

Chrome Enterprise Recommended Solution Overview with Talkdesk

Talkdesk CX Cloud is a complete cloud contact center solution with Talkdesk AI for better customer experiences

Brands are continuously trying to differentiate themselves to attract and retain new customers.

While products and services can be commoditized, it's the experience a customer has that ultimately sets the brand apart, and every great experience the customer has is an opportunity for a brand to build trust and loyalty.

With agents at the front line, it's critical to ensure their user experience is seamless to deliver positive customer experiences.

Talkdesk and Chrome OS offer a better way for organizations to intelligently unlock the promise and potential of great customer experience. With AI, companies can respond to customer needs across channels with personalized, intelligent service, and prepare for their future expectations.

The Talkdesk CX Cloud on Chrome OS and the Talkdesk Click-to-Call Extension, ensure a simple, trusted experience, no matter where your agents are located.

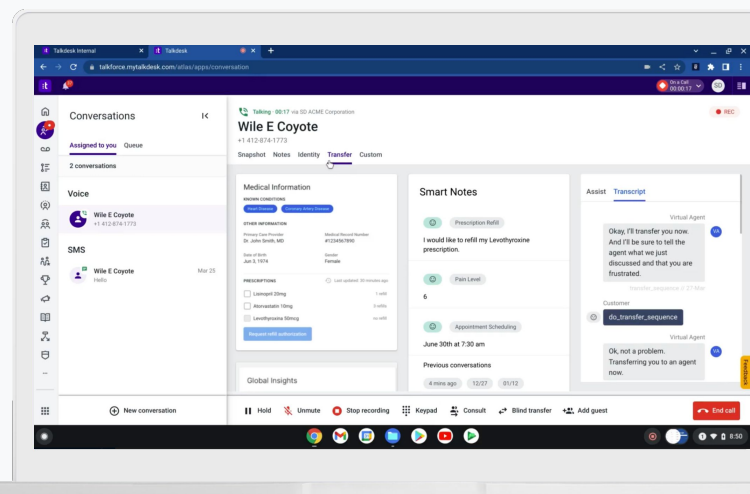

Discover the benefits

Drive security, simplicity, and agent productivity with Chrome OS and Talkdesk.

Agents can work and resolve customer issues in one place, easily accessing their Talkdesk tools from one in-browser experience.

Empower agents to serve customers from anywhere whether your agents are remote, hybrid, or in-office.

Talkdesk and Chrome OS combine enterprise scale with a familiar, intuitive user interface for fast and easy onboarding.
