Providing a safer digital-learning environment is an essential objective of Google for Education, so everyone can teach and learn knowing that their personal information is private and their educational tools are secure.

**Secure by default**
Enterprise-grade privacy and security are built into the very foundation of Google for Education.

**Private by design**
Prioritize privacy with tools that uphold the highest standards of digital responsibility.

**You're in control**
Retain full control of your school's data with easy-to-use privacy and security settings.

**Trustworthy content and information**
Access high-quality, reliable educational resources.

**Cybersecurity is more important than ever for school communities**
- 96% of education institutions lose their ability to operate after a cyberattack – sometimes for months at a time
- The FBI warns K-12 educational institutions that their student data is a priority targets for cyberattacks in the ’22–’23 academic year

**Google keeps more people safe online than anyone else in the world**
- There have been no successful ransomware attacks ever on any business, education, or consumer ChromeOS device
- Google Workspace is the world’s most secure and popular cloud-based communication and collaboration suite

**Support compliance with rigorous privacy and security standards**
Google for Education supports compliance with the most rigorous global education standards for security and privacy, and we’re audited by independent, third-party organizations.

Every day is safer with Google
