CERTIFY POINT EY

Certificate

Certificate number: 2022-014

Certified by EY CertifyPoint since: July 19, 2022

Based on certification examination in conformity with defined requirements in ISO/IEC 17021-1:2015 and "HDS Accreditation framework – version 2.0", the Information Security Management System as defined and implemented by

Google LLC*

located in Mountain View, California, United States of America is compliant with the requirements as stated in the standard:

Health Data Host (HDS) certification framework – version 2.0

Issue date of certificate: July 18, 2025
Re-issue date of certificate: August 6, 2025
Expiration date of certificate: May 14, 2027
Last certification expiration date: July 18, 2025

EY CertifyPoint will, according to the certification agreement dated May 23, 2022, perform surveillance audits and acknowledge the certificate until the expiration date noted above. This certificate is only valid in combination with a valid and accredited ISO/IEC 27001:2022 certification with certificate number 2012-001a issued by EY CertifyPoint, with issue date May 10, 2024 and expiry date May 14, 2027.

The certification is applicable for the assets, services and locations as described in the scoping section at the back of this certificate, with regard to the specific requirements for information security as stated in the Statement of Applicability, dated February 17, 2025.

Scope for certificate 2022-014

The scope of this 'Health Data Host (HDS) certification framework – version 2.0' certification is limited to the Google Cloud information security management system, which is implemented in the following Product Area, its offerings and locations as listed below, along with the data contained or collected by those offerings.

The certification scope includes the following activities, in accordance with Articles R.1111-8 and R.1111-9 of the Code de la Santé Publique (CSP):
1. The provision and maintenance in operational condition of physical sites for hosting the hardware infrastructure of the information system used to process the health data;
2. The provision and maintenance in operational condition of the hardware infrastructure of the information system used to process the health data;
3. The provision and maintenance in operational condition of the virtual infrastructure of the information system used to process the health data;
4. The provision and maintenance in operational condition of the platform for hosting information system applications;
5. The management and operation of the information system containing the health data.

Please note that the product offerings in scope for Activity 5 is limited compared to the other activities, as outlined below.

Please note that Activity 6 is not in scope, as there is no reliance on outsourced backups for the scope detailed below.

The scope has been aligned with the Product Area's ability to store customer data within the European Economic Area (EEA). Moreover, the scope of this 'Health Data Host (HDS) certification framework – version 2.0' certification is limited to Enterprise Customers.

Google Workspace products in scope for Activities 1 to 4:
