ShareID provides the Ministry of the Interior with a secure identity document authentication solution for the 2024 Olympic and Paralympic Games.

ShareID contributed to the security framework for the 2024 Olympic and Paralympic Games ("JOP 2024"). The startup equipped the Ministry of the Interior's terminals with an identity document authentication solution. The goal was to streamline identity checks for the 12 million visitors while strictly respecting privacy rights.

Paris, September 17, 2024 - ShareID, a French deeptech company recognized as a leading player in digital trust, equipped the Ministry of the Interior's terminals to maximize the robustness and efficiency of identity checks during the JOP 2024. All the terminals used by the Gendarmerie Nationale and Police were fitted with this solution during the Olympic and Paralympic Games.

Since 2021, ShareID has been developing identity document authentication solutions worldwide in partnership with the Gendarmerie Nationale. This collaboration allows both parties to leverage and benefit from their respective expertise. As a result, ShareID has advanced its authentication algorithms to counter the latest fraud techniques. The Police and Gendarmerie Nationale now have the latest technology - GDPR Compliant by design - to combat the growing issue of identity fraud.

ShareID offered the Ministry of the Interior a pioneering solution that meets the needs of verifying the identity of people from all over the world. The key advantage of ShareID lies in its tailored response to field requirements, combining efficiency, precision, and respect for privacy.

"The adoption of our solution for this historic event marks a crucial milestone that strengthens our strategic position and boosts our growth prospects," said Sara Sebti, CEO and co-founder of ShareID.

The use of ShareID by police officers and gendarmes during security operations at the Olympic and Paralympic Games provided an ergonomic solution with a simple and user-friendly interface, facilitating identity checks carried out on this occasion.

About ShareID

A key player in cybersecurity and digital trust, ShareID specializes in combating identity fraud. The company was co-founded in 2020 by Sara Sebti and Sawsen Rezig and offers its clients a modular platform for both one-time and recurring identity verification solutions. ShareID stands out with its MFA 3.0 solution, which is based on Zero Trust and Zero Knowledge Proof technology. This allows for real-time identity verification equivalent to presenting an ID, without storing personal or biometric data.
