

Chrome Enterprise Recommended Solution Overview with Samsung Knox Manage

Knox Manage is a powerful and flexible cross-platform UEM solution

As more organizations deploy digital solutions to their device fleet, tools are required to remotely manage these endpoints

Knox Manage simplifies remote management for IT, empowering workforces to achieve more in the office or out in the field

Knox Manage provides a cloud-based command center with a comprehensive set of enterprise policies, empowering IT admins to remotely track, manage and configure devices.

Businesses can invest in and get the most out of Chrome OS with the confidence that Knox Manage is validated to support them.

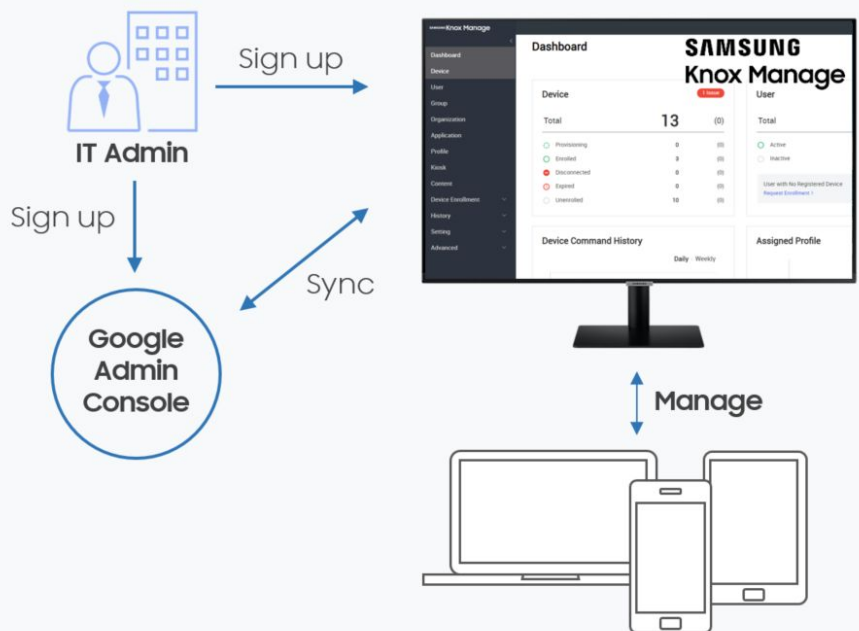

Discover the benefits

Knox Manage and Google Chrome Enterprise simplify the way users remotely manage their Chrome OS devices

IT admins work faster and easier when they only have one solution for managing all mobile devices in the organization. Knox Manage provides centralized device management of all devices, including Android, iOS, Windows and Chrome through a single platform

Simple and straightforward user experience maximizes the productivity of IT Admins

Industry-recognized and all in full sync with other Samsung services for an end-to-end customer support that even covers diverse devices and OS
