can spend more time assisting customers vs searching for data or troubleshooting systems.

Stress-free deployment and administration

RingCentral's Engage bundled on Chrome OS devices enables businesses to quickly onboard agents in a work from anywhere environment. It gets much easier to deploy and manage it all from a single Google Admin console.

Protect your business & customer information

There are no disruptions to an agent with Chrome OS updates and they are protected against all ransoms. This, combined with RingCentral's proactive application upgrades and secure platform, companies ensure you are compliant with ever changing regulations.
