

## **Security Foundation solution**

## Overview

<u>Security Foundation</u> is an enterprise solution that includes Google Cloud recommended products and security capabilities to help achieve a strong security posture and protections for the Google cloud environment.

## **Products**

Identity & Security	Network Security	Compute Management
<ul> <li>Security Command         Center Premium         A native security and risk         management platform for         Google Cloud</li> </ul>	Cloud Firewalls     (Hierarchical firewall rules)  Protect your resources with flexible firewall rules & policies	<ul> <li>VM Manager         Suite of tools that can be used to manage operating systems for large virtual machine (VM) fleets running Windows and Linux on Compute Engine.</li> <li>Artifact Registry         Manage container images and language packages</li> <li>Container Analysis         Perform vulnerability scans on container</li> </ul>
<ul> <li>Cloud DLP         A fully managed service to help discover, classify, and protect your most sensitive data     </li> </ul>	VPC Flow Logs     Network monitoring logs     from VM instances and     GKEs	
<ul> <li>Cloud Identity Premium         A unified identity, access, app, and endpoint management (IAM/EMM) platform.     </li> </ul>	Cloud Load Balancing     High performance,     scalable load balancing     on Google Cloud	
<ul> <li>Cloud Logging         A fully managed,             real-time log             management with             storage, search, analysis             and alerting at exabyte             scale     </li> </ul>	<ul> <li>Cloud IDS         Cloud-native network         threat detection</li> <li>Cloud Armor         Security policies and         defense against denial of         DDoS and web attacks</li> </ul>	images
<ul> <li>Identity Platform         Provides Identity and access management functionality on Google Cloud     </li> </ul>	Cloud Certificate     Manager     Acquire and manage TLS     (SSL) certificates for use     with Cloud Load     Balancing	
<ul> <li>Cloud KMS         Manage encryption keys on Google Cloud     </li> </ul>	<b>3</b>	

## Google Cloud

0	Secret Manager Store API keys, passwords, certificates, and other sensitive data	
0	Binary Authorization Ensures trusted container images are deployed on GKE or Cloud Run
