Indonesians are also turning to Search for information on food products that would best suit their needs.

How Danone used Search to provide information on milk products to mothers

Search has helped us to drive traffic to our website and leads for our target customers - mothers who are traditionally on TV. To provide relevant information to mothers, we turned to Search and adopted an “always-on” approach to communicate to mothers in every stage of their motherhood journey. Since 2019, Search has helped us gain a 70% uplift in leads, and an 8% higher click-through-rate.

Takeaways for brands

1. Provide the inspiration your audience needs.

Indonesians are spending more time cooking while staying indoors. Provide inspiration on how they can use your products with easy recipes.

**Bango** showcased the various recipes people could create using their ingredients on their website.

2. Change how you reach your customers.

More Indonesians are eating in or ordering in. Find creative ways to entice customers to try your products. Add variety to your menu, such as frozen foods, to make cooking at home easier or offer incentives to those who buy in bulk.
Takeaways for brands

3. Leverage new trends to become a culinary trendsetter.

The pandemic has unlocked new food trends. Show consumers how your products can be integrated into them.

With trends surrounding Korean food taking off, Mie Sedaap collaborated with Korean icon Siwon to promote their new Korean noodle product line.

4. Focus on the health benefits.

With Indonesians becoming more proactive about their lifestyle choices, devise effective strategies to build brand loyalty early in consumers’ search for health. Create awareness about your products and educate consumers about their health benefits.

Tip

Be creative with ad copies. Getting the right message across at the right time is vital.
